Nutrition Research Reviews

Nutrition Research Reviews

Volume 22, 2009 ISSN: 0954-4224

Aims and Scope

Nutrition Research Reviews publishes comprehensive and challenging review articles on selected key topics in nutritional science. Authors are encouraged to take a critical approach in appraising the literature while also aiming to advance new concepts and hypotheses. The journal publishes both solicited and unsolicited articles.

Nutrition Research Reviews is published twice a year by Cambridge University Press on behalf of The Nutrition Society.

The contents page of this journal is available on the Internet before publication at http://www.cambridge.org/nrr

Editorial Board

Editor-in-Chief

Dr Kate M Younger, Dublin Institute of Technology, Ireland

Address for correspondence

Dr Kate M Younger, Editor-in-Chief, Nutrition Research Reviews, School of Biological Sciences, Dublin Institute of Technology, Kevin Street, Dublin 8, Republic of Ireland Tel: +353 1 4024662 Fax: +353 1 4024995 Email: katherine.younger@dit.ie

US Editor

Professor C M Weaver, Purdue University, USA

Editors

Dr N Binns, *NMB Consulting Limited, Ireland* Dr D Dardevet, *INRA, France* Dr R M Elliot, *Institute of Food Research, UK* Dr M Pufulete, *Kings College London, UK*

Editorial Advisors

Dr M Ashwell, Baldock, UK Dr D A Bender, University College London, UK Dr J L Black, Warrimo, Australia Professor J Cade, University of Leeds, UK Dr C Edwards, Glasgow University, UK Dr S French, Sheffield University, UK Professor L Hambraeus, University of Uppsala, Sweden Professor H J Powers, University of Sheffield, UK Dr P Rogers, University of Bristol, UK Dr B Sivakumar, National Institute of Nutrition, India Professor N W Solomons, CESSIAM, Guatemala Professor M Verstegen, Wageningen University, Netherlands

Editorial staff

C Goodstein (Publications Manager), C Jackson (Deputy Publications Manager), H Money, J Norton & L Weeks (Publications Officers) C T Hughes (Sub-editor)

The Nutrition Society has as its objective the advancement of the scientific study of nutrition and its applications to the maintenance of human and animal health.

Application of membership is invited from anyone whose work has contributed to the scientific knowledge of nutrition, whether such work has been in the laboratory, the field or the clinic, and whether experimental, clinical, agricultural or statistical in nature. There is also a student membership scheme with reduced subscriptions.

Particulars of The Nutrition Society and application forms for membership are available from The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, London W6 7NJ, UK. Tel: +44 (0)20 7602 0228, Fax: +44 (0)20 7602 1756, Email: edoffice@nutsoc.org.uk

Younger KM Editorial	1
Berry SEE Triacylglycerol structure and interesterification of palmitic and stearic	
acid-rich fats: an overview and implications for cardiovascular disease	3
Hall WL Dietary saturated and unsaturated fats as determinants of blood pressure and	
vascular function	18
Reinhart KM, Talati R, White CM & Coleman CI The impact of garlic on lipid parameters:	
a systematic review and meta-analysis	39
Sánchez-Moreno C, Jiménez-Escrig A & Martín A Stroke: roles of B vitamins, homocysteine	
and antioxidants	49
Trzeciakiewicz A, Habauzit V & Horcajada M When nutrition interacts with osteoblast function:	
molecular mechanisms of polyphenols	68
Teegarden D & Donkin SS Vitamin D: emerging new roles in insulin sensitivity	82
Harrington M, Gibson S & Cottrell RC A review and meta-analysis of the effect of weight	
loss on all-cause mortality risk	93
Younger KM Editorial	109
van der Spuy WJ & Pretorius E Is the use of resveratrol in the treatment and prevention of	
obesity premature?	111
Borradale D & Kimlin M Vitamin D in health and disease: an insight into traditional	
functions and new roles for the 'sunshine vitamin'	118
Suliga E Visceral adipose tissue in children and adolescents: a review	137
Flatscher-Bader T & Wilce PA The effect of alcohol and nicotine abuse on gene expression	
in the brain	148
Centeno V, de Barboza GD, Marchionatti A, Rodríguez V & de Talamoni NT Molecular	
mechanisms triggered by low-calcium diets	163
Bauchart-Thevret C, Stoll B & Burrin DG Intestinal metabolism of sulfur amino acids	175
Wang S Epidemiology of vitamin D in health and disease	188
Patra AK & Saxena J The effect and mode of action of saponins on the microbial	
populations and fermentation in the rumen and ruminant production	204
Hoyland A, Dye L & Lawton CL A systematic review of the effect of breakfast on the	
cognitive performance of children and adolescents	220
Sirtori CR, Galli C, Anderson JW, Sirtori E & Arnoldi A Functional foods for	
dyslipidaemia and cardiovascular risk prevention	244

