

New International Perspectives

Issues Before the 38th General Assembly of the United Nations, 1983-1984

edited by **Donald J. Puchala**

Expert contributors report on United Nations and world affairs of the past year, relating global politics and economics to the workings of the General Assembly. The authors explain how controversial issues of 1983 will affect the deliberations of the coming Assembly and suggest the impact of these deliberations on global affairs. Arenas of discussion include dispute settlement and decolonization; arms control and disarmament; global resource management; and human-rights, social, and legal issues. This volume is an essential and timely resource, especially for those who have not seen **Issues** in recent years.

*"For those interested in developments in current international affairs, **Issues** is . . . an invaluable handbook. Between its lines, however, **Issues** also paints an elaborate, and somewhat distressing, picture of incipient paralysis in the United Nations system. In this sense, the volume is a revealing study of contemporary international organization. . . ."* — from the Preface

Reason and Realpolitik

U.S. Foreign Policy and
World Order

Louis René Beres, Purdue
University

This far-reaching assessment of U.S. foreign policy warns against continued adherence to the dynamics of power politics. Beres systematically examines alternatives and offers a comprehensive program for a new foreign policy that considers what is best for the world as a whole.

Cuban Foreign Policy

Caribbean Tempest

Pamela S. Falk, Center for Inter-
American Relations

Falk analyzes the modern crises in U.S.-Cuban and Soviet-Cuban relations and explores the direction and intent of Cuban foreign policy. She pays particular attention to Cuba's involvement in African and Latin American conflicts.

Against the State

Politics and Social Protest in Japan

*David E. Apter and
Nagayo Sawa*

This scrutiny of modern protest politics focuses on the 20-year-long struggle surrounding the building of the New Tokyo (Narita) International Airport. Using field observation, in-depth interviewing, and first-hand experience drawn from living in the "fortresses" surrounding the airport, the authors examine the conflict and violence that ensued.

Hanging Together

The Seven-Power Summits

*Robert D. Putnam and
Nicholas Bayne*

For nearly a decade the leaders of the seven major industrial countries have met annually to discuss international economic and political issues. The authors analyze the successes and failures of the seven-power summits from Rambouillet in 1975 to the 1983 meeting at Williamsburg and anticipate the 1984 London summit. \$17.50

WORLD LABOR REPORT

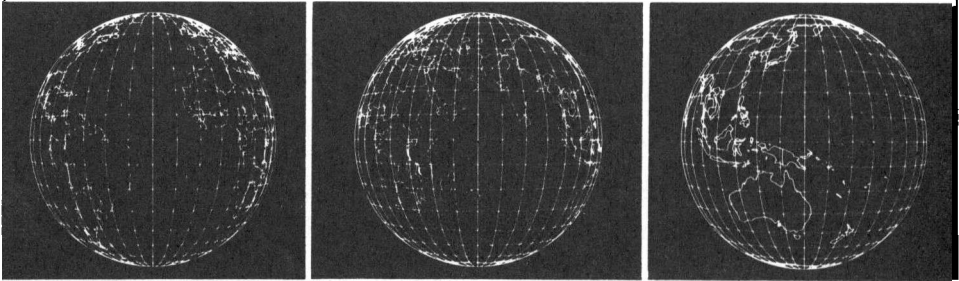

Make your reference shelf complete by purchasing the WORLD LABOR REPORT multi-volume series. This report is the first definitive study of its kind on the world of work. It provides a comprehensive review of recent developments concerning major labor problems in the world today.

Volume 1 of WORLD LABOR REPORT examines employment in the industrialized market economy countries, in the least developed countries, and in the centrally planned economy countries. It goes on to a review of incomes and wages in the world, the impact of new information technologies and an analysis of economic migration for employment. It concludes with statistical data on the world labor force, income distribution and social security.

Volume 1: 8½" x 12", vii, 215pp. ISBN 92-2-103604-9 \$25.65 Volume 2: available Fall 1984

New **The Age of Interdependence**

Economic Policy in a Shrinking World
Michael Stewart

International coordination of policies is one of the most topical items on any current economic agenda. This book points up the urgency of coming to terms with short-sighted policies that have led to massive unemployment, a precarious structure of international debt, and threats to the environment posed by deforestation, desert spreading, and an increased reliance on dirty and dangerous energy technologies.

Competitive Edge

The Semiconductor Industry in the U.S. and Japan

Edited by Daniel I. Okimoto, Takuo Sugano & Franklin B. Weinstein. During the 1970's, Japan supplanted the United States as the world leader in steel production, automobile manufacturing, and consumer electronics. Are the Japanese poised to repeat these successes in the semiconductor industry? The question has vast significance, because semiconductor technology holds the key to competitiveness in high technology, one of America's last bastions of industrial supremacy. This book, the product of years of joint research by a multidisciplinary team of American and Japanese scholars, analyzes the strengths and weaknesses of each country's semiconductor industry with reference to three major areas: technological innovation, the role of government, and the influence of financial institutions. This is the first book in the series ISIS Studies in International Policy, sponsored by the International Strategic Institute at Stanford. \$27.50

International Arms Control

Issues and Agreements

SECOND EDITION

By the Stanford Arms Control Group. Edited by Coit D. Blacker & Gloria Duffy. Completely revised and updated, this is an exhaustive analysis of national and international arms control: its history, its philosophy, and its achievements and future prospects as well as its political, military, and economic ramifications. As in the first edition, edited by John H. Barton and Lawrence D. Weiler, the book reflects the combined contributions of the Stanford Arms Control Group. Of the fifteen chapters in the book, four are new or substantially new, and the rest have been completely revised and brought up to date. The complete text of the SALT II treaty has been added to the appendix containing texts of major arms control agreements. This is the first book in the series ISIS Studies in International Security and Arms Control, sponsored by the International Strategic Institute at Stanford. Cloth, \$45.00; paper, \$16.95
