Cambridge **Core**

CAMBRIDGE
UNIVERSITY PRESS

- 594 Small-scale dynamics of settling, bidisperse particles in turbulence
R. Dhariwal & A. D. Bragg
- 621 Drainage flow of a viscous compressible fluid from a small capillary with a sealed end
K. P. Chen & D. Shen

- 644 Sound wave scattering in a flow duct with azimuthally non-uniform liners
H. B. Jiang, A. S. H. Lau & X. Huang
- S* 663 The effects of irregular shape on the particle stress of dilute suspensions
M. Daghooghi & I. Borazjani
- 693 ERRATUM

JFM Rapids (online only)

- R1 Interaction between the Blasius boundary layer and a free surface
J. M. F. Tsang, S. B. Dalziel & N. M. Vriend
- R2 Enstrophy and circulation scaling for Navier–Stokes reconnection
R. M. Kerr

- S* R3 Asymptotic formulae for flow in superhydrophobic channels with longitudinal ridges and protruding menisci
T. L. Kirk
- R4 Testing linear marginal stability in stratified shear layers
C. J. Howland, J. R. Taylor & C. P. Caulfield

S indicates supplementary data or movies available online.

- S 1 The optimal kinematic dynamo driven by steady flows in a sphere
L. Chen, W. Herreman, K. Li, P. W. Livermore, J. W. Luo & A. Jackson
- 33 Mechanisms in the hypersonic laminar near wake of a blunt body
W. S. Hinman & C. T. Johansen
- 76 The critical point of the transition to turbulence in pipe flow
V. Mukund & B. Hof
- 95 Geometric generalised Lagrangian-mean theories
A. D. Gilbert & J. Vanneste
- 135 Revisiting slope influence in turbulent bedload transport: consequences for vertical flow structure and transport rate scaling
R. Maurin, J. Chauchat & P. Frey
- 157 Propagation of a strong shock over a random bed of spherical particles
Y. Mehta, C. Neal, K. Salari, T. L. Jackson, S. Balachandar & S. Thakur
- 198 Two-level, two-phase model for intense, turbulent sediment transport
J. M. Gonzalez-Ondina, L. Fraccarollo & P. L.-F. Liu
- S 239 Rapidly rotating precessing cylinder flows: forced triadic resonances
J. M. Lopez & F. Marques
- 271 Effects of Reynolds number and Stokes number on particle-pair relative velocity in isotropic turbulence: a systematic experimental study
Z. Dou, A. D. Bragg, A. L. Hammond, Z. Liang, L. R. Collins & H. Meng
- 293 Water wave overwash of a step
D. M. Skene, L. G. Bennetts, M. Wright, M. H. Meylan & K. J. Maki
- 313 Vortex dynamics and sound emission in excited high-speed jets
M. Crawley, L. Gefen, C.-W. Kuo, M. Samimy & R. Camussi
- S 348 Dispersion coefficient in an electro-osmotic flow of a viscoelastic fluid through a microchannel with a slowly varying wall zeta potential
J. C. Arcos, F. Méndez, E. G. Bautista & O. Bautista
- 387 Internal solitary wave generation by tidal flow over topography
R. Grimshaw & K. R. Helfrich
- 408 Wave-induced mean flows in rotating shallow water with uniform potential vorticity
J. Thomas, O. Bühler & K. Shafer Smith
- 430 A multifractal model for the velocity gradient dynamics in turbulent flows
R. M. Pereira, L. Moriconi & L. Chevillard
- 468 Numerical and theoretical analyses of the dynamics of droplets driven by electrowetting on dielectric in a Hele-Shaw cell
Y. Yamamoto, T. Ito, T. Wakimoto & K. Katoh
- 489 The kinematic genesis of vortex formation due to finite rotation of a plate in still fluid
M. J. David, M. Mathur, R. N. Govardhan & J. H. Arakeri
- 525 Impinging jet flow and hydraulic jump on a rotating disk
Y. Wang & R. E. Khayat
- 561 Droplet impact onto an elastic plate: a new mechanism for splashing
M. Pegg, R. Purvis & A. Korobkin

Contents continued on inside back cover.
