THE BRITISH JOURNAL OF PSYCHIATRY

November 1986

Vol 149

MEDICAL INFOR. CT. NOV 26 1986

ISSN 0007-1250

Published by authority of
The Royal College of Psychiatrists

NOTICE TO CONTRIBUTORS

1. *The British Journal of Psychiatry* is published monthly under the auspices of the Royal College of Psychiatrists. The *Journal* publishes original work in all fields of psychiatry. Communications on general editorial matters, including manuscripts for publication, printed matter, and books for review, should be sent to *The Editor, The British Journal of Psychiatry, 17 Belgrave Square, London SW1X 8PG.*

2. Contributions are accepted for publication on the condition that their substance has not been published or submitted for publication elsewhere. The *Journal* does not hold itself responsible for statements made by contributors. Unless so stated, material in the *Journal* does not necessarily reflect the views of the Editor or the Royal College of Psychiatrists.

3. Published articles become the property of the *Journal* and can be published elsewhere, in full or in part, only with the Editor's written permission.

4. Manuscripts accepted for publication are subject to copy-editing, and to editorial changes required for conformity with *Journal* style.

5. We regret that papers unsuitable for publication will not be returned.

6. **General advice to authors** In the assessment of manuscripts submitted to the *Journal*, great importance is attached to clarity and brevity of expression. Authors should read *General Notes on the Preparation of Scientific Papers* (3rd ed. 1974, £0.45, from The Royal Society) and/or Judith Butcher's *Typescripts, Proofs and Indexes* (1980, Cambridge University Press, £2.95). Spelling should follow the *Concise Oxford Dictionary*.

The standard of statistical work in papers submitted for publication has proved to be very variable. Authors using any statistical methods at all are strongly advised to study the paper 'Statistical guidelines for contributors to medical journals' (D. G. Altman *et al.*, *British Medical Journal*, 7 May 1983, **286**, 1489–1493) at the earliest possible stage in preparing their work for publication.

7. **Manuscripts** Two high-quality copies should be submitted and the author should retain a copy. Articles must be typed on one side of the paper only, **double spaced with wide margins**, and all the pages must be numbered sequentially, starting with the title page.

a. The **title** should be brief and to the point. If necessary, a sub-title may be used to amplify the main title. The names of the authors should appear on the title-page, and **their names, degrees, affiliations and full addresses at the end of the paper.**

b. A **summary** should be given at the *beginning* of the article. It should be brief and factual and not normally more than 150 words.

c. **References** should be listed **alphabetically** at the end of the paper, **the titles of journals being given in full.** Authors should follow *Journal* style for the reference list and study the examples given below. Titles of books and journals are printed in italic and should therefore be underlined on the typescript. Reference lists not in *Journal* style will be returned to the author for correction.

Authors should check that the text references and the reference list are in complete agreement as regards dates and spelling of names. The text reference should be in the form '(Smith, 1971)' or 'Smith (1971) showed that ...'

DURKHEIM, E. (1897) *Le Suicide*. Paris. Translated (1952) as *Suicide: A Study in Sociology*, by J. A. Spaulding & C. Simpson. London: Routledge & Kegan Paul.

KENDELL, R. E. (1974) The stability of psychiatric diagnoses. *British Journal of Psychiatry*, **124**, 352–358.

RUTTER, M., TIZARD, J. & WHITMORE, K. (1970) *Education, Health and Behaviour*. London: Longman.

SCOTT, P. D. (1974) Definition, classification, prognosis and treatment. In *Pathology and Treatment of Sexual Deviation* (ed. I. Rosen) Oxford: Oxford University Press.

'Personal Communications' need written authorisation.

d. **Symbols and abbreviations** Follow *Units, Symbols and Abbreviations: A Guide for Biological and Medical Editors and Authors* (3rd ed. 1977), £2.00, available from the Publications Office of the Royal Society of Medicine. Terms or abbreviations which might not be understood by the average reader should be explained at first occurrence.

e. **Tables and Figures** Each table should be on a separate sheet, with an adequate heading; table and heading should be self-explanatory without reference to the text. The desired position of the table relative to the text should be indicated in the left margin.

Figures should be individual glossy photographs, or other camera-ready prints, *not* photocopies, clearly numbered and captioned below. Avoid cluttering figures with explanatory text which is better incorporated succinctly in the caption. A figure intended to occupy a single column should be drawn (or photographed) 80–110 mm wide to allow for a 2/3 reduction; a figure requiring the whole width of the page should be 180–210 mm wide. Lettering (film-set or stencil) should be 12pt sans (initial capital for the first word only) to give 8pt on the printed page. Labels on graphs should read parallel to the axes. Units must be clearly indicated and should be in brackets (*note*—'litre' should be spelled out in full unless modified to ml, dl, etc.).

f. **Photographs** Prints must be taken directly from the original b/w negative (not, for example, from a colour slide or a printed page) and should be glossy and sharply focussed. Labels, arrows, etc. should be shown on a duplicate print or overlay. Do not write anything on photographic prints, and do not use staples or paper-clips on them. These procedures apart, all the comments on figures and tables apply equally to photographs.

8. **Proofs** A proof will be sent to the senior author of an article. Reprints, which are prepared at the same time as the *Journal*, should be ordered when the proof is returned to the Editor.

