

Molecular Biology in Aquatic Systems

to be held in Edinburgh in September 1992

A joint Symposium of the MBA, SMBA and FBA

A symposium on the use of molecular biology in marine and freshwater research is to be held in Edinburgh in September 1992. The symposium will consist of plenary lectures, offered papers and posters on molecular biological investigations of aquatic micro-organisms, invertebrates and plants. Persons interested in participating in the symposium are invited to write to the conference organisers at the address below by **1 February 1992**. If you wish to present a paper or poster to the symposium please include an abstract of your intended contribution.

Further details from:

Dr J. Douglas McKenzie, SMBA, PO Box 3, Oban Argyll, PA34 4AD

Journal of Zoology

Editor:

Marcia A. Edwards

The Zoological Society of London was founded in 1826, its stated purpose being 'the advancement of Zoology and Animal Physiology and the introduction of new and curious subjects of the Animal Kingdom.' One of the many ways in which the Society continues to advance zoology is through the medium of its scientific publications, whereby contributions to knowledge are disseminated worldwide.

The **Journal of Zoology** incorporates the Proceedings and Transactions of the Society and thus continues more than one hundred and fifty years of publication of zoological research. It contains original papers on research in many areas from international contributors. The wide variety of subject matter ensures something of interest for all researchers and at the same time provides a broad view of trends and developments.

Produced to the highest editorial and technical standards, a part is published monthly, giving three annual volumes of four parts each. Approximately 180 papers appear every year.

Send for your **free sample copy** to see the quality of papers presented in the **Journal of Zoology** for yourself.

**Subscription rates for
volumes 223-225, 1991, 12 issues**
UK & Europe £330.00
Rest of World US\$685.00

Recent and forthcoming papers:

Early embryonic development of the grey short-tailed opossum, *Monodelphis domestica*, *in vivo* and *in vitro*. **L.M. Baggott and H.D.M. Moore**

A comparison of the effect of captivity on the epidermis of prespawning and post-spawned winter flounder, *Pseudopleuronectes americanus*. **D. Burton and B.A. Everard**

Skeletal growth and function in the California gull (*Larus californicus*). **D. Carrier and L.R. Leon**

The diet of red-breasted mergansers (*Mergus serrator*) during the smolt run in N.E. Scotland: the importance of salmon (*Salmo salar*) smolts and parr. **M.J. Feltham**

Effect of spleen congestion and decongestion on newt blood. **G. Frangioni and G. Borgioli**

Metamorphosis of the feeding mechanism in tiger salamanders (*Ambystoma tigrinum*): the ontogeny of cranial muscle mass. **G.V. Lauder and S.M. Reilly**

Do the bivalvia demonstrate environment-specific sexual strategies? A Hong Kong model. **B. Morton**

Oxford Journals

Oceanus

"For anyone who loves the sea and whatever moves upon it, *Oceanus* seems to me a 'must'. It is written for the layman, but its articles carry the authority of that great research institute at Woods Hole."

SCIENCE EDITOR, NEW YORK TIMES

Published quarterly by the Woods Hole Oceanographic Institute, *Oceanus* explores a wide range of issues related to the world's oceans. It contains original research reports by the world's leading marine scientists, all edited for the educated lay reader. The journal is rich with full colour and deep-sea photography, clearly illustrated articles and comprehensive diagrams. With its reputable editorial board and original research reports, *Oceanus* is undoubtedly the most comprehensive journal of its kind available.

Subscription

Volume 35, 1992 published quarterly in March, June, September and December: £25 for individuals; £47 for institutions; £18 for students; airmail £14.50 per year extra ISSN 0029-8182

Please send me further information about *Oceanus*

Cambridge Marine Biology

Coastal Marine Zooplankton

A Practical Manual for Students

C. D. TODD and M. S. LAVERACK

This student's manual provides an original photographic guide to representative forms of the major groups of marine zooplankton.

£32.50 net HB 0 521 40036 8 120 pp.
1991

£11.95 net PB 0 521 40918 7

Deep-Sea Biology

A Natural History of Organisms at the Deep-Sea Floor

J. D. GAGE and P. A. TYLER

A comprehensive account of the natural history of the organisms associated with the deep-sea floor, and examines their relationship with this remote and inhospitable environment.

£80.00 net HB 0 521 33431 4 520 pp.
1991
