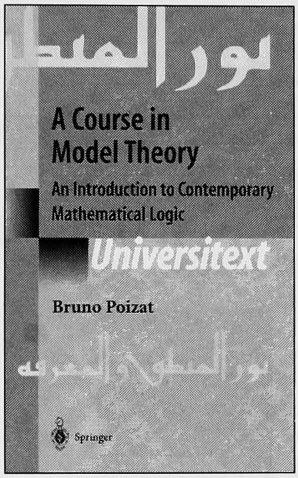
NEW FROM SPRINGER

"Unlike usual introductions to logic that begin with tedious formulations of first-order languages, Poizat cuts right to the chase by commencing with the back-and-forth approach to hierarchies of local isomorphisms between relational structures. By thus showing model theory in a mathematical, rather than metamathematical, light, he aims at a wide audience. A unique book, highly recommended. Upper-division undergraduates and up." — CHOICE



B. Poizat, Université Claude Bernard Lyon I, Villeurbanne Cedex, France

A Course in Model Theory

An Introduction to Contemporary Mathematical Logic

This book, translated from the French, is an introduction to first order model theory. The first six chapters are very basic: starting from scratch, they quickly reach the essential, namely, the back-and-forth method and compactness, which are illustrated with examples taken from algebra. The next chapter introduces logic via the study of the models of arithmetic, and the following chapter is a combinatorial toolbox preparing for the chapters on saturated and prime models. The last ten chapters form a rather complete, but nevertheless accessible, exposition of stability theory, which is the core of the subject.

CONTENTS: Preface to the English Edition • Introduction • Elementary Classes of Relations • The Language Associated with a Relation • Extensions of the Language: Structures • Compactness • The Back-and-Forth Method in ω-Saturated Models • Examples Illustrating the Back-and-Forth Method • Arithmetic • Ordinals and Cardinals - Saturated Models • Prime Models • Heirs • Special Sons, Morley Sequences • The Fundamental Order • Stability and Saturated Models • Forking • Strong Types • Notions of Rank • Stability and Prime Models • Stability, Indiscernible Sequences and Weights • Dimension in Models of a Totally Transcendental Theory • Bibliography • Index of Notation • Index

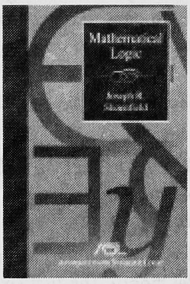
ASL titles now available from A K Peters, Ltd.



A Classic Reissued

Mathematical Logic
Joseph R. Shoenfield
2001; Paperback; 356 pp.; $35.00
ASL member price: $28.00

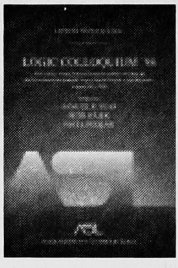
From the Lecture Notes in Logic Series

Recently Reprinted

Recursion Theory
Lecture Notes in Logic, 1
Joseph R. Shoenfield
2001; Paperback; 96 pp.; $25.00
ASL member price: $20.00

Logic Colloquium '90
Lecture Notes in Logic, 2
Juha Oikkonen and
Jouko Väänänen, editors
Helsinki, July 15-22, 1990
2001; Paperback; 320 pp.; $50.00
ASL member price: $40.00

Gödel '96:
Logical Foundations of Mathematics, Computer Science and Physics—Kurt Gödel's Legacy
Lecture Notes in Logic, 6
Petr Hájek, editor
2001; Paperback; 336 pp.; $50.00
ASL member price: $40.00



Logic Colloquium '98
Lecture Notes in Logic, 13
Sam Buss, Petr Hájek, and
Pavel Pudlák, editors
Prague, August 9-15, 1998
2000, Hardcover; 560 pp.; $85.00
ASL member price: $68.00
2000; Paperback; 560 pp.; $40.00
ASL member price: $32.00

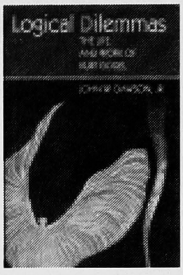
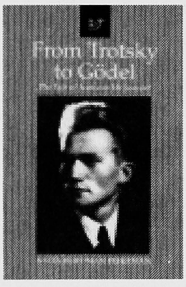
20% discount for ASL members on all A K Peters books, including



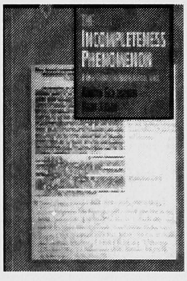
Logical Dilemmas:
The Life and Work of Kurt Gödel
John Dawson
Hardcover; 376 pp.; $49.95
ASL member price: $40.00

"Dawson's account of Gödel's life and work is a masterpiece."—*Nature*



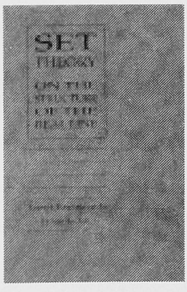
From Trotsky to Gödel:
The Life of Jean van Heijenoort
(previously published as Politics, Logic, and Love)
Anita Burdman Feferman
Paperbak; 432 pp.; $24.95
ASL member price: $20.00

