THE MOON

SYMPOSIUM No. 47

This book includes the majority of papers presented at I.A.U. Symposium No. 47 on 'The Moon', held in the School of Physics of the University of Newcastle-upon-Tyne, England. Comparison with the previous I.A.U. Symposium on the same topic held in Lenin-grad a decade earlier, underlines the great advance in our knowledge of the Moon and solar system, made possible by the development of space technology. The reader of the papers in this volume will receive a strong impression of the unique contribution which each of the sciences has made in this quest for a better understanding of our satellite and, through it, new insights into the origin of the Earth and the solar system.

The Symposium covered the following topics: lunar gravitational field; the maria; mechanical processes; Apollo 14 mission; petrological evidence for the evolution of the Moon; evolution of the uppermost regions of the Moon; physical properties; density distribution and thermal state of the Moon's interior; magnetic, electrical and thermal properties of the lunar interior; the evolution of the Moon's orbit; chemical considerations; origin of the Moon. H. C. Urey gave an open lecture on 'Origin of the Moon and the Solar System' and A. A. Mikhailov delivered an open lecture on 'Preliminary Results of Luna 16 and Lunakhod'. Throughout the Symposium panel discussions were held on the following topics: origins of mascons; differentiation of the Moon; lunar tectonics; electrical and magnetic properties of the Moon; and the origin of the Moon.

This volume is dedicated to

C. S. BEALS

B. EDLEN

CECILIA PAYNE-GAPOSCHKIN

P. SWINGS

*For their contributions to our present degree of comprehension of
Wolf-Rayet Spectra*

TABLE OF CONTENTS

PREFACE	VII
THE ORGANIZING COMMITTEES	VIII
INTRODUCTION	IX
LIST OF PARTICIPANTS	XIII
SECTION I	
CHAIRMAN: M. K. V. BAPPU	
RICHARD N. THOMAS / The Wolf-Rayet Stars – The General Problems of Extended Atmospheres and Non-Classical Atmospheric Models	3
SECTION II	
CHAIRMAN: P. CONTI	
LINDSEY F. SMITH / Classification and Distribution of WR Stars and an Interpretation of the WN Sequence	15
HUGH M. JOHNSON / UV and Radiofrequency Observations of Wolf-Rayet Stars	42
DONALD C. MORTON / Effective Temperatures of Wolf-Rayet Stars	54
SECTION III	
CHAIRMAN: B. WESTERLUND	
M. K. V. BAPPU / The Spectra of Wolf-Rayet Stars at High Dispersion	59
SECTION IV	
CHAIRMAN: D. C. MORTON	
PETER S. CONTI / O and Of Stars	95
MART DE GROOT / Some Relations Between Wolf-Rayet and P Cygni-Type Stars	108
LINDSEY F. SMITH / Nuclei of Planetary Nebulae	126
SECTION V	
CHAIRMAN: H. JOHNSON	
B. PACZYŃSKI / Evolutionary Aspects of Wolf-Rayet Stars	143

SECTION VI**CHAIRMAN: A. B. UNDERHILL**

DAVID VAN BLERKOM / Theory of Wolf-Rayet Spectra	165
---------------------------------------------------------	------------

SECTION VII**CHAIRMAN: J. SAHADE**

LEONARD V. KUHI / Wolf-Rayet Binaries and Atmospheric Stratification	205
LINDSEY F. SMITH / An Interpretation of the WC Stars	228

SECTION VIII**CHAIRMAN: R. N. THOMAS**

ANNE B. UNDERHILL / Summary of Problems and Conclusions on the Nature and Physical Structure of Wolf-Rayet Stars	237
-----------------------------------------------------------------------------------------------------------------------------	------------