9. **Letters to the Editor** Letters should not exceed two double-spaced typed pages. They will be edited for clarity and conformity with *Journal* style and may be shortened. There should be no more than five references; tables and figures cannot be used.

British Columbia

DEPARTMENT OF
PSYCHIATRY
HEAD OF DIVISION
OF CHILD
PSYCHIATRY

Applications are invited for the position of Head of the Division of Child Psychiatry. The Division consists of 4 full-time and 14 part-time faculty, who work and teach at three sites: Vancouver General Hospital (outpatients and a 10-bed adolescent unit); B.C.'s Children's Hospital (out-patients, liaison service and a 10-bed unit for children) and the Health Sciences Centre Psychiatric Unit (child and family outpatients). The Division has places for residents to do their mandatory six months of child psychiatry, or two years to specialize in child psychiatry. The Division is also responsible for undergraduate medical student instruction.

The new Head would be responsible for planning new services, coordinating the teaching program and promoting research. As the Division is on the point of new development this would be an exciting and rewarding post for an energetic administrator/clinician/teacher/researcher. Appointment to this position would be at the Professor or Associate Professor level and is subject to final budgetary approval. Applicants should be eligible for medical licensure in British Columbia. Salary and rank will be in accordance with existing academic scales for The University of British Columbia.

In accordance with Canadian immigration requirements, priority will be given to Canadian citizens and permanent residents of Canada.

Applications, including c.v., and names and addresses of three referees should be sent to: **James E. Miles, M.D., F.R.C.P.(C), Professor and Head, Department of Psychiatry, The University of British Columbia Health Sciences Centre Hospital, 2211 Wesbrook Mall, Vancouver, B.C. V6T 2B5.**

VISITING PSYCHIATRIST
HM PRISON, BRIXTON, LONDON SW2 5XF

The Prison Medical Service is responsible for the health, mental and physical, of all inmates in Prison Service establishments. The medical staff work in collaboration with visiting specialists. An opportunity exists for a visiting psychiatrist to make an important contribution to the medical services at HM Prison Brixton, which is a local prison presently accommodating 997 adult males.

Applications are invited from fully registered medical practitioners of consultant status. The requirement is for two or three sessions a week at present. The work involves mainly the psychiatric assessment of inmates referred by the Medical Officer and advising on treatment.

Applicants should live within reasonable travelling distance of the prison.

The fee payable per session (of between 2½ and 3½ hours) is £61.50. Certain travelling expenses are payable in addition.

Further information can be obtained from the Principal Medical Officer, HM Prison Brixton, telephone 01 674 9811.

Requests for a form of application, which should be completed and returned within 21 days of this announcement appearing, should be addressed to:

Recruitment Section, Room 402—IR, Home Office,
Cleland House, Page Street, LONDON
SW1P 4LN

The Home Office is an equal opportunities employer.

When there seems to be no way out.

Ticehurst House was established as a psychiatric clinic more than 200 years ago. Today it retains its position at the forefront of psychiatric care.

The reputation of Ticehurst House stems from the comprehensive service it offers to patients and to the medical and psychiatric professions.

The psychiatric team at Ticehurst House offers a full spectrum of treatments in the care of short and long term patients and specialises in the active care of short term patients, the treatment of alcoholics and the assessment and treatment of psychogeriatric patients.

The hospital responds promptly to requests for out-patient consultation and admission of patients. There are excellent liaison procedures between Ticehurst House and outside Consultants and G.P's.

The special facilities at Ticehurst House include a psychogeriatric assessment unit, the Newington Alcohol Treatment Unit and facilities for day care patients.

Within the grounds of the hospital Highlands Lodge offers high quality accommodation for low dependency patients under the care of Consultants and experienced nursing staff.

Ticehurst House enjoys an excellent reputation for its cuisine. Bedrooms are spacious and equipped with nurse-call systems.

It is easily accessible by both road and rail, being close to Wadhurst in Sussex (70 minutes from Charing Cross), and stands in forty-eight acres of delightful gardens and grounds.

For further information write or telephone The Medical Director, Ticehurst House, Ticehurst, Near Wadhurst, Sussex TN5 7HU. Telephone (0580) 200391.

NEW Videotapes from TAVISTOCK

Seminars in Behavioural Psychotherapy

Presented by **DAVID GOLDBERG**

A set of two tapes illustrating the work of three behavioural psychotherapists, John Cobb, Shirley Mercer, and Nagy Bishay. Between them they provide a set of four suggested teaching seminars. They include role-plays with commentaries, discussion points, and exercises which have been successfully used in the Department of Psychiatry and which can be easily adapted by course teachers for group or individual viewing.

Part I and Part II 40-60 minutes colour notes
VHS Part I £85.00 + £12.75 VAT = £97.75
Part II £85.00 + £12.75 VAT = £97.75
Parts I and II £145.00 + £21.75 VAT = £166.75

Problem based interviewing in General Practice

Presented by **ART LESSER**

This tape was made at Manchester by the Canadian psychiatrist Art Lesser to illustrate his work in teaching interviewing skills to trainee general practitioners. The aim is to help students identify and treat underlying problems which cause patients to come to their surgeries and which may be masked by an apparently straightforward complaint. He suggests how to look for verbal and visual clues and presents a model for problem sensing, detection, description, assessment, treatment, and evaluation.

55 minutes colour notes
VHS £85.00
+ £12.75 VAT = £97.75
