

# Guidelines for Contributors

## Annals of Actuarial Science

*Annals of Actuarial Science* (AAS) is published twice yearly by the Institute and Faculty of Actuaries.

Papers on any area of actuarial research or practice are welcome and will be considered for publication. Suitable topics include, but are not restricted to: new developments in actuarial practice; original research in actuarial science and related fields; or reviews of developments in a field of interest to the actuarial profession.

All papers should be written in English (UK). The style should be reasonably formal, but should be as clear and understandable as possible. Enough information should be included to allow a reader to reproduce any mathematical or numerical results.

All papers are peer-reviewed by anonymous referees appointed by the Editor. Papers may need minor or major revisions before they can be accepted for publication, or they may be considered to be unsuitable for AAS. The Editor's decision is final.

Each paper must include an abstract, keywords, the name and affiliation of all authors and contact details of the corresponding author. The abstract, which should be about 100–200 words, should be written so that others are encouraged to read the paper. It should give the main objectives and conclusions of the paper.

Papers should be submitted electronically to the Editor, using pdf format. If the paper is accepted, a Word or LaTeX version will be required and all diagrams and figures must be provided separately in tif, gif, jpeg or eps format.

All published work must be acknowledged, and references given. The author is responsible for securing written permission to include any copyrighted material. Notwithstanding any scrutiny and any alterations made, authors remain solely responsible for the accuracy of all material provided and views expressed. Papers must not have been copyrighted or submitted for publication elsewhere at the same time as being submitted to AAS. Any previous publication, for example in conference proceedings, must be notified to the editor at the time of submission. If the paper is accepted for publication the author(s) must sign a copyright declaration, transferring copyright to the Institute and Faculty of Actuaries.

All correspondence should be addressed to the Editor below.
