Guidelines for Contributors

Annals of Actuarial Science

Annals of Actuarial Science (AAS) is published twice yearly by Cambridge University Press for the Institute and Faculty of Actuaries. *AAS* accepts manuscript submissions through the ScholarOne Manuscripts system at: https://mc.manuscriptcentral.com/aoas

Papers on any area of actuarial research or practice are welcome and will be considered for publication. Suitable topics include, but are not restricted to: new developments in actuarial practice; original research in actuarial science and related fields; or reviews of developments in a field of interest to the actuarial profession.

All papers should be written in English (UK). The style should be reasonably formal, but should be as clear and understandable as possible. Enough information should be included to allow a reader to reproduce any mathematical or numerical results.

All submitted papers are peer-reviewed by anonymous referees appointed by the Editor. Papers may need minor or major revisions before they can be accepted for publication, or they may be considered to be unsuitable for *AAS*. The Editor's decision is final.

Each paper must include an abstract, keywords and contact details of relevant authors. The abstract, which should be about 100–200 words, should be written so that others are encouraged to read the paper. It should give the main objectives and conclusions of the paper.

All published work should be acknowledged, and references given. The author is responsible for securing written permission to include any copyrighted material. Notwithstanding any scrutiny and any alterations made, authors remain solely responsible for the accuracy of all material provided and views expressed. Submitted papers should not have been copyrighted or submitted for possible publication elsewhere at the same time as being submitted to *AAS*. Any previous publication, for example in conference proceedings, should be notified to the editor at the time of submission. If the paper is accepted for publication the author(s) must sign a copyright declaration, transferring copyright to the Institute and Faculty of Actuaries.

Please visit https://cambridge.org/core/services/open-access-policies for information on our open access policies, compliance with major funding bodies, and guidelines on depositing your manuscript in an institutional repository.

Any enquiries should be addressed to the Editor,
