

CLAY MINERALS BULLETIN

Vol. 1 No. 8

DECEMBER, 1952

*Issued by the Clay Minerals Group
of the Mineralogical Society*

CONTENTS

Page

245. Editorial.
246. P. G. H. BOSWELL. The contribution of clay mineralogy to the study of the diagenesis of sediments.
251. JOHN C. GRIFFITHS. Reaction relation in the finer-grained rocks.
258. CHARLES EDWARD WEAVER and THOMAS F. BATES. Mineralogy and petrography of the ordovician "metabentonites" and related limestones.
262. R. C. MACKENZIE and V. C. FARMER. Some notes on Arens' theory of differential thermal analysis.
266. H. R. SAMSON. Fluoride adsorption by clay minerals and hydrated alumina.
272. A. McL. MATHIESON and G. F. WALKER. The structure of vermiculite.
277. Index to authors.
283. Index to subjects.
