

PSYCHOLOGICAL APPLICATIONS IN PSYCHIATRY

Edited by **Brendan P. Bradley, & Chris Thompson**

This edited volume is a review of psychological processes and research, relevant to psychiatric practice with a cognitive and behavioural orientation which reflects current trends in clinical psychology. The contributors, all psychologists, have each written about the psychology of an area which roughly corresponds to a psychiatric condition or problem area — thus the psychology which is most appropriate to psychiatric practice has been brought to the forefront.

ANTIDEPRESSANTS AND RECEPTOR FUNCTION CIBA FOUNDATION SYMPOSIUM 123

Chairman: **D.L. Murphy**, *National Institute of Mental Health, Bethesda, USA*

Depression is a common form of psychiatric disorder which can, in severe cases, be seriously debilitating. A number of drugs have been identified which reduce the symptoms of clinical depression, and it is obviously important to discover why these antidepressant drugs are effective. This symposium brings together an international group of experts in various fields to discuss the mechanism of action of antidepressants. Topics include the interactions between antidepressants and various receptor sites inside and outside the brain, animal models for the study of depression, and possible similarities between the action of antidepressants and electroconvulsive therapy (ECT).

THE PSYCHOSOMATIC APPROACH: Contemporary Practice of Whole Person Care

Edited by **Margaret J. Christie & Peter G. Mellett**

There is currently a growing concern with approaches to whole-person care — this volume offers an overview of several significant developments with a form of presentation which facilitates communication and understanding at the interface of psychology and medicine. The authors have the ability to communicate across disciplinary boundaries and their chapters reflect contemporary practice of holistic care in several areas of clinical activity, for example, obstetrics, primary care, eating disorder, cardiovascular dysfunction etc.

NEW Videotapes from TAVISTOCK

Seminars in Behavioural Psychotherapy

Presented by **DAVID GOLDBERG**

A set of two tapes illustrating the work of three behavioural psychotherapists, John Cobb, Shirley Mercer, and Nagy Bishay. Between them they provide a set of four suggested teaching seminars. They include role-plays with commentaries, discussion points, and exercises which have been successfully used in the Department of Psychiatry and which can be easily adapted by course teachers for group or individual viewing.

Part I and Part II 40-60 minutes colour notes

VHS Part I £85.00 + £12.75 VAT = £97.75

Part II £85.00 + £12.75 VAT = £97.75

Parts I and II £145.00 + £21.75 VAT = £166.75

Problem based interviewing in General Practice

Presented by **ART LESSER**

This tape was made at Manchester by the Canadian psychiatrist Art Lesser to illustrate his work in teaching interviewing skills to trainee general practitioners. The aim is to help students identify and treat underlying problems which cause patients to come to their surgeries and which may be masked by an apparently straightforward complaint. He suggests how to look for verbal and visual clues and presents a model for problem sensing, detection, description, assessment, treatment, and evaluation.

NOTES FOR CONTRIBUTORS

PAPERS Papers for publication should be addressed to the Editor, Professor Michael Shepherd, Institute of Psychiatry, De Crespigny Park, Denmark Hill, London SE5 8AF. Contributors should send at least three copies of the text, tables, and figures. Copies other than the first may be xeroxed. The S.I. system should be adopted for text and figures. A short synopsis of about 50 words should be provided at the beginning of each article. Foreign quotations and phrases should be followed by a translation. If necessary, guidelines for statistical presentation may be found in: Altman, D. G., Gore, S. M., Gardner, M. J. & Pocock, S. J. (1983). Statistical guidelines for contributors to medical journals. *British Medical Journal* **286**, 1489–1493.

Submission of a paper will be held to imply that it contains original work that has not been previously published and that it is not being submitted for publication elsewhere.

In addition to longer articles, the Editor is prepared to accept preliminary and brief communications of between 1500 and 2500 words.

Manuscripts must be typewritten on one side of the paper in double-spacing with wide margins. The following information must be given on a single separate sheet: (1) title and short title for running head (not more than 100 characters); (2) authors' names, and (3) department in which work was done. Footnotes on the same sheet should list: (i) the authors' present addresses if different from departments in which work was done; (ii) name and address of the author to whom correspondence should be addressed; (iii) receipt of grants. Authors who would like a reprint address to be printed should include this on their manuscript.

REFERENCES (1) In the text these should follow the Harvard system – that is, name followed by date: Brown (1970). If there are more than two authors the first author's name followed by *et al.* should be used, even the first time that the reference appears. (2) The list of references should be typed in alphabetical order on a separate sheet and should appear as follows: Brown, J., Williams, E. & Wright, H. (1970). Treatment of heroin addiction. *Psychological Medicine* **1**, 134–136. Journal titles should be given in full.

Books should be cited as follows: Brown, J. (1970). *Psychiatric Research*. Smith: Glasgow.

ILLUSTRATIONS Only essential figures and tables should be included. *Photographs* Unmounted photographs on glossy paper should be provided. Magnification scales, if necessary, should be lettered on these. Where possible, prints should be trimmed to column width (i.e. 70 mm). *Diagrams* These will usually be reduced to 70 mm wide. Lettering should be in either Letraset or stencil, and care should be taken that lettering and symbols are of comparable size. Illustrations should not be inserted in the text, they should be marked on the back with figure numbers, title of paper, and name of author. All photographs, graphs, and diagrams should be referred to as figures and should be numbered consecutively in the text in Arabic numerals. The legends for illustrations should be typed on a separate sheet. *Tables* Tables should be numbered consecutively in the text in Arabic numerals and each typed on a separate sheet.

PROOFS AND OFFPRINTS Page proofs will be sent to the senior author. Corrections other than printer's errors may be charged to the author. Fifty offprints of each paper are supplied free; additional offprints are available according to a scale of charges if they are ordered when the proof is returned.
