

# BUREAU OF HYGIENE AND TROPICAL DISEASES

Keppel Street, London WC1E 7HT, England  
(Telephone: 01-636 8636—Telex: 8953474)

## PRICES OF PUBLICATIONS (for 1981 issues)

*Annual Subscription* | *Single Issue*

### **TROPICAL DISEASES BULLETIN**—Volume 78

*(12 issues and index)*

Standard or single-sided	£40·00	US\$100.00		£4·00	US\$10.00
Index				£6·00	US\$15.00

### **ABSTRACTS ON HYGIENE**—Volume 56

*(12 issues and index)*

Standard or single-sided	£60·00	US\$150.00		£6·00	US\$15.00
Index				£8·00	US\$20.00

### **\* JOURNAL OF HELMINTHOLOGY**—Volume 55

*(4 issues)*

	£22·00	US\$55.00		£6·00	US\$15.00
--	--------	-----------	--	-------	-----------

\* The Bureau handles all subscriptions to this journal, which is published by the London School of Hygiene and Tropical Medicine.

---

Prices shown above include cost of postage by surface mail. Air mail and registered post facilities are available at extra charge.

---

Discount for Booksellers—10 per cent.

---

Subscriptions must expire with the December issue of each year.

## BUREAU OF HYGIENE AND TROPICAL DISEASES

Keppel Street, London WC1E 7HT, England

### TROPICAL DISEASES BULLETIN

first published in 1912 as successor to *Sleeping Sickness Bulletin* (1908–1912)

### ABSTRACTS ON HYGIENE

published originally in 1926 as *Bulletin of Hygiene*—present title introduced in 1968

The two monthly journals contain abstracts and reviews of articles which appear in the world's leading medical and scientific publications on a broad range of subjects concerned with all aspects of public health, including:

Epidemiology and control of diseases.

Environmental health—sanitation, water supplies, pollution, toxicology, food hygiene, occupational medicine

Community health—services, health education, maternity, childhood, family health, ageing, nutrition, housing, socio-economic factors, drug abuse

These abstract journals are complementary in subject coverage, with *Tropical Diseases Bulletin* concentrating on conditions in tropical and subtropical regions and *Abstracts on Hygiene* on those generally affecting communities outside these regions and on matters of universal importance. Notwithstanding the geographical division, *Abstracts on Hygiene* deals mainly with the micro-biological aspects of disease, wherever it occurs, while *Tropical Diseases Bulletin* covers medical parasitology and entomology.

Both publications are available in standard and in single-sided editions. The latter version is particularly useful for research workers and other individuals who wish to group abstracts by subject (e.g. by cutting out and pasting on cards) for reference purposes.

*Abstracts on Hygiene* is also obtainable in microform from University Microfilms International, 18 Bedford Row, London WC1R 4EJ, England or 300 North Zeeb Road, Ann Arbor, Mich. 48106, U.S.A.

# LONDON SCHOOL OF HYGIENE AND TROPICAL MEDICINE

The School offers the following full-time courses, starting annually in October and lasting for a year except where stated otherwise, for the MSc degree of the University of London and for diplomas of the School and of the Examining Board in England. There are part-time courses in Occupational Hygiene and in Medical Statistics and Epidemiology.

Facilities are available in certain subjects for suitable candidates to study for the research degree of MPhil and PhD. A limited number of training awards may be available to suitably qualified British subjects resident in the United Kingdom wishing to read for the MSc or PhD.

## **MSc IN CLINICAL TROPICAL MEDICINE**

Designed particularly for the training of intending specialist physicians and medical research workers in the tropics. Closing date for applications: 1 March.

## **MSc IN COMMUNITY HEALTH IN DEVELOPING COUNTRIES**

Primarily for medical graduates, but open to others with appropriate qualifications and experience acceptable to the University. Will provide advanced training in community health, epidemiology and disease control programmes in developing countries. Candidates whose qualifications do not fulfil the University regulations for MSc registration may attend the course and sit a School examination for the Diploma in Community Health of the Tropics. Closing date for applications: 1 March.

## **MSc IN COMMUNITY MEDICINE**

Intended to provide basic professional training for medical practitioners wishing to become community medicine specialists and follow careers in health services administration or in teaching and research. Closing date for applications: 1 February.

## **MSc IN EPIDEMIOLOGY**

Designed to provide academic training for the future professional epidemiologist. Primarily for graduates in medicine, dentistry or veterinary science but exceptionally graduates in science with experience in the biomedical fields may be accepted. Closing date for applications: 1 March.

