Editorial

I make no apologies for the fact that the EUROCALL Conference, held in Helsinki last August, dominates this issue of *ReCALL*. Much of the material presented there was highly relevant to the use of computers in language teaching in the UK higher education sector, and for this reason I was very pleased when the organisers of EUROCALL '91 allowed us to select papers, with the permission of their authors, for reprinting in *ReCALL*.

The CTI Centre for Modern Languages has been involved in various conferences during the summer, and we have also visited a number of university and polytechnic Modern Languages departments to demonstrate and give information about software. Indeed, we are already making bookings for Spring 1992.

Donations of new software have been very encouraging recently, as have offers of reviews and user reports. Some of those submitted have had to be deferred until the May issue of *ReCALL*, but I hope this will not deter others from writing reviews: we may even consider a special Software Reviews issue.

In the near future we hope to collate and analyse the results of the 'Which Software' questionnaire which formed part of *ReCALL\NewsSheet 6*. Please complete and return these if you have not already done so. Extra copies are enclosed with this issue of *ReCALL*.

Overseas readers will receive with this issue a letter giving details of our Overseas Subscription rates. Until recently we have supplied *ReCALL* and the *NewsSheets* free of charge, even though our funding covers the UK university sector only. However, we must now try to offset the extra printing and postage costs, and I hope those overseas readers who are currently on the mailing list will feel it worthwhile to continue.

The good news is that the Universities Funding Council has voted to continue funding the CTI Centres until July 1993, so we look forward to maintaining and developing our activities.

June Thompson

WORKSHOP

at the University of Hull

10 January 1992

LANGUAGE TECHNOLOGY FOR BUSINESS

Course Objectives:

- Examine language learning software aimed at business
- See how this can be applied to the classroom
- Gain hands-on experience of the software for yourself
- View software for teaching languages for specific purposes
- Identify the hardware required
- Discuss the issues

Who should attend?

Anyone responsible for language teaching related to business in further or higher education. The course will benefit those involved in policy and decision-making as well as those who teach.

Duration: 1 day (10.00 - 16.30)

Cost: £75 per person including lunch and information pack.

You may be able to obtain financial support from your staff training and development fund.

For full registration details and further information, please contact:
