Special sales and supplements

This journal accepts advertising and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The journal also publishes supplementary material including conference proceedings on behalf of academic and corporate sponsors. Please contact Sarah Maddox at Cambridge University Press for further details (email: smaddox@cambridge.org).

Subscription information

Public Health Nutrition is an international journal published 18 times per year by Cambridge University Press on behalf of the Nutrition Society. The online edition is available at journals.cambridge.org/PHN, with free table of contents alert (upon registration).

Annual subscription rates

Volume 24, 2021 (18 issues):
Internet/print package: £1390/\$2666 Americas only/€2227 EU only
Internet only: £1006/\$1909 Americas only/€1599 EU only

Any supplements to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

Advertising: The Nutrition Society is willing to include advertisements in its journals. However, it will retain the right to make decisions on which advertisements are acceptable and which are not, and will not be obliged to give reasons to prospective

advertisers for its decisions. The appearance of an advertisement in the Society's journals does not imply endorsement by the Society. For further details, please contact Cambridge University Press.

Back volumes will be available in due course. Please contact Cambridge University Press for further information.

US POSTMASTERS: Please send address corrections to Cambridge University Press

This journal issue has been printed on FSC-certified paper and cover board. FSC is an independent, non-governmental, not-for-profit organization established to promote the responsible management of the world's forests. Please see www.fsc.org for information. Typeset by Macmillan India Limited, Bangalore, India and Printed in Europe by Bell and Bain, Glasgow.

Public Health Nutrition is covered in Science Citation Index Expanded (Web of Science), Current Contents, Agriculture, Biology & Environmental Sciences, Current Contents, Clinical Medicine, CAB ABSTRACTS[®], Global Health, Index Medicus[®] (MEDLINE[®]), EMBASE, Excerpta Medica, BIOSIS[®] Database and CINAHL[®] Database
Public Health Nutrition participates in the following initiatives: HINARI by WHO and AGORA by FAO.

Public Health Nutrition (PHN) provides a forum for the presentation of original research findings and high quality reviews of key topics, and for discussion of and debate on of current issues and controversies. It also publishes special issues on major topics of interest. Our field includes research, scholarship, and discussions on public health nutrition, that take a population, health promoting and preventive approach. Papers that do not have this emphasis may be directed to more appropriate journals. Potential contributors are encouraged to read the aims and scope of the journal, and to note and follow the guidelines set out below.

Content:

- **Original research findings and scientific reviews** are published as full papers usually less than 5000 words, not including the abstract, references, tables, figures and acknowledgements.
- **Editorials** express the opinion of the journal, as represented by its central editorial team, on topics judged by them to be important. Editorials, including guest editorials, are usually co-ordinated and developed by the editorial team.
- **Position papers**, including declarations and other statements of policy, may be invited or unsolicited.
- **Invited commentaries and book reviews** are expressions of opinion on a topical subject. These are commissioned by the members of the editorial team.
- **Letters to the Editors** are usually in response to material published in *PHN*. Submissions are sent to the author for comment and, when possible, published together with the author's reply.

Submission: PHN operates an online submission and reviewing system. All manuscripts should be submitted to <http://mc.manuscriptcentral.com/phnutr>. Please contact the Editorial Office on phn.edoffice@cambridge.org regarding any other types of submission.

Refereeing: Review articles and articles reporting original research are subject to external review by two or more referees who evaluate manuscripts based on their importance, relevance, and originality. Authors are asked to submit names and contact details (including email address) of up to four potential referees. All other contributions (editorials, position papers, invited commentaries, book reviews, and letters to the Editors) undergo an internal review process by at least two members of the editorial team. Invited commentaries and book reviews may also be checked externally as necessary to avoid technical errors and to improve salience.

Copyright: At the time of acceptance, authors will be asked to provide a completed copy of the 'Licence to Publish' (in lieu of copyright transfer), available at <https://www.nutritionociety.org/>. It is the author's responsibility to obtain written permission to reproduce any material (including text and figures) that has appeared in another publication.

Preparation of manuscripts: Please refer to the full Directions to Contributors on our website (<http://www.nutritionociety.org>). Manuscripts should be in clear and concise English, and spelling should follow the Oxford English Dictionary. For authors whose native tongue is not English, in-house editorial attention to their contributions will improve clarity. On acceptance, all contributions are subject to editorial amendment to conform to house style. Manuscripts should be prepared in a common word processing package (Word for Windows is preferred) in Times New Roman or other common typeface, prepared with double-spaced text, at least 2 cm margins, and page and line numbers. Standard abbreviations and SI units must be used.

