ISSN 0004-9727

INFORMATION FOR AUTHORS

The BULLETIN of the Australian Mathematical Society aims at quick publication of original research in all branches of mathematics. To ensure speedy publication, only articles which are sufficiently well presented as not to require revision and which are judged by the Editor (often in consultation with an Associate Editor) to be competitive are refereed. This policy is in the interests of authors, as a quick rejection is better than a slow rejection, as the Editors receive more than three times the material that can be published in the BULLETIN; many meritorious papers can, therefore, not be accepted. Editorial decisions on acceptance or otherwise are taken quickly, normally within a month of receipt of the paper. Papers are accepted only after peer review.

Manuscripts are accepted for review with the understanding that the same work is not concurrently submitted elsewhere. As even minor revisions are generally not permitted, authors should read carefully all the details listed below. For a paper to be acceptable for publication, not only should it contain new and interesting results but also

- (i) the exposition should be clear and attractive;
- (ii) the manuscript should be in publishable form, without revision.

Further information regarding these requirements may be found from The London Mathematical Society and The American Mathematical Society. Authors are asked to avoid, as far as possible, the use of mathematical symbols in the title.

Authors should submit three clean, high quality copies to

The Editorial Office, Bulletin of the Australian Mathematical Society,
Department of Mathematics, The University of Queensland,
Queensland 4072, Australia.

Unless requested at the time, material submitted to the BULLETIN will usually not be returned.

EDITORIAL POLICY

1. References. Arrange references alphabetically (by surname of the first author) and cite them numerically in the text. Ensure the accuracy of the references: authors' names should appear as in the work quoted. Include in the list of references only those works cited, and avoid citing works which are "in preparation" or "submitted". Where the work cited is not readily accessible (for example, a preprint) a photocopy of the title page and relevant sections of the copy that you have used should be included with your submission.

2. Abstracts.

1. Each paper must include an abstract of not more than 200 words, which should contain a brief but informative summary of the contents of the paper, but no inessential details.
2. The abstract should be self-contained, but may refer to the title.
3. Specific references (by number) to a section, proposition, equation or bibliographical item should be avoided.

3. Subject Classification. Authors should include in their papers one or more classification numbers, following the 2000 Mathematics Subject Classification. Details of this scheme can be found in each Annual Index of Mathematical Reviews or on the web at <http://www.ams.org/msc>.

4. Abstracts of Ph.D. Theses. The Bulletin endeavours to publish abstracts of all accepted Australasian Ph.D. theses in mathematics. One restriction, however, is that the abstract must be received by the Editor within 6 months of the degree being approved.

5. Electronic Manuscripts. The BULLETIN is produced using AMS-TeX . Authors who are able to do so are invited to prepare their manuscripts using TeX (we accept Plain TeX , AMS-TeX or $\text{L}^{\text{A}}\text{TeX}$) and submit text on an IBM PC compatible diskette or via e-mail to ams@maths.uq.edu.au. [Typed manuscripts are, of course,

Contents

TERESA ÁLVAREZ AND DIANE WILCOX, Perturbation theory of multivalued Atkinson operators in normed spaces	195
S.C. ARORA, GOPAL DATT AND SATISH VERMA, Composition operators on Lorentz spaces	205
NICOLAS BILLEREY, Équations de Fermat de type $(5, 5, p)$	161
A. CARBONARO AND G. MAUCERI, A note on bounded variation and heat semigroup on Riemannian manifolds	155
D. CATALANO FERRAIOLI, G. MANNO AND F. PUGLIESE, Generalised symmetries of partial differential equations via complex transformations	243
JIANLONG CHEN <i>see</i> ZHENG LEI	
YI-XIN CHEN, MARK D. GOULD AND YAO-ZHONG ZHANG, Finite matrix model of quantum hall fluids on S^2	111
CATHERINE CHOQUET, Semi-classical solutions for a nonlinear coupled elliptic-parabolic problem	369
JOHN CLARK AND DINH VAN HUYNH, Simple rings with injectivity conditions on one-sided ideals	315
ANDRZEJ DĄBROWSKI, On the integers represented by $x^4 - y^4$	133
GOPAL DATT <i>see</i> S.C. ARORA	
DIMOSTHENIS DRIVALIARIS AND NIKOS YANNAKAKIS, Surjectivity of linear operators from a Banach space into itself	143
ARTŪRAS DUBICKAS, On the powers of some transcendental numbers	433
ZHENBIN FAN AND GANG LI, Existence results for semilinear differential inclusions	227
HALINA FRANCE-JACKSON, On generalised prime essential rings and special and nonspecial radicals	263
MAREK GALEWSKI AND MAREK PŁOCIENNICZAK, On existence and stability of solutions to elliptic systems with generalised growth	453
JING GAO AND YAO-LIN JIANG, A periodic wavelet method for the second kind of the logarithmic integral equation	321
DAVID G. GLYNN, A note on N_K configurations and theorems in projective space	15
A. GOGATISHVILI, M. JOHANSSON, C.A. OKPOTI AND L.-E. PERSSON, Characterisation of embeddings in Lorentz spaces	69
MARK D. GOULD <i>see</i> YI-XIN CHEN	
VICTORIA GOULD, A rank for right congruences on inverse semigroups	55
BING HE AND YONGJIN LI, On inequalities of Hilbert's type	1
MIN-CHUN HONG, Partial regularity of stable p -harmonic maps into spheres	297
JU-ZHOU HU <i>see</i> QING-JIE HU	
QING-JIE HU AND JU-ZHOU HU, A sequential quadratic programming algorithm for nonlinear minimax problems	353
JIZHENG HUANG AND HEPING LIU, An analogue of Beurling's theorem for the Heisenberg group	471
NAN-JING HUANG <i>see</i> XUE-SONG LI	
DINH VAN HUYNH <i>see</i> JOHN CLARK	
M.T. IGLESIAS, V.S. PEÑARANDA, C. VIDAL AND A. VERSCHOREN, The 2-epistasis of fitness functions	397
JIASHANG JIANG <i>see</i> SIZHONG ZHOU	
YAO-LIN JIANG <i>see</i> JING GAO	
M. JOHANSSON <i>see</i> A. GOGATISHVILI	
SUNG-EUN KOH, An analytic extension of a spacelike maximal surface	43
PETER KRITZER AND FRIEDRICH PILLISCHHAMMER, Constructions of general polynomial lattices for multivariate integration	93

ZHEN LEI, JIANLONG CHEN AND ZHILING YING, A question on McCoy rings	137
GANG LI <i>see</i> ZHENBIN FAN	
XUE-SONG LI AND NAN-JING HUANG, Strong convergence theorems for fixed points of pseudo-contractive semigroup	441
YONGJIN LI <i>see</i> BING HE	
HEPING LIU <i>see</i> JIZHENG HUANG