"[A] moving, original book."—*The New Yorker*



The Incompleteness Phenomenon
Martin Goldstern, Haim Judah
Paperback; 264 pp.; $39.00
ASL member price: $30.00

"...This is an excellent source for a rigorous survey of the basic items of mathematical logic."—*Mathematical Reviews*



Set Theory:
On the Structure of the Real Line
Tomek Bartoszynski, Haim Judah
Hardcover; 560 pp.; $78.00
ASL member price: $62.00

"This book will be a most valuable guide to the present state of the art...."
—*Bulletin of the London Mathematical Society*

The BULLETIN and the JOURNAL are the official organs of the Association for Symbolic Logic, an international organization for furthering research in symbolic logic and the exchange of ideas among mathematicians, philosophers, computer scientists, linguists, and others interested in this field. The BULLETIN invites submission of *Articles* and *Communications* and publishes reviews of publications in logic.

Articles should be expository or survey papers of broad interest that are accessible to a wide audience of logicians. They may deal with any areas of logic including mathematical or philosophical logic, logic in computer science or linguistics, the history or philosophy of logic, and applications of logic to other fields.

Communications should be announcements of important new results and ideas in any aspect of logic; they may be short papers in their final form or preliminary announcements (extended abstracts, position papers) of longer, full papers that will be published elsewhere. In any case, they should include, in addition to a description of the new results or ideas, enough history, background, and explanation to make the significance of the work apparent to a wide audience. *Communications* will be quickly refereed and published within six months of the submission of final versions.

Articles should be submitted to ***Andreas R. Blass, Department of Mathematics, University of Michigan, Ann Arbor, MI 48109, USA*** (ablass@umich.edu). *Communications* may be submitted to any of the other editors: ***John P. Burgess, Department of Philosophy, Princeton University, Princeton, NJ 08544, USA*** (jburgess@pucc.princeton.edu); or ***Matthew Foreman, Department of Mathematics, University of California, Irvine, CA 92697, USA*** (mforeman@math.uci.edu); or ***H. Dugald Macpherson, Department of Pure Mathematics, University of Leeds, Leeds LS2 9JT, England*** (pmthdm@amsta.leeds.ac.uk); or ***Philip J. Scott, Department of Mathematics, University of Ottawa, 585 King Edward, Ottawa, Ontario, Canada K1N 6N5*** (phil@csi.uottawa.ca); or ***Richard A. Shore*** (Managing Editor), ***Department of Mathematics, Malott Hall, Cornell University, Ithaca, NY 14853, USA*** (shore@math.cornell.edu).

Books for review in the BULLETIN should be sent to ***Herbert B. Enderton, Association for Symbolic Logic, UCLA, Los Angeles, CA 90095-1555, USA.*** The other editors of reviews are ***Gerhard Jäger*** (jaeger@iam.unibe.ch), ***Penelope Maddy*** (pjmaddy@uci.edu) and ***Philip Scowcroft*** (pscowcroft@wesleyan.edu).

Submitted manuscripts should be typewritten with wide margins and with double spacing between the lines, or prepared with a word processor, such as LaTeX or Microsoft Word. Two copies of the manuscript should be sent to the editor, and the author should also keep a complete copy and the electronic file from which the submitted copy was prepared, if a word processor was used. After the paper is accepted in its final form, an electronic copy will be appreciated and will advance the final publication date of the paper, especially if it is in LaTeX or $\mathcal{A}\mathcal{M}\mathcal{S}$-LaTeX. The JOURNAL and the BULLETIN OF SYMBOLIC LOGIC are typeset in a version of $\mathcal{A}\mathcal{M}\mathcal{S}$-LaTeX, using a stylefile which is posted on the ASL Website, http://www.aslonline.org, along with instructions for its use. Fifty offprints of each article are supplied at no charge, and additional offprints may be purchased if desired.

Postscript files of articles published in the BULLETIN may be downloaded using a Web browser from http://www.math.ucla.edu/~asl/bsltoc.htm.

Individual membership in the Association is open to anyone interested in its work. Annual dues for members are $60 ($30 for students). Dues include subscriptions to the current volumes of the JOURNAL and the BULLETIN. Institutional membership in the Association is available to any academic institution or department. Annual institutional dues are $525 for 2000. Membership privileges include choices of current subscriptions, back volumes, and student memberships.

Requests for information, applications for membership, orders for back volumes, business correspondence, and notices and announcements for publication in the BULLETIN should be sent to the Secretary-Treasurer of the Association, ***C. Ward Henson, ASL, Department of Mathematics, University of Illinois, 1409 W. Green Street, Urbana, IL 61801, USA.*** The electronic mail address of the Association's business office is asl@math.uiuc.edu.

Notices of change of address, dues payments, and subscription orders to the JOURNAL and BULLETIN should be sent to the ***Association for Symbolic Logic, Journals Division UIP, 1325 South Oak Street, Champaign, IL 61820-6903, USA.*** All orders must be accompanied by payment in US dollars; Visa and MasterCard charges are accepted.