Disclosure of financial support and any competing interests.

The submission must include a statement within an Acknowledgements section reporting any competing interests (financial and non-financial), all sources of funding, and the nature of the contribution of each author to the manuscript. If there are no competing interests, this must be stated. Authors are asked to provide this information during the submission process and should not include it as part of the manuscript to allow for double-blind reviewing.

Arrangement of papers:

1. **Title page** should include the article title, author(s), affiliation(s), up to eight keywords, one author identified for correspondence (with full postal address, telephone and fax numbers, and email address), and a running title of up to 45 characters. The title page should be submitted online as a separate cover letter, not as part of the manuscript, to enable double-blind reviewing.
2. **Abstract** should be structured, usually using the following internal headings: Objective, Design, Setting, Subjects, Results, Conclusions. Abstracts should be intelligible without reference to text or figures and should not exceed 250 words.
3. **Text** should be divided under headings (typically to include Introduction, Methods, Results, Discussion and Conclusions), and sub-headings as appropriate. Conclusions should include recommendations that derive from the research and that are concrete, feasible, and potentially effective. Emphasising that more research is needed is usually not necessary unless there is specific reason to say so. All submissions must include a statement that the research was conducted in accordance with guidelines laid down by the Declaration of Helsinki and approved by an ethics review committee.
4. **Acknowledgements** (sources of funding, competing interests declaration, authorship responsibilities, acknowledgements) should be provided during the submission process, not as part of the manuscript.
5. **References** should be in Vancouver style. Please refer to the full Directions to Contributors.
6. **Tables** should be reduced to the simplest form and should not be used where text or figures give the same information. Each table must be accompanied by a clear and concise caption that is comprehensible without reference to the text. Longer tables may be published online only.
7. **Figures** should be numbered, and legends should be provided. Each figure, with its legend, should be comprehensible without reference to the text and include definitions of abbreviations.

Proofs: Correspondence and proofs for correction will be emailed to the first named author unless otherwise indicated. The author will receive a PDF proof for checking. It is important that proofs be returned promptly. Authors may be charged for any alterations in excess of 10% of original setting.

Offprints: The corresponding author will receive a PDF of the published paper free of charge. Offprints are available to purchase and must be ordered before publication.

Monitoring and surveillance

Use of mid-upper arm circumference to screen for thinness among sub-Saharan African male detainees
David CE Philpott, Valérie Belchior-Bellino and Miya Ververs 4777

Assessment and methodology

Validation of a six-item dietary calcium screening tool among HIV patients in China
Leslie Yingzhijie Iseng, Wenni Xie, Wei Pan, Hui Lyu, Zhangping Yu, Wenyan Shi, Yun He, Wei Chen, Taisheng Li and Evelyn Hsieh 4786

Psychometric properties of the Food Environment Assessment Survey Tool (FEAST) in people with mobility impairment
Rebecca E Lee, Bin C Suh, Chelsea Cameron, Alicia O'Neal, Sasha Jarrett, Daniel P O'Connor, Punam Ohri-Vachaspati, Michael Todd and Rosemary B Hughes 4796

Nutritional status and body composition

Anthropometric characteristics of children living in food-insecure households in the USA
Francis A Tayie, Lea Anne Lambert, Richmond Areyetey, Belbet Xu and Gabrielle Brewer 4803

Behavioural nutrition

#SupportLocal: how online food delivery services leveraged the COVID-19 pandemic to promote food and beverages on Instagram
Si Si Jia, Rebecca Raeside, Julie Redfern, Alice A Gibson, Anna Singleton and Stephanie R Partridge 4812

Barriers and facilitators to participant adherence of dietary recommendations within comprehensive cardiac rehabilitation programmes: a systematic review
Lais Manata Vanzella, Veronica Rouse, Fatim Ajwani, Niloufar Deilami, Maureen Pokosh, Paul Oh and Gabriela Lima de Melo Ghisi 4823

Gender-based eating norms, the family environment and food intake among Costa Rican adolescents
Rafael Monge-Rojas, Uriyoán Colán-Ramos, Anne Chinnock, Vanessa Smith-Castro and Benjamin Reyes-Fernández 4840

Nutritional epidemiology

Alcohol consumption and sleep quality: a community-based study
Dandan Zheng, Xiaodong Yuan, Chaoran Ma, Ying Liu, Hannah VanEvert, Yujie Sun, Shouling Wu and Xiang Gao 4851

Association of serum levels of antioxidant micronutrients with mortality in US adults: National Health and Nutrition Examination Survey 1999–2002
Noah C Peeri, Weiwon Chai, Robert V Cooney and Meng-Hua Tao 4859

