DEDICATIONS

It is with great reverence that we dedicate this volume to Lord Shiva—The Hindu God.

"In classical Hindu Mythology the Cosmos passes through three major phases—creation, maintenance, destruction—mirroring birth-life-death. Brahma is the god of creation, Vishnu the god of maintenance (order), and Shiva the god of destruction (disorder). But Shiva's personality is multifaceted. Shiva is who walks on the wild side, the lone hunter, the dancer, the Yogin who withdraws from human society, the ascetic covered in ash. The untamed. The distinction between the order of Vishnu and the disorder of Shiva is not that of good or evil. It represents instead two different ways in which divinity makes itself manifest; benevolence and wrath, harmony and dischord.

Similarly order and chaos in Mathematics are two distinct manifestation of an underlying determinism. And neither exists in isolation".

(Does God play dice?-Stewart, I.)

Table of Contents

Preface	xiii
PART I CHAOS	1
Chaos K.B. Bhatnagar	3
On The Chaotic Nature of Solar Activity J. Kurths, U. Feudel and W. Jansen	13
The Chaotic Motion of the Solar System J. Laskar (abstract only)	21
Chaos and Order in the Rotational Motion Andrzej J. Maciejewski	23
On the Role of Chaos and Instability in the Evolution of Nonlinear Nonstationary Stellar Systems S.N. Nuritdinov	39
Algorithms for Controlling Chaos: Application to BVP Oscillator S. Rajeskar (abstract only)	45
On Instability Leading to Chaos in Dynamical Systems L.M. Saha	47
Vector Laypunov Functionals and Stabilities and Chaoticities of Functional Differential Equations Occurring in Celestial Mechanics and Stellar Dynamics D.R.K. Sastry	61
Chaotic Stellar Dynamics During Collective Interactions D. Subbarao and R. Uma	67
On the Measure-Preserving Mappings with Three-Dimensions Yi-Sui Sun	73

PART II ERGODIC AND STOCHASTIC MOTION	91
Ergodity of the Motions in the Dynamical Systems with Two Degrees of Freedom T.A. Agekian, A.A. Mylläri, and V.V. Orlov	93
The Stochasticity of Motions in the Triplets of Stars and Galaxies J.P. Anosova, L.G. Kiseleva, A.D. Chernin, A.V. Ivanov, and V.V. Orlov	105
Stochasticity of the Orbit of the Asteroid 1989 AC D. Benest, C. Froeschlé, and R. Gonczi	113
Stochastic Trajectories of Space Vehicles with Gravitational Manoeuvres A.V. Krivov, L.I. Sokolov, and V.B. Titov	123
Stochastic Instability in Gravitating Medium Irina K. Rozgacheva	131
Stochastic Behaviour of Planetary Orbits During the Accumulation Process 1.N. Ziglina and O. Yu. Schmidt	137
PART III STELLAR SYSTEMS AND GALAXIES	149
Stability of Self-Gravitating Finite Disks Ashok Ambastha	151
On Dynamical Non-Stationarity of the Galaxy Systems J.P. Anosova, L.G. Kiseleva, and V.V. Orlov	161
Linear Polarization in Close Binaries S.K. Parman and A. Peraiah	171
Dynamical Evolution of Stellar Clusters and Associations in the Field of Tidal Forces of the Galaxy T.S. Kozhanov	183
Formation of Large Sacle Structures in the Universe by Inverse Cascade: Cosmosynergetics V. Krishan and C. Siparam	193

Dynamical Instability of Trapezium Type Multiple Stars L.V. Mirzoyan	199
Roche Instability in Binary Stellar Systems P.M.S. Namboodiri and R.K. Kochhar	205
Roche Instability in Ejecting Stellar Systems K.S.V.S. Narasimhan and S.M. Alladin	209
The Effect of Multiplicity of Stellar Encounters and the Convergence of Collision Integral in the Stellar System Irina V. Petrovskaya	217
Statistical Studies of Orbits in Stellar Systems B.S. Sagintaev and O.V. Chumak	223
A Lie Algebra of the Symmetries of Liouville's Equation Y. Sobouti and M. H. Dehghani	233
On Gravothermal Instability of Anisotropic Self-Gravitating Gas Spheres: Singular Equilibrium Solution R. Spurzem	241
Dynamics of the Antonov-Nuritdinov Planar Galaxy Model S. Sridhar	255
PART IV TRIPLE AND MANY BODY PROBLEM	263
Dynamical Mechanisms for Transferring Comets In and Out of the Oort Cloud M.J. Valtonen and J.Q. Zheng	265
Unstable Triple Systems – Escape From Initial Configurations J.P. Anosova	271
The Libration Points and Hill Surfaces in the Restricted Problem of Three Variable-Mass Bodies A.A. Bekov	277
Encounter in the Keplerian Field: Analytical Treatment V.A. Brumberg and T.V. Ivanova (abstract only)	289

Gravitational Restricted Three-Body Problem in the Three-Dimensional Case Md. Ghulam Murtuza and Vijay Kumar and R.K. Choudhry	291
Quasi-Integrals of the Plane Restricted Three-Body Problem E.M. Nezhinskij	309
PART V GENERAL CELESTIAL MECHANICS AND STELLAR DYNAMICS	321
Hierarchy of Periodic Solutions for Hamiltonian Systems and their Applications to Celestial Mechanics Yu.V. Barkin	323
The In-Plane Motion of a Geosynchronous Satellite Under the Gravitational Attraction of the Sun, the Moon and the Oblate Earth K.B. Bhatnagar and Manjeet Kaur (abstract only)	339
New Intermediaries for the Main Problem in Satellite Theory José M. Ferrándiz and Luis Florí a	341
Long-Term Predictions for Highly Eccentric Orbits José M. Ferrándiz, M. Eugenia Sansaturio and Jesús Vigo	353
A Method of Numerical Extending of Periodical Motions of Hamiltonian Systems with Respect to Parameters S.R. Karimov and A.G. Sokolsky	365
Application of Szebehely's Inverse Problem to Non-Stationary Dynamical Systems G.T. Omarova and T.S. Kozhanov	373
Application of Non-Standard Numerical Methods to Satellite Problems M. Teresa Pérez	379
Planar Oscillation of the Satellite Near Parametric Resonance in the Elliptic Orbit Ram Binoy Singh	391
Fragility in Cosmology and Astrophysics	399

idal Force of Sun Due to Planetary Radial Alignment and Sun-Spot Cycle S.D. Verma	407
List of Participants	425
Author Index	437
Subject Index	445
