

PARASITOLOGY

A SUPPLEMENT TO THE
JOURNAL OF HYGIENE

The Journal will be issued at intervals determined by the material received by the Editors. A volume containing about 400 to 500 pages, with plates and figures, will be issued annually. The price to subscribers, payable in advance, will be £1. 1s. *net* per volume (post free). *Subscribers to the Journal of Hygiene* may obtain *Parasitology* at the reduced price of 15s. *net* per volume.

TICKS

A Monograph of the Ixodoidea

Part I. The Argasidae

SECTION I

Dealing with the Classification of the Argasidae—The differences between Argasidae and Ixodidae—the family characters of the Argasidae (Synonymy and Literature)—the genera *Argas* and *Ornithodoros*, their structure and classification, with synonymy and literature relating to all the well established, doubtful and condemned species.

SECTION II

Dealing with the general biology of the Argasidae, the effects of their bites, their relation to the spread of disease.

Part I, pp. x+122, will include 116 text figures and 3 plates

Price of Part I 5 shillings net

Fellow of Magdalene College,

Quick Professor of Biology in the University of Cambridge,

CECIL WARBURTON

M.A., F.Z.S.

Christ's College, Zoologist to the Royal Agricultural Society,

W. F. COOPER

and

L. E. ROBINSON

B.A., F.Z.S., F.I.S.

A.R.C.Sc. (London).

The discovery of the economic importance of ticks as carriers of disease to man and domesticated animals has led to a vast increase of our knowledge of this group. No existing work in any language attempts to deal with the subject in a comprehensive manner, and the student is confronted with a very extensive and widely scattered literature from which he derives an impression of hopeless confusion. There is, therefore, urgent need for a work of the nature here attempted.

The book will deal with the Classification, Structure and Biology of Ticks, the study of the group having occupied the authors for several years. Practically all that has been published on the subject has received adequate consideration. The parts on Classification have entailed much labour since it was found necessary to revise a large amount of the work which has been done by others. The book will be very fully illustrated by numerous text figures and plates, the majority of which are original; the remainder have been reproduced from the best sources.

The book will be issued in about four parts, which will be complete in themselves but are designed to form a volume of about 500 pages when all the parts have been published. Each part will be issued in a stiff paper cover and will include a bibliography printed on one side of thin paper so that the references can be conveniently cut out and gummed on index cards. A complete bibliography, including all the publications cited in each part, will conclude the volume.

PARASITOLOGY

A SUPPLEMENT TO THE JOURNAL OF HYGIENE

Edited by GEORGE H. F. NUTTALL, F.R.S., Quick Professor of Biology in the University of Cambridge, and A. E. SHIPLEY, F.R.S., University Lecturer in the Advanced Morphology of the Invertebrate.

When the *Journal of Hygiene* was founded it was announced that papers on Parasitology "in relation to hygiene and preventive medicine" would be published in its pages. It has however been felt for some time that the Journal was becoming unduly burdened with papers dealing with the anatomy of mosquitoes, fleas, protozoa and other parasites—of great importance in themselves—but having only an indirect relation to hygiene and preventive medicine.

The remarkable development of parasitology in recent years, and the increase in our knowledge of the part played by parasites in human and animal diseases, demand a means of publication, in the English language, of original papers dealing with the subject in its widest sense. It is proposed in future to relegate all such papers to *Parasitology*.

It is hoped that this publication will appeal not only to medical men at home and abroad, but to veterinarians, zoologists and agriculturalists.

Parasitology, though a supplement to the *Journal of Hygiene*, will be issued in the form of a separate yearly volume of four to five hundred pages. The parts will be issued when sufficient material has accumulated. The first two parts are now ready. The subscription price is £1. 1s. per volume (post-free), payable in advance; single numbers 7s. net. Subscribers to the *Journal of Hygiene* may obtain single numbers of *Parasitology* at the reduced price of 5s. net or may

PAUL ALTMANN,
 47, LUISEN-STRASSE,
 ECKE SCHUMANN-STRASSE,
 BERLIN, N.W., GERMANY,

Price : 22 Marks.

Manufacturer of all kind
 of apparatus and appliances
 for Chemistry, Bacteriology
 Microscopy and Hygiene.

