

Out of the shadows of depression and phobia with

Anafranil[®]
(clomipramine hydrochloride)

Geigy

Anafranil (clomipramine hydrochloride). **Dosage:** Depression—30–50mg per day. In severe cases increase to 75mg or higher if necessary. Phobic/Obsessional States—generally higher dosage—build up to 100–150mg per day. **Contra-indications:** 1) Anafranil is contra-indicated in conjunction with, or within 14 days of treatment with a monoamine oxidase inhibitor. 2) In existing liver damage. 3) In cardiac/circulatory failure or following a recent myocardial infarction. **Precautions:** Caution is necessary in ischaemic heart disease, glaucoma, and retention of urine. Great caution in patients with epilepsy. Anafranil may antagonise the action of certain antihypertensive drugs, and may potentiate the cardiovascular action of noradrenaline and adrenaline. As with other drugs, avoid using during the first trimester of pregnancy if possible. **Side effects:** Dry mouth, sweating, difficulty with accommodation, constipation, disturbance of micturition, tachycardia. Less commonly tremor, ataxia, orthostatic hypotension and vertigo. More rarely anxiety, agitation, fatigue, drowsiness, confusion, insomnia and headache. Epileptiform seizures have occurred in a small number of patients. Symptomless hyperthermia and allergic skin reactions are extremely rare. Interference with sexual function, particularly ejaculation, may be encountered. Agranulocytosis has occasionally occurred in patients on tricyclic antidepressants—routine blood counts are advised during treatment with Anafranil. **Availability:** Two-tone yellow/caramel capsules of 10mg (PL0001/0037) £3.10 per 100. Two-tone orange/caramel capsules of 25mg (PL0001/5000) £6.11 per 100. Two-tone blue/caramel capsules of 50mg (PL0001/0068) £11.63 per 100. Orange flavoured and coloured syrup containing 25mg of Anafranil in 5ml (PL0001/5001) £5.55 per 150ml bottle. Full prescribing information is available on request from Geigy Pharmaceuticals, Horsham, West Sussex.

The Behavioral and Brain Sciences

An International Journal of Current Research and Theory
with Open Peer Commentary

Edited by **STEVAN HARNAD**

The Behavioral and Brain Sciences provides an opportunity for an interesting form of scientific communication among researchers in all areas of psychology, neuroscience, behavioural biology and cognitive science. Original articles (and occasionally also précis of recent books or previously published articles) appear simultaneously with commentaries from fifteen, twenty or more of the authors' peers from across the spectrum of BBS disciplines, and the authors' replies to these commentaries.

Continuing commentary and replies are carried over to subsequent issues.

Recent and forthcoming articles include:

H.J. EYSENCK The conditioning model of neurosis *with commentary*

R.K. DISMUKES New concepts of molecular communication among neurons *with commentary*

N. CHOMSKY Rules and representations *with commentary*

J. McGLONE Sex differences in human brain organisation *with commentary*

Volume 3 (1980): £40.00 for institutions, £18.50 for individuals*

Volumes 1-3 (1978-1980): £100.00 for institutions, £60.00 for individuals*

*Individuals must order direct from the Press and certify that the subscription is for their personal use only. Payment should accompany the order.

Open Employment After Mental Illness

The problems of people seeking to re-enter employment after treatment as psychiatric in-patients are severe, and insufficiently understood. This detailed appraisal of the subject, drawn from a study of over 2,000 ex-patients, provides insights into both the medical and employment aspects of rehabilitation, with the aim of providing a wider perspective on the problems of the various groups who are concerned with the employment of the mentally ill, but who may individually not be in a position to see the complete picture.

HERSCHEL PRINS

Offenders, Deviants or Patients?

**An Introduction to the Study of
Socio-Forensic Problems**

The disposal and management of 'mentally abnormal offenders' have become a source of growing public and professional concern. In his discussion of this controversial topic, Herschel Prins opens with an examination of some general issues of criminal responsibility and of the problematic relationship between mental disorder and criminality, and he concludes with some proposals for reform of the present system of dealing with offender/patients – and in particular of the role of the special hospitals.

JULES BEMPORAD

Severe and Mild Depression

The Psychotherapeutic Approach

This major work by two leading psychiatric theorists and clinicians offers a comprehensive, original view of the causes and treatment of depression. After a critical review of all the current interpretations of depression, the authors describe its various classical forms from the most severe to the mildest as they occur in adults, adolescents, and children. Detailed case reports offer a wealth of clinical material that illustrates the authors' psychotherapeutic approach.

Second Edition

ANTHONY CLARE

Psychiatry in Dissent

**Controversial Issues in Thought and
Practice**

To the interested outside observer the current fragmented state of psychiatry presents an alarming picture. To the professional involved in the care of the psychologically distressed the situation may sometimes give rise to feelings of dismay.

This book, is written by a psychiatrist who has trained and worked in British clinical psychiatry, is an attempt to place the contemporary assault on psychiatric theory in the context of psychiatry as it is actually practiced, both in Britain and the USA.

NOTES FOR CONTRIBUTORS

PAPERS Papers for publication should be addressed to the Editor, Professor Michael Shepherd, Institute of Psychiatry, De Crespigny Park, Denmark Hill, London SE5 8AF. Contributors should send at least three copies of the text, tables, and figures. Copies other than the first may be xeroxed. The S.I. system should be adopted for text and figures. A short synopsis of about 50 words should be provided at the beginning of each article. Foreign quotations and phrases should be followed by a translation. Submission of a paper will be held to imply that it contains original work that has not been previously published and that it is not being submitted for publication elsewhere.

In addition to longer articles, the Editor is prepared to accept preliminary communications of between 1500 and 2000 words.

Manuscripts must be typewritten on one side of the paper in double-spacing with wide margins. The following information must be given on a single separate sheet: (1) title and short title for running head (not more than 100 characters); (2) authors' names, and (3) department in which work was done. Footnotes on the same sheet should list: (i) the authors' present addresses if different from departments in which work was done; (ii) name and address of the author to whom correspondence should be addressed; (iii) receipt of grants. Authors who would like a reprint address to be printed should include this on their manuscript.

REFERENCES (1) In the text these should follow the Harvard system – that is, name followed by date: Brown (1970). If there are more than two authors the first author's name followed by *et al.* should be used, even the first time that the reference appears. (2) The list of references should be typed in alphabetical order on a separate sheet and should appear as follows: Brown, J., Williams, E. & Wright, H. (1970). Treatment of heroin addiction. *Psychological Medicine* 1, 134–136. Journal titles should be given in full.

Books should be cited as follows: Brown, J. (1970). *Psychiatric Research*. Smith: Glasgow.

ILLUSTRATIONS Only essential figures and tables should be included. *Photographs* Unmounted photographs on glossy paper should be provided. Magnification scales, if necessary, should be lettered on these. Where possible, prints should be trimmed to column width (i.e. 70 mm). *Diagrams* These will usually be reduced to 70 mm wide. Lettering should be in either Letraset or stencil, and care should be taken that lettering and symbols are of comparable size. Illustrations should not be inserted in the text, they should be marked on the back with figure numbers, title of paper, and name of author. All photographs, graphs, and diagrams should be referred to as figures and should be numbered consecutively in the text in Arabic numerals. The legends for illustrations should be typed on a separate sheet. *Tables* Tables should be numbered consecutively in the text in Arabic numerals and each typed on a separate sheet.

PROOFS AND OFFPRINTS Page proofs will be sent to the senior author. Corrections other than printer's errors may be charged to the author. Fifty offprints of each paper are supplied free; additional offprints are available according to a scale of charges if they are ordered when the proof is returned.
