Publisher: Katy Christomanou

Special sales and supplements:

This Journal accepts relevant advertisements and inserts. We also provide bulk reprints of suitable papers to meet teaching or promotional requirements. The journal also publishes supplements on behalf of academic and corporate collaborators. Please contact Katy Christomanou at the Cambridge address for further details. E-mail: kchristomanou@cambridge.org

Subscription information:

British Journal of Nutrition is an international journal published by Cambridge University Press on behalf of The Nutrition Society. The twelve issues starting January 2010 comprise Volume 103, the twelve issues starting July 2010 comprise Volume 104.

Annual subscription rates:

Volumes 103/104 (24 issues):
Internet/print package £954/\$1860/€1528
Internet only: £803/\$1566/€1283
Print only: £909/\$1772/€1477

Any **supplements** to this journal published in the course of the annual volume are normally supplied to subscribers at no extra charge.

Back volumes are available. Please contact Cambridge University Press for further information.

Claims for non-receipt of journal issues will be considered on their merit and only if the claim is received within six months of publication. Replacement copies supplied after this date will be chargeable.

US POSTMASTERS: please send address corrections to *British Journal of Nutrition*, Cambridge University Press, 100 Brook Hill Drive, West Nyack, New York 10994-2133.

Directions to Contributors are available from the Society at the address below or can be found on the Society's website at <http://www.nutritionociety.org> (an abbreviated Notes for Authors can be found inside the back cover).

Offprints: The author (or main author) of an accepted paper will receive a copy of the PDF file and a voucher copy of the issue in which their paper has been published. There will be an option to purchase paper offprints, these should be ordered at proof stage. No page charges are levied by this journal.

Copyright: As of 1 July 2000 the copyright of all articles submitted to *British Journal of Nutrition* are retained by the authors or their institutions. For articles prior to this date permission for reproduction of any part of the journal (text, figures, tables or other matter) in any form (on paper, microfiche or electronically) should be sought directly from the Society, at: The Publications Office, The Nutrition Society, 10 Cambridge Court, 210 Shepherds Bush Road, Hammersmith, London W6 7NJ, UK.

Editor-in-chief

K. Younger, Dublin Institute of Technology, Ireland

Nutrition Research Reviews presents up-to-date, concise, critical reviews of key topics in nutritional science in order to advance new concepts and hypotheses. The journal encourages the exchange of fundamental ideas on nutritional well-being in both humans and animals.

**CAMBRIDGE
UNIVERSITY PRESS**

(Contents continued from back cover)

Dietary Surveys and Nutritional Epidemiology

- Whole grain intake, incident hip fracture and presumed frailty in the Iowa Women's Health Study.
D. R. Jacobs, C. Hohe, J. Mursu, K. Robien & A. R. Folsom 1537–1543
- Factors associated with weaning practices in term infants: a prospective observational study in Ireland.
R. C. Tarrant, K. M. Younger, M. Sheridan-Pereira, M. J. White & J. M. Kearney 1544–1554
- Sugar intake and dental decay: results from a national survey of children in Scotland.
L. F. Masson, A. Blackburn, C. Sheehy, L. C. A. Craig, J. I. Macdiarmid, B. A. Holmes & G. McNeill 1555–1564

Innovative Technique

- Estimation of percentage body fat in 6- to 13-year-old children by skinfold thickness, body mass index and waist circumference.
S. Kriemler, J. Puder, L. Zahner, R. Roth, U. Meyer & G. Bedogni 1565–1572

- Erratum** 1573

Directions to Contributors - Concise Version**(Revised August 2007)**

The *British Journal of Nutrition* is an international peer-reviewed journal that publishes original papers, review articles, technical notes and short communications in English in all branches of nutritional science. **Prospective authors should note that they (or their institutions) now retain the copyright of their material published in the *British Journal of Nutrition*.** As a contributor you are asked to follow the guidelines set out below. For detailed information on the presentation of the technical content of your paper please see the full version of the **Directions to Contributors**, which can be downloaded from the Nutrition Society website (<http://www.nutrition-society.org>). Prospective authors may also contact the Publications Office directly on + 44 (0)20 7605 6555 (telephone), +44 20 7602 1756 (fax), or edoffice@nutsoc.org.uk (email).

