

Copying. This journal is registered with the Copyright Clearance Center, 27 Congress Street, Salem, Mass. 01970. Organizations in the USA who are also registered with C.C.C. may therefore copy material (beyond the limits permitted by sections 107 and 108 of the US copyright law) subject to payment to C.C.C. of the per-copy fee of \$5.00. This consent does not extend to multiple copying for promotional or commercial purposes. Code 0007-1145/93 \$5.00 + .00. Organizations authorized by the Copyright Licensing Agency may also copy material subject to the usual conditions.

ISI Tear Sheet Service, 3501 Market Street, Philadelphia, Pennsylvania 19104, USA, is authorized to supply single copies of separate articles for private use only.

For all other use, permission should be sought from Cambridge or the American Branch of Cambridge University Press.

The Proceedings of the Nutrition Society, published by the Cambridge University Press, in part record meetings of the Symposium type, at which experts in a particular field are invited by Council to make contributions on specific parts of it and at which general discussion follows these invited contributions. The contributions will be published *in extenso*; such summaries of the ensuing discussions as circumstances warrant may also be published. The Society also holds scientific meetings at which papers are communicated by members and others on original work carried out by them. It is proposed at present to publish summaries of the papers read at each meeting, each communication being recorded in the Society's *Proceedings* by means of an abstract not exceeding in length 400 words or the equivalent space in print. The *Proceedings* are published three times a year.

The subscription to the *Proceedings* is £109.00 net (US \$217.00 in USA, Canada and Mexico). Single issues are £38.00 (US \$74.00 in the USA, Canada and Mexico) each; postage extra.

CONTENTS

Editorial

The Editors' Dilemma. *D. A. T. Southgate* 615-616

Diet Selection in Sheep

Diet selection in sheep: the ability of growing lambs to select a diet that meets their crude protein (nitrogen x 6.25) requirements. *I. Kyriazakis and J. D. Oldham* 617-629

Estimation of Human Body Composition

New and simple equations to estimate the energy and fat contents and energy density of humans in sickness and health. *John F. Sutcliffe, Grant S. Knight, Jaime C. Pinilla & Graham L. Hill* 631-644

Estimation of body composition from bioelectrical impedance of body segments: comparison with dual-energy X-ray absorptiometry. *S. P. Stewart, P. N. Bramley, R. Heighton, J. H. Green, A. Horsman, M. S. Losowsky & M. A. Smith* 645-655

Comparison of body composition assessments by bioelectrical impedance and by anthropometry in premenopausal Chinese women. *Frouwkje G. de Waart, Ruowei Li & Paul Deurenberg* 657-664

Nutritional assessment and adequacy of dietary intake in hospitalized patients with alcoholic liver cirrhosis. *Klaus Nielsen, Jens Kondrup, Lars Martinsen, Birgitte Stilling & Berit Wikman* 665-679

Protein and Energy Interactions in Chicks

Effect of dietary protein and energy intakes on whole-body protein turnover and its contribution to heat production in chicks. *K. Kita, T. Muramatsu & J. Okumura* 681-688

Protein Intake and Growth in Fish

Metabolic effects on growth and muscle of soya-bean protein feeding in cod (*Gadus morhua*). *A. von der Decken and E. Lied* 689-697

Effects of Rumenal Infusions on Food Intake

Responses in the voluntary intake of hay or silage by lactating cows to intraruminal infusions of sodium acetate or sodium propionate, the tonicity of rumen fluid or rumen distension. *M. H. Anil, J. N. Mbanya, H. W. Symonds & J. M. Forbes* 699-712

The voluntary intake of hay and silage by lactating cows in response to ruminal infusion of acetate or propionate, or both, with or without distension of the rumen by a balloon. *J. N. Mbanya, M. H. Anil & J. M. Forbes* 713-720

Rumenal Metabolism of Purines

Rumen digestion and urinary excretion of purine derivatives in response to urea supplementation of sodium-treated straw fed to sheep. *J. Balcells, J. A. Guada, C. Castrillo & J. Gasa* 721-732

Nitrogen Metabolism

Intestinal and hepatic nitrogen balance in the rat after the administration of an oral protein load. *José Antonio Fernández-López, Javier Casado, Montserrat Esteve, Immaculada Rafecas, Josep Maria Argilés, Xavier Remesar & Marià Alemany* 733-742

Measurement of 3-methylhistidine production in lambs by using compartmental-kinetic analysis. *J. A. Rathmacher, G. Link & S. Nissen* 743-755
