

ADVANCES IN APPLIED PROBABILITY
VOLUME 45 (2013): INDEX
Stochastic Geometry and Statistical Applications

	PAGES
BACCELLI, F., COUPIER, D. AND TRAN, V. C. Semi-infinite paths of the two-dimensional radial spanning tree	895–916
BENEŠ, V. <i>see</i> ŠEDIVÝ, O.	
BUCHTA, C. Exact formulae for variances of functionals of convex hulls	917–924
BURRIDGE, J., COWAN, R. AND MA, I. Full- and half-Gilbert tessellations with rectangular cells	1–19
CALKA, P. <i>see</i> TYKESSON, J.	
COUPIER, D. <i>see</i> BACCELLI, F.	
COWAN, R. Line segments in the isotropic planar STIT tessellation	295–311
— <i>see</i> BURRIDGE, J.	
HEINRICH, L. AND SPIESS, M. Central limit theorems for volume and surface content of stationary Poisson cylinder processes in expanding domains	312–331
HIRSCH, C., NEUHÄUSER, D. AND SCHMIDT, V. Connectivity of random geometric graphs related to minimal spanning forests	20–36
KIDERLEN, M. <i>see</i> THÓRISDÓTTIR, Ó.	
KRATOCHVÍLOVÁ, B. <i>see</i> ŠEDIVÝ, O.	
KURONEN, M. AND LESKELÄ, L. Hard-core thinnings of germ–grain models with power-law grain sizes	595–625
LESKELÄ, L. <i>see</i> KURONEN, M.	
MA, I. <i>see</i> BURRIDGE, J.	
NEUHÄUSER, D. <i>see</i> HIRSCH, C.	
SCHMIDT, V. <i>see</i> HIRSCH, C.	
ŠEDIVÝ, O., STANĚK, J., KRATOCHVÍLOVÁ, B. AND BENEŠ, V. Sliced inverse regression and independence in random marked sets with covariates	626–644
SPIESS, M. <i>see</i> HEINRICH, L.	
STANĚK, J. <i>see</i> ŠEDIVÝ, O.	
THÓRISDÓTTIR, Ó. AND KIDERLEN, M. Wicksell’s problem in local stereology	925–944
TRAN, V. C. <i>see</i> BACCELLI, F.	
TYKESSON, J. AND CALKA, P. Asymptotics of visibility in the hyperbolic plane	332–350