Index of Subjects

Adolescents

Visceral adipose tissue in children and adolescents: a review **22**, 137, 2009, doi:10.1017/S0954422409990096

Adolescents

A systematic review of the effect of breakfast on the cognitive performance of children and adolescents

22, 220, 2009, doi:10.1017/S0954422409990175

Alcohol abuse

The effect of alcohol and nicotine abuse on gene expression in the brain

22, 148, 2009, doi:10.1017/S0954422409990114

All-cause mortality

A review and meta-analysis of the effect of weight loss on all-cause mortality risk

22, 93, 2009, doi:10.1017/S0954422409990035

Allium sativum

The impact of garlic on lipid parameters: a systematic review and meta-analysis

22, 39, 2009, doi:10.1017/S0954422409350003

Antioxidant vitamins E and C

Stroke: roles of B vitamins, homocysteine and antioxidants **22**, 49, 2009, doi:10.1017/S0954422409990023

Autoimmune disease

Epidemiology of vitamin D in health and disease 22, 188, 2009, doi:10.1017/S0954422409990151

B vitamins

Stroke: roles of B vitamins, homocysteine and antioxidants **22**, 49, 2009, doi:10.1017/S0954422409990023

Blood pressure

Dietary saturated and unsaturated fats as determinants of blood pressure and vascular function

22, 18, 2009, doi:10.1017/S095442240925846X

Bone health

Vitamin D in health and disease: an insight into traditional functions and new roles for the 'sunshine vitamin' 22, 118, 2009, doi:10.1017/S0954422409990102

Bone metabolism

When nutrition interacts with osteoblast function: molecular mechanisms of polyphenols

22, 68, 2009, doi:10.1017/S095442240926402X

Bone

Molecular mechanisms triggered by low-calcium diets **22**, 163, 2009, doi:10.1017/S0954422409990126

Brain

The effect of alcohol and nicotine abuse on gene expression in the brain

22, 148, 2009, doi:10.1017/S0954422409990114

Breakfast

A systematic review of the effect of breakfast on the cognitive performance of children and adolescents

22, 220, 2009, doi:10.1017/S0954422409990175

CVD prevention

Functional foods for dyslipidaemia and cardiovascular risk prevention

22, 244, 2009, doi:10.1017/S0954422409990187

CVD

Epidemiology of vitamin D in health and disease 22, 188, 2009, doi:10.1017/S0954422409990151

Cancer prevention

Vitamin D in health and disease: an insight into traditional functions and new roles for the 'sunshine vitamin' 22, 118, 2009, doi:10.1017/S0954422409990102

Cancer

Molecular mechanisms triggered by low-calcium diets **22**, 163, 2009, doi:10.1017/S0954422409990126

Cancer

Epidemiology of vitamin D in health and disease 22, 188, 2009, doi:10.1017/S0954422409990151

Cardiovascular disease

Is the use of resveratrol in the treatment and prevention of obesity premature? 22, 111, 2009, doi:10.1017/S0954422409990084

Children

Visceral adipose tissue in children and adolescents: a review **22**, 137, 2009, doi:10.1017/S0954422409990096

Children

A systematic review of the effect of breakfast on the cognitive performance of children and adolescents

22, 220, 2009, doi:10.1017/S0954422409990175

Cognition

A systematic review of the effect of breakfast on the cognitive performance of children and adolescents
 22, 220, 2009, doi:10.1017/S0954422409990175

Cysteine

Intestinal metabolism of sulfur amino acids 22, 175, 2009, doi:10.1017/S0954422409990138

Determinants of visceral fat accumulation

Visceral adipose tissue in children and adolescents: a review **22**, 137, 2009, doi:10.1017/S0954422409990096

Diabetes

Functional foods for dyslipidaemia and cardiovascular risk prevention

22, 244, 2009, doi:10.1017/S0954422409990187

Diabetes

Vitamin D: emerging new roles in insulin sensitivity 22, 82, 2009, doi:10.1017/S0954422409389301