Papers should be accompanied by a statement to the effect that the conditions laid down in the full Directions to Contributors are accepted. The statement should affirm that the submission represents original work that has not been published previously and which is not currently being considered by another journal. It should also confirm that each author has seen and approved the contents of the submitted paper. At the time of acceptance the authors should provide a completed copy of the 'Licence to Publish' (in lieu of copyright transfer). The Licence to Publish is available on the Nutrition Society website (<http://www.nutrition-society.org>). All relevant financial interests should be declared.

Text. Papers should be submitted with 1.5 line spacing and margins of at least 2 cm on each side. Text should be printed without underlining, bold or italics (except for scientific names). Standard abbreviations (e.g. Fig. and Figs.) and SI units should be used. **Typescripts can be submitted as Word, WordPerfect, EPS, Text, Postscript or RTF files. A Word processing format is required for production purposes once papers have been accepted. When substantial revisions are required to typescripts, authors are given the opportunity to do this once only, the need for any further changes should at most reflect any minor issues.**

Title Page. The first page should include a concise, informative title together with the names and addresses of the authors. A contact name for correspondence should be given and telephone, fax and email addresses provided. Authors should supply three or four key words or phrases (each containing up to three words). A short title of up to 45 characters is required as a running head.

Abstract. Each paper should commence with an accurate and informative abstract, written as a single paragraph. It should be complete in itself and intelligible without reference to the text or figures, and should not exceed 250 words.

Tables. Tables should be reduced to the simplest form, and should not duplicate information in the text or figures. They should be typed on separate pages, one page for each Table, at the end of the article and carry headings describing their content.

Illustrations. The original illustrations should accompany the submitted typescript. Text figures, line drawings, computer-generated figures and graphs should be of sufficient size and quality to allow for reduction by half or two-thirds. Half-tone photographs are acceptable where they clearly contribute to the text. All figures should be numbered and legends should be provided.

Note that authors will be charged 350 GBP for the publication of colour figures. Authors from countries entitled to free journal access through HINARI will be exempt from these charges.

References. References should be based on the numbered (Vancouver) system. **When an article has more than ten authors, only the names of the first three should be given followed by *et al.*; give abbreviated journal titles and conform to the following styles:**

- Goel V, Cheema SK, Agellon LB, Ooraikul B & Basu TK (1999) Dietary rhabarb (*Rheum rhaponticum*) stalk fibre stimulates cholesterol 7 α -hydroxylase gene expression and bile acid excretion in cholesterol-fed C57BL/6J mice. *Br J Nutr* **81**, 65–71.
- Jenkins DJ, Kendall CW, Marchie A, *et al.* (2003) The effect of combining plant sterols, soy protein, viscous fibres, and almonds in treating hypercholesterolemia. *Metabolism* **52**, 1478–1483.
- Brandtzaeg P (2003) Role of local immunity and breast-feeding in mucosal homeostasis and defence against infections. In *Nutrition and Immune Function*, pp. 273–320 [PC Calder, CJ Field and HS Gill, editors]. Wallingford, Oxon: CAB International.
- Stock M & Rothwell NJ (1982) *Obesity and Leanness: Basic Aspects*. London: John Libbey.

Citations should be numbered consecutively in the order in which they first appear in the text using superscript Arabic numerals in parentheses, e.g. 'The conceptual difficulty of this approach has recently been highlighted^(1,2–4). If a reference is cited more than once the same number should be used each time.

Referees. Authors are asked to submit the names of up to four scientists who would be well-qualified to review the paper; however, no more than one such reviewer will be used. The email addresses and institutions of the named reviewers should be given.

Proofs. PDF page proofs will be emailed to authors for checking, and should be returned within 3 days (by fax or Express mail) to the BJN Production Editor, Cambridge University Press, The Edinburgh Building, Shaftesbury Road, Cambridge CB2 2RU, UK; fax +44 1223 325802, email bjnproduction@cambridge.org

Typescripts. The *British Journal of Nutrition* operates an on-line submission and reviewing system (eJournalPress). **Authors should submit to the following address:** <http://bjn.msubmit.net/> If any difficulties are encountered please contact the Publications Office (details above) immediately.

