COVER ILLUSTRATION:

A montage illustrating topics from IAU Symposium 219 and the site itself. Surrounding the evening scene in Darling Harbor (S. Wolk) overlooked by the constellation Orion (as observed from the Sydney Harbor Bridge), are found (clockwise): a TRACE image of the Sun (L. Golub), a RHESSI image of a solar flare (A. O. Benz), emission in Fe XVIII (centered) from 3 cool stars as observed with *FUSE* (A. K. Dupree), planets around stars from a child's imagination (NASA), and a ubiquitous local inhabitant of Sydney (S. Wolk).
