## A Concise History of International Finance

From Babylon to Bernanke

Larry Neal

"This is the most impressive, most comprehensive, and most up-to-date single volume history of finance there is. Its central argument about the beneficial effects of financial innovation – along with the many cautionary tales of how and why things go sour, of the consequences of adequate mechanisms for ensuring commitment and responsibility – make it at once a classic, whose influence will endure a long time."

— Harold James, author of  
*The End of Globalization:  
Lessons from the Great Depression*

## The Rise of the Global Company Multinationals and the Making of the Modern World

Robert Fitzgerald

"This is a definitive new book in the field of international business. Covering the period from the 1870s to the twenty-first century, the book is characterized by its wide time-span and depth of analysis. Its detailed account of the rise of the global company contributes to a comprehensive understanding of globalization – one of the most important phenomena today."