CAMBRIDGE GEOGRAPHICAL SERIES.

GENERAL EDITOR: F. H. H. GUILLEMARD, M.D.,
 FORMERLY LECTURER IN GEOGRAPHY IN THE UNIVERSITY OF CAMBRIDGE.

THE GEOGRAPHY OF DISEASE

By FRANK G. CLEMOW, M.D. EDIN., D.P.H. CAMB.,

British Delegate to the Ottoman Board of Health, Physician to H.M. Embassy at Constantinople.

Crown 8vo. Cloth. 12 Maps and Charts. Price 15s.

LANCET.—"Dr Clemow's writings are well known to all epidemiologists and his intimate knowledge of the Russian language has enabled him to study the disease and death records of the vast population of that great European and Asiatic country in a manner which is impossible to most writers....In a preface upon the Geography of Disease and the factors which determine it we find discussed in a fascinating fashion the complex nature of the problem."

CAMBRIDGE UNIVERSITY PRESS

Royal 8vo. With 4 Portraits and 16 Plates. Price 25s. net.

THE BACTERIOLOGY OF DIPHTHERIA

including Sections on the History, Epidemiology and Pathology of the Disease, the Mortality caused by it, the Toxins and Antitoxins and the Serum Disease. By F. LOEFFLER, M.D., LL.D., ARTHUR NEWSHOLME, M.D., F.R.C.P., F. B. MALLORY, M.A., M.D., G. S. GRAHAM-SMITH, M.A., M.D., D.P.H., GEORGE DEAN, M.D., WILLIAM H. PARK, M.D. and CHARLES F. BOLDUAN, M.D.

Edited by

G. H. F. NUTTALL, M.D., PH.D., SC.D., F.R.S.,

Quick Professor of Biology in the University of Cambridge,

AND G. S. GRAHAM-SMITH, M.A., M.D.,

University Lecturer in Hygiene, Cambridge.

"A complete monograph upon diphtheria, written by those who are able to speak with the greatest authority upon the subjects with which they have been entrusted by the editors...The mere enumeration of the writers is a sufficient guarantee of the excellence of the work, and of the authority which it carries; whilst the articles are written in clear and good English, free, for the most part, from the technical terms which make many treatises on bacteriology difficult and unprofitable to read. The articles are well harmonized, and the teaching in regard to difficult and debatable points is marked by moderation and common sense."

Athenaeum, April 8, 1908.

Royal 8vo. Buckram. pp. xvi+592. Price 18s. net.

IMMUNITY IN INFECTIVE DISEASES

By ÉLIE METCHNIKOFF

Foreign Member of the Royal Society of London, Professor at the Pasteur Institute, Paris

TRANSLATED FROM THE FRENCH

By FRANCIS G. BINNIE

of the Pathological Department, University of Cambridge

With 45 figures in the text.

CONTENTS.

Chap. I. Immunity in unicellular organisms.—II. Immunity in multicellular plants.—III. Preliminary remarks on immunity in the animal kingdom.—IV. Resorption of the formed elements.—V. Resorption of albuminoid fluids.—VI. Natural immunity against pathogenic micro-organisms.—VII. The mechanism of natural immunity against micro-organisms.—VIII. Survey of the facts bearing on acquired immunity against micro-organisms.—IX. The mechanism of acquired immunity against micro-organisms.—X. Rapid and temporary immunity against micro-organisms, conferred by specific and normal serums, or by other substances, or by micro-organisms other than those against which it is desired to protect an animal.—XI. Natural immunity against toxins.—XII. Artificial immunity against toxins.—XIII. Immunity of the skin and mucous membranes.—XIV. Immunity acquired by natural means.—XV. Protective vaccinations.—XVI. Historical sketch of our knowledge of immunity.—XVII. Summary.

LANCET.—"That a translation of Professor Metchnikoff's valuable and fascinating book on Immunity should be made was most desirable, we might almost say indispensable, and those who may have been deterred from studying the original owing to its being in a foreign tongue will be grateful to Mr Binnie for the work which he has done...The book is most interesting reading...Study of it is indispensable to all who are specially interested in the subject of Immunity."
