

Introduction to Modeling Convection in Planets and Stars

Magnetic Field, Density Stratification,
Rotation

Gary A. Glatzmaier

- Describes how to create codes that simulate the internal dynamics of planets and stars
- Builds on basic concepts and simple methods
- Shows how to improve the efficiency and accuracy of the numerical methods
- Describes more relevant geometries and boundary conditions
- Demonstrates how to incorporate more sophisticated physics

“Glatzmaier’s work is synonymous with the cutting edge of research in this field, and his tried-and-true presentation has been perfected over many years of teaching. This is an ideal tutorial for graduate students, and will also be of great interest to senior researchers.”

Proceedings of the Edinburgh Mathematical Society

Published for The Edinburgh Mathematical Society

Editorial Management

The Secretary, *ICMS, Edinburgh, UK*

The Edinburgh Mathematical Society was founded in 1883 and over the years, has evolved into the principal society for the promotion of mathematics research in Scotland. The Society has published its Proceedings since 1884. This journal contains research papers on topics in a broad range of pure and applied mathematics, together with a number of topical book reviews.

Glasgow Mathematical Journal

Published for The Glasgow Mathematical Journal Trust

Editor-in-Chief

I. A. B. Strachan, *University of Glasgow, UK*

Glasgow Mathematical Journal publishes original research papers in any branch of pure and applied mathematics. An international journal, its policy is to feature a wide variety of research areas, which in recent issues have included ring theory, group theory, functional analysis, combinatorics, differential equations, differential geometry, number theory, algebraic topology, and the application of such methods in applied mathematics.

The European Physical Journal - Applied Physics

Marketed and distributed on behalf of ÉDP Sciences

Editor-in-Chief

B. Drévillon, LPCIM, France

EPJ-AP is an international journal devoted to the promotion of the recent progresses in all fields of applied physics. The articles published in *EPJ-AP* span the whole spectrum of applied physics research including semiconductors, organic materials, thin films, nanotechnology, photonics, spintronics, magnetism, plasma, energy generation transfer, metrology, fluids and microfluidics, biophysics and biosensors, surfaces and interfaces.

554 Boundary-layer flow and bed shear stress
under a solitary wave: revision
**Y. S. Park, J. Verschaeve, G. K. Pedersen &
P. L.-F. Liu**

560 The planar X-junction flow: stability analysis
and control – CORRIGENDUM
**I. Lashgari, O. Tammisola, V. Citro,
M. P. Juniper & L. Brandt**

JFM Rapids (online only)

S R1 Instability of a gravity current within a
soap film
**R. E. Goldstein, H. E. Huppert,
H. K. Moffatt & A. I. Pesci**

S indicates supplementary data or movies available online.

- 1 The planar X-junction flow: stability analysis and control
I. Lashgari, O. Tammisola, V. Citro, M. P. Juniper & L. Brandt
- 29 Role of slipstream instability in formation of counter-rotating vortex rings ahead of a compressible vortex ring
C. L. Dora, T. Murugan, S. De & D. Das
- 49 Electrophoresis of bubbles
O. Schnitzer, I. Frankel & E. Yariv
- 80 Topographic control of stratified flows: upstream jets, blocking and isolating layers
K. B. Winters & L. Armi
- 104 Test of the anomalous scaling of passive temperature fluctuations in turbulent Rayleigh–Bénard convection with spatial inhomogeneity
X. He, X.-D. Shang & P. Tong
- S 131 Shear-imposed falling film
A. Samanta
- 150 Numerical simulation of sand waves in a turbulent open channel flow
A. Khosronejad & F. Sotiropoulos
- 217 The influence of nonlinear bottom friction on the properties of decaying cyclonic and anticyclonic vortex structures in a shallow rotated fluid
S. V. Kostykin, A. A. Khapaev & I. G. Yakushkin
- S 242 Stratified shear flow: experiments in an inclined duct
C. R. Meyer & P. F. Linden
- 254 Steady streaming in a two-dimensional box model of a passive cochlea
E. Edom, D. Obrist & L. Kleiser
- 279 A parametric study of the coalescence of liquid drops in a viscous gas
J. E. Sprittles & Y. D. Shikhmurzaev
- 307 The generalized Onsager model for a binary gas mixture
V. Kumaran & S. Pradhan
- 360 Effects of radiation in turbulent channel flow: analysis of coupled direct numerical simulations
R. Vicquelin, Y. F. Zhang, O. Gicquel & J. Taine
- 402 On grid-generated turbulence in the near- and far field regions
J. C. Isaza, R. Salazar & Z. Warhaft
- 427 Trapped modes and scattering for oblique waves in a two-layer fluid
M. I. Romero Rodríguez & P. Zhevandrov
- 448 Thermoacoustic instability – a dynamical system and time domain analysis
T. Sayadi, V. Le Chenadec, P. J. Schmid, F. Richecoeur & M. Massot
- 472 Inertial wave dynamics in a rotating liquid metal
T. Vogt, D. Rübiger & S. Eckert
- 499 Large-eddy simulation of turbulence and particle dispersion inside the canopy roughness sublayer
Y. Pan, M. Chamecki & S. A. Isard
- 535 Viscous Marangoni migration of a drop in a Poiseuille flow at low surface Péclet numbers
O. S. Pak, J. Feng & H. A. Stone
- 553 Boundary layer flow and bed shear stress under a solitary wave – CORRIGENDUM
P. L.-F. Liu, Y. S. Park & E. A. Cowen
