# Child Sexual Abuse within the Family

THE CIBA FOUNDATION

This handbook provides invaluable guidance on the actions that may be taken by different groups of professionals involved in the management of sexually abused children and their families. The contributors, all professionals who have been involved in working with the problems of child abuse and child sexual abuse, present views on the definition of this form of abuse, summarize the characteristics of families, look at the ways in which sexual abuse in the family presents to professionals, and consider the management of cases. Consideration is given to the detailed planning at each phase of the intervention and to the means and difficulties that different professionals are likely to meet.