Diet

Functional foods for dyslipidaemia and cardiovascular risk prevention

22, 244, 2009, doi:10.1017/S0954422409990187

Dyslipidaemias

The impact of garlic on lipid parameters: a systematic review and meta-analysis

22, 39, 2009, doi:10.1017/S0954422409350003

Functional foods

Functional foods for dyslipidaemia and cardiovascular risk prevention

22, 244, 2009, doi:10.1017/S0954422409990187

Garlic

The impact of garlic on lipid parameters: a systematic review and meta-analysis

22, 39, 2009, doi:10.1017/S0954422409350003

Gene expression

The effect of alcohol and nicotine abuse on gene expression in the brain

22, 148, 2009, doi:10.1017/S0954422409990114

Glutathione

Intestinal metabolism of sulfur amino acids 22, 175, 2009, doi:10.1017/S0954422409990138

25-Hydroxyvitamin D

Epidemiology of vitamin D in health and disease 22, 188, 2009, doi:10.1017/S0954422409990151

Homocysteine

Stroke: roles of B vitamins, homocysteine and antioxidants **22**, 49, 2009, doi:10.1017/S0954422409990023

Hypercholesterolaemia

Functional foods for dyslipidaemia and cardiovascular risk prevention

22, 244, 2009, doi:10.1017/S0954422409990187

Hypertension

Molecular mechanisms triggered by low-calcium diets 22, 163, 2009, doi:10.1017/S0954422409990126

Inflammation

Is the use of resveratrol in the treatment and prevention of obesity premature?

22, 111, 2009, doi:10.1017/S0954422409990084

Insulin resistance

Vitamin D: emerging new roles in insulin sensitivity 22, 82, 2009, doi:10.1017/S0954422409389301

Insulin sensitivity

Vitamin D: emerging new roles in insulin sensitivity 22, 82, 2009, doi:10.1017/S0954422409389301

Interesterified fats

Triacylglycerol structure and interesterification of palmitic and stearic acid-rich fats: an overview and implications for cardiovascular disease

22, 3, 2009, doi:10.1017/S0954422409369267

Intestine

Molecular mechanisms triggered by low-calcium diets **22**, 163, 2009, doi:10.1017/S0954422409990126

Kidney

Molecular mechanisms triggered by low-calcium diets **22**, 163, 2009, doi:10.1017/S0954422409990126

Learning

A systematic review of the effect of breakfast on the cognitive performance of children and adolescents **22**, 220, 2009, doi:10.1017/S0954422409990175

Lipids

Molecular mechanisms triggered by low-calcium diets 22, 163, 2009, doi:10.1017/S0954422409990126

Low-Ca²⁺ diet

Molecular mechanisms triggered by low-calcium diets **22**, 163, 2009, doi:10.1017/S0954422409990126

Mechanisms of action

The effect and mode of action of saponins on the microbial populations and fermentation in the rumen and ruminant production

22, 204, 2009, doi:10.1017/S0954422409990163

Meta-analyses

The impact of garlic on lipid parameters: a systematic review and meta-analysis

22, 39, 2009, doi:10.1017/S0954422409350003

Meta-analyses

A review and meta-analysis of the effect of weight loss on all-cause mortality risk 22, 93, 2009, doi:10.1017/S0954422409990035

Methionine

Intestinal metabolism of sulfur amino acids

22, 175, 2009, doi:10.1017/S0954422409990138

Microbial ecology

The effect and mode of action of saponins on the microbial populations and fermentation in the rumen and ruminant production

22, 204, 2009, doi:10.1017/S0954422409990163

Nicotine abuse

The effect of alcohol and nicotine abuse on gene expression in the brain

22, 148, 2009, doi:10.1017/S0954422409990114

Nutraceuticals

Functional foods for dyslipidaemia and cardiovascular risk prevention

22, 244, 2009, doi:10.1017/S0954422409990187

Obesity

Is the use of resveratrol in the treatment and prevention of obesity premature?

22, 111, 2009, doi:10.1017/S0954422409990084

Osteoblasts

When nutrition interacts with osteoblast function: molecular mechanisms of polyphenols

22, 68, 2009, doi:10.1017/S095442240926402X

Oxidative stress

Stroke: roles of B vitamins, homocysteine and antioxidants **22**, 49, 2009, doi:10.1017/S0954422409990023

Polyphenols

When nutrition interacts with osteoblast function: molecular mechanisms of polyphenols

22, 68, 2009, doi:10.1017/S095442240926402X

Preventive medicine

The impact of garlic on lipid parameters: a systematic review and meta-analysis

22, 39, 2009, doi:10.1017/S0954422409350003

Resveratrol

Is the use of resveratrol in the treatment and prevention of obesity premature?