## **MSc IN HUMAN NUTRITION**

For medical practitioners and graduates in science or social science. Applicants not qualifying for MSc registration may attend the course and sit a School examination for the Diploma in Human Nutrition. After the written examination MSc students will carry out practical work—which may take place overseas—for at least six months and will submit a written report. Closing date for applications: 1 February.

## **MSc IN MEDICAL DEMOGRAPHY**

For graduates in medicine, science, or social science with suitable experience. Candidates whose qualifications do not fulfil the University regulations for MSc registration may attend the course and sit a School examination in June for the Diploma in Medical Demography. Closing date for application: 1 April.

## **MSc IN MEDICAL MICROBIOLOGY**

A course held jointly with the Royal Postgraduate Medical School comprising one year of full-time study followed by a second year of practical training at a recognised laboratory. Candidates with satisfactory evidence of prior supervised practical training may be exempted from the second year of study. The course is open to medical, dental and veterinary practitioners, graduates in science or pharmacy and other suitably qualified candidates. Closing date for applications: 1 March.

## **MSc IN MEDICAL PARASITOLOGY**

A nine-months' course designed for biologists and graduates in medicine and in veterinary science who intend to undertake laboratory or field research and teaching in entomology, helminthology and protozoology in relation to human disease and its control. Closing date for applications: 1 March.

## **MSc IN MEDICAL STATISTICS**

Intended for graduates with a mathematics background and a good general knowledge of mathematical statistics. Closing date for applications: 1 March.

## **MSc IN OCCUPATIONAL HYGIENE**

Designed for graduates in physics, chemistry, engineering, medicine, or allied subjects. Closing date for applications: 1 April.

## **MSc IN OCCUPATIONAL MEDICINE**

A nine-months' course for medical practitioners, covering all aspects of occupational health and also fulfilling the requirements for the Diploma in Industrial Health of the Royal Colleges. Previous experience in occupational medicine is not essential. Closing date for applications: 1 April.

## **DIPLOMA IN INDUSTRIAL HEALTH**

This course for the diploma of the R.C.P. London, R.C.S. England can be taken either full-time over three months or day-release over nine months by those with three years' full-time or ten years' part-time industrial experience, or who hold the DPH, or full-time over an academic year by those with insufficient experience. Closing date for applications: 1 April.

## **DIPLOMA IN TROPICAL MEDICINE AND HYGIENE**

A five-months' course for medical practitioners leading to the diploma of the R.C.P. London, R.C.S. England. It starts each year at the end of February. Closing date for applications: 1 May.

## **DIPLOMA OF PROFESSIONAL COMPETENCE IN COMPREHENSIVE OCCUPATIONAL HYGIENE**

A two-year day-release course aimed to prepare students for the diploma of the British Examining Board in Occupational Hygiene. Applicants should possess a university degree or equivalent qualification. Closing date for applications: 1 April.

## **COURSES IN MEDICAL STATISTICS AND EPIDEMIOLOGY**

Part-time courses in medical statistics and/or epidemiology are held, occupying various mornings from October to December. In general, only applicants with a medical qualification will be accepted. Extended training in these subjects is offered from January to March. Applicants may be accepted for a combined course consisting of all courses. Closing date for applications: 1 June.

Further details may be obtained from the Registrar, London School of Hygiene and Tropical Medicine, Keppel Street (Gower Street), London, WC1E 7HT.

---

## INSTRUCTION TO CONTRIBUTORS

The *Journal of Helminthology* publishes papers on all aspects of animal parasitic helminths, particularly those of medical or veterinary importance.

Manuscripts, which must be in English or French (with an English summary), should be addressed to:

The Editor, Journal of Helminthology,  
London School of Hygiene and Tropical Medicine,  
Winches Farm Field Station,  
395 Hatfield Road,  
St Albans, Herts AL4 0XQ,  
England.

Two copies of a typescript, on size A4 paper with double spacing, should be submitted. Papers should be preceded by a short abstract and will normally have the following sections: brief introduction (unheaded); Materials and Methods; Results; Discussion; Acknowledgements; References. However, the form of the paper may vary, depending on its subject matter; recent past issues should be consulted for a suitable form. Illustrations should be drawn in Indian ink, preferably not more than double the final size. Care should be taken that all illustrations fit into the format of the Journal. The maximum size an illustration may be printed is 13.5 × 18 cm. Where many separate drawings are made, some indication of how they may be grouped to make a corporate plate without undue wastage of space, should be indicated. Some indication of scale should normally be given on the figure. Photocopies of illustrations should also be enclosed for refereeing purposes. Lettering and numbering, which must be of a high standard, should be added by the author, with due regard for subsequent reduction.

