Volume 49, Issues 1-4  
eISSN: 1938-5331; ISSN: 0094-8373

### Editor-in-Chief

James Crampton, Victoria University of Wellington | Te Herenga Waka, New Zealand

### Editors

Kevin Boyce, Stanford University, USA  
Nadia Fröbisch, Museum für Naturkunde, Germany  
Melanie Hopkins, American Museum of Natural History, USA  
Erin Saupe, University of Oxford, UK

### Managing Editor

Jessica Kastigar, Cincinnati, OH, USA

### Associate Editors

Nicolás Campione, University of New England, Australia  
Laurel Collins, Florida International University, USA  
Matt Friedman, University of Michigan, USA  
John Huntley, University of Missouri, USA  
Lee Hsiang Liow, University of Oslo, Norway  
Cynthia Looy, University of California Berkeley, USA  
Caroline Strömberg, University of Washington, USA  
Adam Tomasovych, Slovak Academy of Sciences, Slovak Republic  
Rachel Warnock, Friedrich-Alexander-Universität Erlangen-Nürnberg, Germany

Information about editors and editorial board members correct as of 1st January 2023. For the latest information please see <https://www.cambridge.org/core/journals/paleobiology/information/editorial-board>

### The Patrons Fund

The Patrons Fund was established to broaden the basis of financial support for Paleobiology and thus to encourage paleontological publication.

To become a Patron, send a check payable to Paleobiology to:

Paleobiology Patrons Fund  
The Paleontological Society  
P.O. Box 9044  
Boulder, CO 80301-9044.

The Paleontological Society gratefully acknowledges the following Patrons of Paleobiology:

PAOLO CUSTODI	MARK PATZKOWSKY	SHERMAN SUTER
DOUGLAS ERWIN	JONATHAN PAYNE	ROGER THOMAS
JOHN HANDLEY	DAVID RODLAND	BRUCE TIFFNEY
ALAN LORD	IN MEMORY OF TOM SCHOPF	RON WASZCZAK
HARUYOSHI MAEDA	ANDREJ SPIRIDONOV	JOHNNY WATERS
WILLIAM MILLER III	JACEK SULANOWSKI	

### Aims & Scope

Paleobiology publishes original contributions of any length (but normally 10-50 manuscript pages) dealing with any aspect of biological paleontology. Emphasis is placed on biological or paleobiological processes and patterns, including macroevolution, extinction, diversification, speciation, functional morphology, bio-geography, phylogeny, paleoecology, molecular paleontology, taphonomy, natural selection and patterns of variation, abundance, and distribution in space and time, among others. Taxonomic papers are welcome if they have significant and broad applications. Papers concerning research on recent organisms and systems are appropriate if they are of particular interest to paleontologists. Papers should typically interest readers from more than one specialty. Proposals for symposium volumes should be discussed in advance with the editors.

### The Paleontological Society

The Paleontological Society is an international nonprofit organization devoted exclusively to the advancement of the science of paleontology: invertebrate and vertebrate paleontology, micropaleontology, and paleobotany. The Society was founded in 1908 in Baltimore, Maryland, and was incorporated in April 1968 in the District of Columbia. The Society has several membership categories, including regular, student, and retired. Members, representing 40 countries, consist of professional paleontologists, academicians, science editors, earth-science teachers, museum specialists, and undergraduate and graduate students and post doctoral scholars, as well as avocational paleontologists.