22, 111, 2009, doi:10.1017/S0954422409990084

Rumen fermentation

The effect and mode of action of saponins on the microbial populations and fermentation in the rumen and ruminant production

22, 204, 2009, doi:10.1017/S0954422409990163

Ruminant production

The effect and mode of action of saponins on the microbial populations and fermentation in the rumen and ruminant production

22, 204, 2009, doi:10.1017/S0954422409990163

S-adenosylmethionine

Intestinal metabolism of sulfur amino acids 22, 175, 2009, doi:10.1017/S0954422409990138

Saponins

The effect and mode of action of saponins on the microbial populations and fermentation in the rumen and ruminant production

22, 204, 2009, doi:10.1017/S0954422409990163

Saturated fatty acids

Dietary saturated and unsaturated fats as determinants of blood pressure and vascular function

22, 18, 2009, doi:10.1017/S095442240925846X

Signalling

When nutrition interacts with osteoblast function: molecular mechanisms of polyphenols

22, 68, 2009, doi:10.1017/S095442240926402X

sn-2 Position

Triacylglycerol structure and interesterification of palmitic and stearic acid-rich fats: an overview and implications for cardiovascular disease

22, 3, 2009, doi:10.1017/S0954422409369267

Stroke

Stroke: roles of B vitamins, homocysteine and antioxidants 22, 49, 2009, doi:10.1017/S0954422409990023

TAG structure

Triacylglycerol structure and interesterification of palmitic and stearic acid-rich fats: an overview and implications for cardiovascular disease

22, 3, 2009, doi:10.1017/S0954422409369267

UV radiation

Vitamin D in health and disease: an insight into traditional functions and new roles for the 'sunshine vitamin' 22, 118, 2009, doi:10.1017/S0954422409990102

Unsaturated fatty acids

Dietary saturated and unsaturated fats as determinants of blood pressure and vascular function 22, 18, 2009, doi:10.1017/S095442240925846X

Vascular function

Dietary saturated and unsaturated fats as determinants of blood pressure and vascular function

22, 18, 2009, doi:10.1017/S095442240925846X

Visceral adipose tissue

Visceral adipose tissue in children and adolescents: a review **22**, 137, 2009, doi:10.1017/S0954422409990096

Vitamin D

Vitamin D in health and disease: an insight into traditional functions and new roles for the 'sunshine vitamin' 22, 118, 2009, doi:10.1017/S0954422409990102

Vitamin D

Epidemiology of vitamin D in health and disease 22, 188, 2009, doi:10.1017/S0954422409990151

Vitamin D

Vitamin D: emerging new roles in insulin sensitivity 22, 82, 2009, doi:10.1017/S0954422409389301

Weight loss

A review and meta-analysis of the effect of weight loss on all-cause mortality risk

22, 93, 2009, doi:10.1017/S0954422409990035

British Journal of Nutrition is a leading international peerreviewed journal covering research on human and clinical nutrition, animal nutrition and basic science as applied to nutrition. The journal recognises the multidisciplinary nature of nutritional science and includes material from all of the specialities involved in nutrition research, including molecular and cell biology and the emerging area of nutritional genomics.

Public Health Nutrition provides an international peer-reviewed forum for the publication and dissemination of research and scholarship aimed at understanding the causes of, and approaches and solutions to nutrition-related public health achievements, situations and problems around the world. The journal publishes original and commissioned articles, commentaries and discussion papers for debate.

Nutrition Research Reviews

Nutrition Research Reviews publishes comprehensive and challenging review articles on selected key topics in nutritional science. Authors are encouraged to take a critical approach in appraising the literature while also aiming to advance new concepts and hypotheses. The journal publishes both solicited and unsolicited articles. Authors wishing to submit a review article to the journal should, in the first instance, send a short summary of their paper to the Editor-in-Chief at the address given below.

It is essential that any relevant interests and sources of funding are declared at submission stage and published as part of the manuscript.

Page format. *Nutrition Research Reviews* is printed in doublecolumn format (column width of 77 mm) with a text area of 77 x 212 mm.

Text. Papers should be submitted with 1.5 line spacing and margins of at least 2 cm on each side. The use of automated line numbering is strongly encouraged. At the ends of lines, words should not be hyphenated unless hyphens are to be printed. Standard abbreviations (e.g. Fig. and Figs.) and SI units must be used. A hierarchy of headings used to subdivide the paper should be made clear. It is possible to use four levels, although three or less will generally suffice.