Photographs should be glossy prints of the same size as they are to appear in the Journal (maximum size 13.5 × 18 cm). Composite prints must be mounted and can have the separate photographs abutting; they will then have a separating line inserted by the printers. All figures and letters on photographs must be inserted by the author.

Information should not be repeated in the text and in tables or figures. The legends to tables and to figures should be sufficiently detailed for the information to be understood without reference to the text.

References should be given in alphabetical order with the full title of the journal. The following are examples:

DUKE, B. O. L. (1971) The ecology of onchocerciasis in man and animals. In *Ecology and Physiology of parasites* (ed A. M. Fallis) pp. 213 – 222. Adam Hilger Ltd.: London.

JAMES, C. and WEBBE, G. (1973) A comparison of Egyptian and East African strains of *Schistosoma haematobium*. *Journal of Helminthology*, **47**, 49 – 59.

25 offprints are provided free of charge; additional copies may be ordered at the proof stage.

# Contents

	Pages
A new aspidogastrid trematode <i>Lobatostoma hanumanthai</i> n.sp. from a marine fish in the Bay of Bengal. S. V. NARASIMHULU and R. MADHAVI	233–239
On the morphological variation of <i>Euparadistomum</i> species (Digenea: Dicrocoeliidae) from small mammals in Malaysia. CHRISTINE BETTERTON	241–245
Five new species of the genus <i>Spirocamallanus</i> Olsen, 1952 (Camallanidae, Nematoda) from marine fishes. A. K. M. BASHIRULLAH and E. H. WILLIAMS	247–252
Inorganic elements in the adults of <i>Haemonchus contortus</i> (Nematoda: Trichostrongylidae). Research Note. M. L. SOOD and JYOTIKA KAPUR	253–254
The prevalence of intestinal helminths in stray cats in central Scotland. Research Note. A. A. McCOLM and W. M. HUTCHISON	255–257
Threonine and serine dehydratase activity in the buffalo liver-fluke <i>Fasciola indica</i> . R. S. TANDON and K. C. MISRA	259–262
Cytochemical studies on the prostate glands of the trematodes <i>Paramphistomum epiclitum</i> and <i>Paradistomoides orientalis</i> . USHA KANWAR and MAHDU KANSAL	263–266
Effect of high doses of gamma-irradiation on growth of <i>Hymenolepis diminuta</i> . Research Note. P. R. CHRISTIE and R. MOQBEL	267–269
Anticestode activity of 3,5-dibromo-2'-chlorosalicylanilide-4'-isothiocyanate – a preliminary report. Research Note. SUMAN GUPTA, J. C. KATIYAR, A. B. SEN, S. K. DUBEY, H. SINGH, S. SHARMA and R. N. IYER	271–273
Epidemiological observations on lungworm, <i>Dictyocaulus arnfieldi</i> , in donkeys from Morocco. V. S. PANDEY	275–279
Taeniasis, cysticercosis and echinococcosis/hydatidosis in Nigeria: I – prevalence of human taeniasis, cysticercosis and hydatidosis based on a retrospective analysis of hospital records. B. J. O. DADA	281–286
Taeniasis, cysticercosis and echinococcosis/hydatidosis in Nigeria: II – prevalence of bovine and porcine cysticercosis and hydatid disease in slaughtered food animals based on retrospective analysis of abattoir records. B. J. O. DADA	287–291
Taeniasis, cysticercosis and echinococcosis/hydatidosis in Nigeria: III – prevalence of bovine and porcine cysticercosis and hydatid cyst infection based on joint examination of slaughtered food animals. B. J. O. DADA	293–297
Taeniasis, cysticercosis and echinococcosis/hydatidosis in Nigeria: IV – prevalence of <i>Echinococcus granulosus</i> infection in stray dogs. B. J. O. DADA	299–301
Helminth parasites of wild cats in north-east Scotland. M. D. B. BURT, A. W. PIKE and L. K. CORBETT	303–308
<b>SUPPLEMENTARY REVIEW ARTICLE</b>	
Ascaridoid nematodes of Sirenians – the Heterocheilinae redefined. J. F. A. SPRENT	309–327
