Mathematics

Books and Journals from Cambridge University Press

Cambridge is a world leading publisher in pure and applied mathematics, with an extensive programme of high quality books and journals that reaches into every corner of the subject.

Our catalogue reflects not only the breadth of mathematics but also its depth, with titles for undergraduate students, for graduate students, for researchers and for users of mathematics.

We are proud to include world class researchers and influential educators amongst our authors, and also to publish in partnership with leading mathematical societies.

688 A singular vorticity wave packet within a rapidly rotating vortex: spiralling versus oscillating motions
P. Caillol

742 A framework for input–output analysis of wall-bounded shear flows
M. Ahmadi, G. Valmorbida, D. Gayme & A. Papachristodoulou

786 Mixing and entrainment are suppressed in inclined gravity currents
M. van Reeuwijk, M. Holzner & C. P. Caulfield

S 816 Confinements regulate capillary instabilities of fluid threads
X. Chen, C. Xue & G. Hu

S 835 Relative periodic solutions in conducting liquid films flowing down vertical fibres
Z. Ding & A. P. Willis

S 856 Quasi-normal free-surface impacts, capillary rebounds and application to Faraday walkers
C. A. Galeano-Rios, P. A. Milewski & J.-M. Vanden-Broeck

889 Interaction of a downslope gravity current with an internal wave
R. Ouillon, E. Meiburg, N. T. Ouellette & J. R. Koseff

914 The secondary instabilities of stationary cross-flow vortices in a Mach 6 swept wing flow
G. Xu, J. Chen, G. Liu, S. Dong & S. Fu

S 942 Ice scallops: a laboratory investigation of the ice–water interface
M. Bushuk, D. M. Holland, T. P. Stanton, A. Stern & C. Gray

977 Wall-bounded flow over a realistically rough superhydrophobic surface
K. Alamé & K. Mahesh

1020 Turbulent windprint on a liquid surface
S. Perrard, A. Lozano-Durán, M. Rabaud, M. Benzaquen & F. Moisy

S 1055 Convective heat transfer along ratchet surfaces in vertical natural convection
H. Jiang, X. Zhu, V. Mathai, X. Yang, R. Verzicco, D. Lohse & C. Sun

1072 Control of oblique-type breakdown in a supersonic boundary layer employing streaks
S. Sharma, M. S. Shadloo, A. Hadjadj & M. J. Kloker

1090 Onset of fully compressible convection in a rapidly rotating spherical shell
S. Liu, Z.-H. Wan, R. Yan, C. Sun & D.-J. Sun

1116 Wavelet-based adaptive delayed detached eddy simulations for wall-bounded compressible turbulent flows
X. Ge, O. V. Vasilyev & M. Y. Hussaini

1158 Field measurement of nonlinear changes to large gravity wave groups
T. Tang, P. S. Tromans & T. A. A. Adcock

1179 Linear interaction of two-dimensional free-stream disturbances with an oblique shock wave
Z. Huang & H. Wang

1206 ADDENDUM

1207 CORRIGENDUM

ISSN 0022-1120

Journal of Fluid Mechanics

25 August 2019

1 Internal solitary waves with subsurface cores
Y. He, K. G. Lamb & R.-C. Lien

18 The role of soluble surfactants in the linear stability of two-layer flow in a channel
A. Kalogirou & M. G. Blyth

49 Influence of pitch rate on freely translating perching airfoils
T. Jardin & N. Doué

72 Marangoni circulation by UV light modulation on sessile drop for particle agglomeration
T. Li, A. Kar & R. Kumar

89 Coherent large-scale structures from the linearized Navier–Stokes equations
A. Madhusudanan, S. J. Illingworth & I. Marusic

110 Slipping moving contact lines: critical roles of de Gennes's 'foot' in dynamic wetting
H.-H. Wei, H.-K. Tsao & K.-C. Chu

151 Wake structure of laminar flow past a sphere under the influence of a transverse magnetic field
J.-H. Pan, N.-M. Zhang & M.-J. Ni

174 Wall-modelled large-eddy simulation of turbulent flow past airfoils
W. Gao, W. Zhang, W. Cheng & R. Samtaney

211 Large-scale streaky structures in turbulent jets
P. A. S. Nogueira, A. V. G. Cavalieri, P. Jordan & V. Jaunet

238 Focusing deep-water surface gravity wave packets: wave breaking criterion in a simplified model
N. Pizzo & W. Kendall Melville

260 Direct numerical simulations of Taylor–Couette turbulence: the effects of sand grain roughness
P. Berghout, X. Zhu, D. Chung, R. Verzicco, R. J. A. M. Stevens & D. Lohse

S 287 Interaction of coherent flow structures in adverse pressure gradient turbulent boundary layers
M. Bross, T. Fuchs & C. J. Kähler

S 322 Bubble and conical forms of vortex breakdown in swirling jets
P. Moise & J. Mathew

358 Viscoelastic liquid curtains: experimental results on the flow of a falling sheet of polymer solution
A. Gaillard, M. Roché, S. Lerouge, C. Gay, L. Lebon & L. Limat

410 Turbulent flow of finite-size spherical particles in channels with viscous hyper-elastic walls
M. N. Ardekani, M. E. Rosti & L. Brandt

441 Convection regimes induced by local boundary heating in a liquid–gas system
V. B. Bekezhanova & A. S. Ovcharova

459 Kinetic energy spectra and flux in turbulent phase-separating symmetric binary-fluid mixtures
P. Perlekar

475 The effect of wall-normal gravity on particle-laden near-wall turbulence
J. Lee & C. Lee

S 508 Observation of surface wave patterns modified by sub-surface shear currents
B. K. Smeltzer, E. Æsøy & S. Å. Ellingsen

S 531 Rotational stabilisation of the Rayleigh–Taylor instability at the inner surface of an imploding liquid shell
J. Huneault, D. Plant & A. J. Higgins

568 Structure and stability of shock waves in granular gases
N. Sirmas & M. I. Radulescu

608 Characteristics of turbulence in a face-centred cubic porous unit cell
X. He, S. V. Apte, J. R. Finn & B. D. Wood

646 Numerical solutions of compressible convection with an infinite Prandtl number: comparison of the anelastic and anelastic liquid models with the exact equations
J. Curbelo, L. Duarte, T. Alboussière, F. Dubuffet, S. Labrosse & Y. Ricard