Contents

Review Article

- Sweet-taste receptors, low-energy sweeteners, glucose absorption and insulin release.
A. G. Renwick & S. V. Molinary 1415–1420

Molecular Nutrition

- Effects of different dietary protein sources on expression of genes related to protein metabolism in growing rats.
J. Luo, D. Chen & B. Yu 1421–1428
- Relationship of protein molecular structure to metabolisable proteins in different types of dried distillers grains with solubles: a novel approach.
P. Yu & W. G. Nuez-Ortín 1429–1437

Metabolism and Metabolic Studies

- Acute supplementation with keto analogues and amino acids in rats during resistance exercise.
R. D. de Almeida, E. S. Prado, C. D. Llosa, A. Magalhães-Neto & L.-C. Cameron 1438–1442
- Trans-8, cis-10 + cis-9, trans-11-conjugated linoleic acid mixture alters body composition in Syrian golden hamsters fed a hypercholesterolaemic diet.
S. V. Joseph, X. Liu, A. Wakefield, P. Y. Chouinard, H. Aukema, P. J. H. Jones & H. Jacques 1443–1449
- High-fat diet results in postprandial insulin resistance that involves parasympathetic dysfunction.
R. A. Afonso, W. W. Lutt, J. Schafer, D. J. Legare, A. G. Oliveira & M. P. Macedo 1450–1459
- Dietary histidine supplementation prevents cataract development in adult Atlantic salmon, *Salmo salar* L., in seawater.
R. Waagbø, C. Trøfje, W. Koppe, R. Fontanillas & O. Breck 1460–1470
- Effect of dietary fibre mixture on growth and intestinal iron absorption in rats recovering from iron-deficiency anaemia.
T. K. Weber, K. de Cássia Freitas, O. M. S. Amancio & M. B. de Moraes 1471–1476

Nutritional Immunology

- Nutritional sensitivity of periparturient resistance to nematode parasites in two breeds of sheep with different nutrient demands.
A. Kidane, J. Houdijk, S. Athanasiadou, B. Tolkamp & I. Kyriazakis 1477–1486

Human and Clinical Nutrition

- Both high and low serum vitamin D concentrations are associated with tuberculosis: a case-control study in Greenland.
N. O. Nielsen, T. Skifte, M. Andersson, J. Wohlfahrt, B. Søborg, A. Koch, M. Melbye & K. Ladefoged 1487–1491
- Active recovery training does not affect the antioxidant response to soccer games in elite female players.
H. Andersson, A. Karlsen, R. Blomhoff, T. Raastad & F. Kadi 1492–1499
- Ability of a high-total antioxidant capacity diet to increase stool weight and bowel antioxidant status in human subjects.
M. A. Bianchi, F. Scazzina, D. Del Rio, S. Valtueña, N. Pellegrini, L. Franzini, M. L. Callegari, C. Pellacani, A. Buschini, I. Zavaroni & F. Brighenti 1500–1507
- Reference distribution of the bioelectrical impedance vector in healthy term newborns.
A. V. B. Margutti, J. P. Monteiro & J. S. Camelo Jr 1508–1513
- Effect of multifibre mixture with prebiotic components on bifidobacteria and stool pH in tube-fed children.
D. Guimber, B. Bourgois, L. Beghin, S. Neuville, P. Pernes, K. B. Amor, A. Goedhart, J. Sijben, J. Knol & F. Gottrand 1514–1522
- Effects of low-fat dairy consumption on markers of low-grade systemic inflammation and endothelial function in overweight and obese subjects: an intervention study.
L. E. C. van Meijl & R. P. Mensink 1523–1527
- The effect of farmed trout on cardiovascular risk markers in healthy men.
J. Hallund, B. O. Madsen, S. H. Bügel, C. Jacobsen, J. Jakobsen, H. Krarup, J. Holm, H. H. Nielsen & L. Lauritzen 1528–1536
