Proceedings of the Conference on Transformation Groups, New Orleans 1967. Edited by P. S. Mostert. Springer-Verlag, New York (1968). xii + 466 pp.

These proceedings contain articles based on the lectures and informal discussions at the Conference on Transformation Groups held at Tulane University, May 8–June 2, 1967.

Following a paper by W. Browder *Surgery and the theory of differentiable transformation groups*, the papers and short notes are divided into four parts:

(1) Differentiable transformation groups,
(2) Algebraic topological and other techniques,
(3) Compact (Non-Lie) transformation groups,
(4) Non-Compact transformation groups.
