

# The Lexicon in Acquisition

EVE V. CLARK

In *The Lexicon in Acquisition* Eve Clark argues for the centrality of the lexicon in language and language acquisition. Starting with children's emerging knowledge of conventional words and meanings, she takes up their growing knowledge of word structure as reflected in their formation of new words.

## **Language Acquisition Problems and Reading Disorders**

### **Aspects of Diagnosis and Intervention**

Editor: Hannelore Grimm, Helmut Skowronek

1993. 17.0 x 24.0 cm. XII, 360 pages. Cloth. DM 172.00 ISBN 3-11-014120-5  
Prevention and Intervention in Childhood and Adolescence (PICA) 14

This volume offers a comprehensive report on the current state of research in the related areas of language development disorders and reading disorders. An attempt is made to establish which underlying relationships exist between the two disorders, which explanatory models and methods combine them and which therapeutical consequences may be drawn. For further research open questions and problems as well as future perspectives are presented in each article.

#### **Contents**

##### **Part 1: Deficits in children with specific language impairment**

Metalinguistic difficulties in children with specific language impairment (P. Menyuk) / Syntax and morphological difficulties in German-speaking children with specific language impairment (H. Grimm) / Commentary on Menyuk and Grimm: How well do we understand specific language impairment (M. Shatz) / Perceptual and cognitive deficits in children with specific language impairment (S. E. Weismer) / Commentary on Ellis Weismer: How specific is specific language impairment? (W. Deutsch) / Some consequences of specific language impairment (M.L. Rice) / Commentary on Rice: What do we know about the sequelae of socioemotional and cognitive consequences of specific language impairment? (S. Weinert) / Specific language impairment as a problem of accessing language knowledge (P.J. Connell, St.L. Franks, C.A. Stone) / Commentary on Connell, Franks and Stone: A Context and some implications (R.C. Naremore) / The relationship between speech-language impairments and reading disabilities (H.W. Catts) / Commentary on Catts: How to characterize continuity between preschool language disorders and reading disorders at school age (D.M. Aram)

##### **Part 2: Disorders of written language (developmental dyslexia)**

Implications of the Pittsburgh Study for issues of risk (Ch. Perfetti, M. Geori and Isabel Beck) / Commentary on Perfetti, Georgi and Beck: Children without phonemic awareness before learning to read. Are they at risk? (H. Wimmer) / Prediction of difficulties in reading and spelling on the basis of the Bielefeld Screening (H. Marx, H. Jansen, G. Mannhaupt, H. Skowronek) / Commentary on Marx, Jansen, Mannhaupt, Skowronek: The Bielefeld Screening Battery to predict reading and spelling difficulties (L.C. Ehri) / Two small longitudinal studies: I. Developmental dyslexia, II. Early reading development (N. Ellis) / Commentary on Ellis: Two conceptually-rich longitudinal studies (K.E. Stanovich) / Emerging literacy from kindergarten to second grade: Evidence from the Munich Longitudinal Study on the Genesis of Individual Competencies (J.C. Näslund and W. Schneider) / Interventions in developmental reading and spelling disorders (G. Scheerer-Neumann) / Commentary on Scheerer-Neumann: Organizing the literature on interventions for reading and writing disabilities (K.E. Stanovich)

## Essential Language from Cambridge

### **The Transition from Infancy to Language**

Acquiring the Power of Expression

*Lois Bloom*

Explores the expressive power children acquire as they begin to talk and analyzes their cognitive development, affect expression, and the social context for making the transition from prelinguistic expression to the expression of contents of mind.

1993 384 pp.

44031-9 Hardcover \$44.95

### **Sociocultural Approaches to Language and Literacy**

An Interactionist Perspective

*Edited by*

*Vera John-Steiner,  
Carolyn P. Panofsky,  
and Larry W. Smith*

Examines one of the most crucial areas of education—the acquisition of literacy—with an effective combination of theory and practice.

1994 384 pp.