Association between mustard oil consumption and BMI in India
Rutuja Chhajed, Tinku Thomas, Sumathi Swaminathan, Anura V Kuppud and Indu Mani 4869

Fruit and vegetable consumption among older adults: influence of urban food environment in a medium-sized Brazilian city
Luciene Fátima Fernandes Almeida, Taiane Gonçalves Novaes, Milene Cristine Pessoa, Ariene Silva do Carmo, Larissa Loures Mendes and Andréia Queiroz Ribeiro 4878

Factors associated with childhood anaemia in Afro-descendant communities in Alagoas, Brazil
Haroldo da Silva Ferreira, Laise Gabrielly Matias de Lima Santos, Carla Mariana Xavier Ferreira, Samir Buainain Kassir, Tamara Rodrigues dos Santos, Nancy Borges Rodrigues Vasconcelos, Monica Lopes de Assunção and Marly Augusto Cardoso 4888

Predictors of recovery in children aged 6–59 months with uncomplicated severe acute malnutrition: a multicentre study
Sam Marconi David, Preethi N Ragasudha, Sunita Taneja, Sanjana Brahmawar Mohan, Sharad D Iyengar, Ruby Angeline Pricilla, Jose Martines, Harshpal Singh Sachdev, Virendra Suhalka, Venkata Raghava Mohan, Sarmila Mazumder, Ranadip Chowdhury, Rajiv Bahl and Anuradha Bose 4899

Shifts towards overweight and double burden of malnutrition among socio-economically vulnerable children: a longitudinal ecological analysis of Brazilian municipalities
Natanael de Jesus Silva, Rita de Cássia Ribeiro-Silva, Davide Rasella, Flávia Jôse Oliveira Alves, Tereza Campello, Rosemeire Leovigildo Fiaccone, and Mauricio Lima Barreto 4908

Association between dietary patterns and risk of breast cancer in Chinese female population: a latent class analysis
Shang Cao, Shurong Lu, Jinyi Zhou, Zheng Zhu, Wei Li, Jian Su, Hao Yu, Wencong Du, Lan Cui, Yunqiu Dong, Yun Qian, Ming Wu and Pingmin Wei 4918

Association between tea drinking and plasma folate concentration among women aged 18–30 years in China
Xiaoqian Jia, Mengyuan Ren, Yali Zhang, Rongwei Ye, Le Zhang and Zhiwen Li 4929

Antioxidant biomarkers and cardiometabolic risk markers in an Aboriginal community in remote Australia: a cross-sectional study
Lenette Knudsen, Jasmine G Lyons, Kerin O'Dea, Dirk L Christensen and Julie K Brimblecombe 4937

Food consumption in Tunisian university students and its association with sociodemographic characteristics and lifestyle behaviours
Amalia Delicado-Soria, Ramón Serrano-Urrea, Faustino Cervera-Burriel, Thouraya Daouas and María-José García-Mesaguer 4949

Associations between perceived stress and BMI and waist circumference in Chinese adults: data from the 2015 China Health and Nutrition Survey
Tian Tan and Cindy W Leung 4965

Social determinants of dietary patterns, food basket costs and expenditure on alcohol and tobacco amongst Greenland Inuit
Peter Bjerregaard and Christina Viskum Lytken Larsen 4975

Sociodemographic, health and pro-breast-feeding policies and programmes associated with breast-feeding duration in Latin American countries
Danielle Mendonça Buiatti Lamounier, Catarina M Azeredo, José Leopoldo Ferreira Antunes, Wolney Lisboa Conde and Ana Elisa Madalena Rinaldi 4985

High sugar content and body mass index: modelling pathways around the first 1000 d of life. BRISA cohort
Dâmaris Alves Silva Pinto, Joella Ximenes Prado Teixeira Nascimento, Luana Lopes Padilha, Sueli Ismael Oliveira da Conceição, Ana Karina Teixeira da Cunha França, Vanda Maria Ferreira Simões, Rosângela Fernandes Lucena Batista, Marco Antônio Barbieri and Cecilia Claudia Costa Ribeiro 4997

Dietary patterns associated with subclinical atherosclerosis: a cross-sectional analysis of the Brazilian Longitudinal Study of Adult Health (ELSA-Brasil) study
Bartira Gorgulho, Mariane A Alves, Juliana A Teixeira, Roberta O Santos, Sheila Alvim de Matos, Marcio Sommer Bittencourt, Isabela Benseñor, Paulo Lotufo and Dirce Maria Marchioni 5006

Food neophobia in Lebanese children: scale validation and correlates