The paper should be written in English, the spelling being generally that of the *Concise Oxford Dictionary* (1995), 9th ed. Oxford: Clarendon Press. If occasionally other spellings are preferred this will be indicated during technical editing.

Electronic submission as an attachment to email is strongly encouraged. Text files must be compatible with Microsoft Word (either in Word format or saved as rich text (.rtf) files.

Abstract. Each paper must commence with a carefully prepared, accurate, informative abstract, in one paragraph, that is complete in itself and intelligible without reference to text or figures. It should not exceed 250 words. A short title of up to 45 characters should be provided as a running head, and there should be a list of up to 6 key words.

Introduction. An introduction should follow the abstract setting out the background and, if necessary, the history of the chosen topic; this should be sufficient to set the scene for the general reader and be relatively brief.

Main body. Invited review papers will normally be expected to be between 6 000 and 12 000 words in length (including references and equivalent spaces for figures and tables). The main body of the review should present, discuss and interpret recent research findings in a comprehensive but concise manner. It should also consider what is known about work in progress and should close with a section attempting to assess where present investigations are likely to lead. The review will, of course, represent the views of the author, but should deal throughout with the world picture and give recognition to any work thought to be relevant.

Tables. Tables should be reduced to the simplest form, and should not be used where text or illustrations give the same information. They should be submitted on separate sheets at the end of the main text file and must carry headings describing their content that are comprehensible without reference to the text. Tables may be single or double column width; very wide tables will be printed in landscape format.

Illustrations. Text figures, line drawings, computer-generated figures and graphs should be of sufficient size and quality to allow for reduction by half or two-thirds; they may be in single or double column format. Half-tone photographs are acceptable

where they are a real contribution to the text. Figure legends should be typed on a separate sheet in the main text file and numbered corresponding to the relevant figures. For illustrations, preferred software packages are Adobe Illustrator, Adobe Photoshop, Aldus Freehand, Chemdraw or CorelDraw. Preferred formats are TIFF or JPEG, if a TIFF file is not possible save as an EPS or a Windows metafile. Microsoft PowerPoint files are also acceptable. If you are sending several files containing figures, please compress them into a single zip file for transmission.

References. References must be based on the numbered (Vancouver) system. When an article has more than ten authors, only the names of the first three should be given followed by *et al.*; give abbreviated journal titles and conform to the following styles:

1. Goel V, Cheema SK, Agellon LB, Ooraikul B & Basu TK (1999) Dietary rhubarb (*Rheum rhaponticum*) stalk fibre stimulates cholesterol 7a-hydroxylase gene expression and bile acid excretion in cholesterol-fed C57BL/6J mice. *Br J Nutr* **81**, 65–71.

2. Jenkins DJ, Kendall CW, Marchie A *et al.* (2003) The effect of combining plant sterols, soy protein, viscous fibres, and almonds in treating hypercholesterolemia. *Metabolism* **52**, 1478–1483.

3. Brandtzaeg P (2003) Role of local immunity and breast-feeding in mucosal homoeostasis and defence against infections. In *Nutrition and Immune Function*, pp. 273–320 [PC Calder, CJ Field and HS Gill, editors]. Wallingford, Oxon: CAB International.

4. Stock M & Rothwell NJ (1982) *Obesity and Leanness: Basic Aspects*. London: John Libbey.

Citations should be numbered consecutively in the order in which they first appear in the text using superscript Arabic numerals in parentheses, e.g. 'The conceptual difficulty of this approach has recently been highlighted^(1,2-4)'. If a reference is cited more than once the same number should be used each time.

Other rules of presentation etc. Please consult our full Directions to Authors available on the Nutrition Society website for further details: http://www.nutritionsociety.org/ documents/20070712NRRFullDirections.pdf

Proofs. An electronic set of page proofs in Adobe Acrobat (PDF) format will be provided to authors for checking and should be returned within 3 days (by fax or Express mail) to the NRR Production Editor, Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 8RU, UK; fax +44 1223 325802, email gedwards@cambridge.org

Offprints. A copy of the issue and a PDF file of the paper will be supplied free of charge to the corresponding author of each review, and additional offprints may be ordered on the order form sent with the proofs.

Papers will be sent to referees, will be edited before publication and modifications may be required.

Typescripts. Material for publication and other communications should be sent to:

Dr Kate M Younger School of Biological Sciences Dublin Institute of Technology, Kevin Street, Dublin 8, Republic of Ireland