37301-8 Hardcover \$59.95

*Now in paperback...*

### **Becoming a Reader**

The Experience of Fiction from Childhood to Adulthood

*J.A. Appleyard*

228 pp. 46756-X Paper \$14.95

### **Language Development from Two to Three**

*Lois Bloom*

524 pp. 43583-8 Paper \$24.95

# Puzzles of Development

## **THE DEVELOPMENT OF SPEECH PERCEPTION The Transition from Speech Sounds to Spoken Words**

*edited by Judith C. Goodman and  
Howard C. Nusbaum*

This comprehensive collection of current research in the development of speech perception and perceptual learning documents the striking changes that take place both in early childhood and throughout life and speculates about the mechanisms responsible for those changes. The findings reported from this rich and active field address the role of growing linguistic knowledge and experience and demonstrate that speech perception develops in a bidirectional interplay with several levels of linguistic structure and cognitive processes.

A Bradford Book 360 pp. \$42.50 (January)

## NOTES FOR CONTRIBUTORS

Articles, and papers for the Notes and Discussion section, should be sent to The Editor, Professor K. Perera, Department of Linguistics, University of Manchester, Manchester, M13 9PL, UK. All submissions are read by a member of the editorial team to check whether, with regard to readability and content, they are appropriate to send to referees. All eligible manuscripts are then sent, anonymously, to two referees. When the referees' reports are received, each manuscript is evaluated by the editorial team, and the Editor informs the author of their decision. Articles should be written in English and should not normally exceed 24 printed pages (roughly 10,000 words). Typescripts that conform to the following guidelines help to speed the production process. (For a more detailed style sheet, please write to the Editor.)

1. FOUR copies should be submitted.
2. Submissions should be typed on A4 paper (or 21.6 cm), on one side of the paper only. The entire text should be double-spaced, with ample margins.
3. Each copy should have a separate title page giving the title, the full names of the author(s) with their affiliations, any acknowledgements, a full address for correspondence and – at the top – a running headline of not more than 40 characters. Other pages in the typescript should NOT carry the author's name.
4. Each copy should have an abstract on a separate sheet (not more than 150 words long for articles and 100 words for notes). The abstract should give the aims of the study, the general method and the principal conclusions.
5. Articles should be clearly divided into appropriately-labelled but unnumbered sections: often, but not necessarily, Introduction, Method, Results, and Discussion. Side headings should be used within these sections, e.g. *Subjects*, *Procedure*, etc.
6. Footnotes, which are expensive to set, should not be used unless absolutely necessary; they should not contain phonetic characters or other special symbols. They should be numbered and listed on a separate sheet at the end of the article.
7. Each table and figure should be on a separate sheet at the end of the article; their position in the text should be clearly indicated. They should have a title and should be numbered independently of any numbered examples in the text. Figures should, if possible, be camera-ready.
8. Ages should be stated in years, months and – if necessary – days, like this: 1;10.22.
9. Phonetic transcriptions should, wherever possible, employ the IPA symbols.
10. Emphasis and technical terms should be marked by double underlining (small capitals). Standard linguistic abbreviations should be in large capitals, e.g. AUX, NP. Language examples in the body of the text should be underlined (italics). Translations and glosses should be given between single inverted commas.
11. References in the body of the text should be made like this:  
According to Snow (1990: 698); OR, In the sixties and seventies, several authors published important work on combinatorial speech (Braine, 1963; Miller & Ervin, 1964; Bloom, 1970; Schlesinger, 1974).

Note that such references are in DATE order, not alphabetical order, and that pairs of authors are joined by &.

12. All works referred to should be listed at the end of the article in alphabetical order, as in these examples:  
Cruttenden, A. (1986). *Intonation*. Cambridge: C.U.P.  
Karmiloff-Smith, A. (1986). Some fundamental aspects of language development after age five. In P. Fletcher & M. Garman (eds), *Language acquisition: studies in first language development*. Second edition. Cambridge: C.U.P.  
O'Grady, W., Peters, A. M. & Masterson, D. (1989). The transition from optional to required subjects. *Journal of Child Language* 16, 513–29.
