

The Science of Speleology

edited by T. D. Ford and C. H. D. Cullingford

August 1976, xvi+600 pp.

£14.00/\$29.50 0.12.262550.1

Each chapter of this remarkable book covers a different scientific discipline in its particular application to speleology. The natural phenomena of caves are described, and the methods of investigation considered in detail. Examples are drawn from caves throughout the world, providing the reader with a rich and varied range of cave forms and their contents. The contributors, all recognized authorities, are

also experienced cavers, and provide sound practical guidance to field study.

The fascination of caves extends far beyond the confines of the research laboratory, and this book will be a stimulating source of information for all those with a general interest in caving, as well as those engaged in detailed study.

The Evolution of the Crystalline Rocks

edited by D. K. Bailey and R. Macdonald

November/December 1976 xii+484 pp.

£16.00/\$35.00 0.12.073450.8

This book illuminates the rationale of experimental petrology and highlights the major developments in key areas. Enormous advances have been made in this field over the last few decades, widening the gap between the experimentalist and the geologist. This book seeks to bridge that gap.

Each of the contributors brings the special combination of experimental *and* geological experience to this topic, and stresses the geological applications to a major group of rocks. The result is a series of perspectives, which reveal the limitations as well as the great achievements of experimental studies applied to rocks.

Contents

ARTICLES

(Figures in bold type denote number of issue)

AGUIRRE, L.

Structural evolution of the Northernmost Andes, Colombia, **5**, 475

ALI, M. T.

The significance of a mid-Cretaceous cobble conglomerate, Beer District, South Devon, **2**, 151

BENNETT, M. C.

The ultramafic–mafic complex at North Cape, northernmost New Zealand, **1**, 61

BOWES, D. R., HOPGOOD, A. M. & PIDGEON, R. T.

Source ages of zircons in an Archaean quartzite, Rona, Inner Hebrides, Scotland, **6**, 545

BRERETON, N. R., HOOKER, P. J. & MILLER, J. A.

Some conventional potassium–argon and $^{40}\text{Ar}/^{39}\text{Ar}$ age studies of glauconite (Plate 1), **4**, 329

BRUNSDEN, D., DOORNKAMP, J. C., GREEN, C. P. & JONES, D. K. C.

Tertiary and Cretaceous sediments in solution pipes in the Devonian Limestone of South Devon, England, **5**, 441

CAMERON, W. E.

Coexisting sillimanite and mullite (Plates 1–2), **6**, 497

CHALLINOR, J.

The ‘Precambrian’ in Cambria, **5**, 449

CRIMES, T. P. & MARCOS, A.

Trilobite traces and the age of the lowest part of the Ordovician reference section for N.W. Spain (Plates 1–2), **4**, 349

CROWTHER, P. R. & JENKINS, C. J.

Retiolitids from the Llanvirn and Darriwillian (Plate 1), **3**, 277

DESMET, A. P.

Evidence of co-genesis of the Troodos Lavas, Cyprus, **2**, 165

DE WIT, M. J.

A note on the origin of syntectonic porphyroblasts and their inclusion fabrics (Plates 1–3), **4**, 383

DUNCAN, A. M.

Pyroclastic flow deposits in the Adrano area of Mount Etna, Sicily, **4**, 357

DURRANCE, E. M.

A gravity survey of Islay, Scotland, **3**, 251

FITCH, F. J., MILLER, J. A. & HOOKER, P. J.

Single whole rock K–Ar isochrons, **1**, 1

FRENCH, W. J.

Rock composition, density and a variation diagram, 4, 371

FREUND, R. & MERZER, A. M.

The formation of rift valleys and their zigzag fault patterns (Plate 1), 6, 561

FUNNELL, B. M.

Geological Hazards, 5, 487

FURNISH, W. M., GLENISTER, B. F., KUMMEL, B., SPINOSA, C., SWEET, W. & TEICHERT, C.

Reinterpretation of ceratitic ammonoids from the Greville Formation, New Zealand, 1, 39

H AidUTOV, I. S.

A greenstone belt–basement relationship in the Tanganyika shield, 1, 53

HUGHES, N. F., HARLAND, W. B. & SMITH, D. G.

Preservation and abundance of palynomorphs in Svalbard, 3, 233

JULL, R. K.

Review of some species of *Favistina*, *Nyctopora*, and *Calapoecia* (Ordovician corals from North America) (Plates 1–4), 5, 457

KNOX, G. J.

The early Tertiary deep-water sandstones near San Sebastian, Spain; some aspects of diagenesis (Plates 1–4), 4, 341

LEITCH, E. C.

Emplacement of an epizonal granodiorite pluton λ by vertical block elevation, 6, 553

MACRAE, N. D., GRANT, M. & KULLERUD, G.

A note on the sulphurization of Fe–Tremolite (Plate 1), 6, 575

MATTHEWS, D. W.

Post-cumulus disruption of the Lilloise Intrusion, East Greenland (Plate 1), 3, 287

MAW, U BA, SAN, U BO, ROSS, J. R. P. & CIOCHON, R. L.

The Ordovician Bryozoan (Ectoproct) *Diplotrypa* from Central Burma (Plate 1), 6, 515

McCLAY, K. R. & CAMPBELL, I. H.

The structure and shape of the Kimberlana Intrusion, Western Australia, as indicated by an investigation of the Bronzite Complex, 2, 129

MITCHELL, J. G., JONES, E. J. W. & JONES, G. T.

The composition and age of basalts dredged from the Blackstones igneous centre, western Scotland, 6, 525

NAMI, M.

An exhumed Jurassic meander belt from Yorkshire, England (Plates 1–2), 1, 47

PAUL, C. R. C.

Ordovician echinoderms from Greenland, 1, 29

- PICKERILL, R. K.
Vermiforichnus borings from the Ordovician of central Wales, **2**, 159
- PLIMER, I. R.
Garnet–biotite relationships in high grade metamorphic rocks at Broken Hill, Australia, **3**, 263
- REID, R. E. H.
Late Cretaceous climatic trends, faunas, and hydrography in Britain and Ireland, **2**, 115
- ROBERTS, D. E.
Cleavage formation in the Skiddaw Slates of the northern Lake District, England (Plates 1–2), **4**, 377
- ROCK, N. M. S.
The role of CO₂ in alkali rock genesis, **2**, 97
- ROMANO, M.
The trilobite genus *Placoparia* from the Ordovician of the Valongo area, North Portugal (Plate 1), **1**, 11
- ROOBOL, M. J.
Post-eruptive mechanical sorting of pyroclastic material – an example from Jamaica (Plates 1–2), **5**, 429
- SCRUTTON, C. T., HORSFIELD, W. T. & HARLAND, W. B.
Silurian fossils from western Spitsbergen, **6**, 519
- SHOTTON, F. W.
Amplification of the Wolstonian Stage of the British Pleistocene, **3**, 241
- SMITH, D. G., HARLAND, W. B., HUGHES, N. F. & PICKTON, C. A. G.
The geology of Kong Karls Land, Svalbard, **3**, 193
- STUART, A. J. & WEST, R. G.
Late Cromerian Fauna and Flora at Ostend, Norfolk, **5**, 469
- SUÁREZ, M. & PETTIGREW, T. H.
An Upper Mesozoic island-arc-back-arc system in the southern Andes and South Georgia, **4**, 305
- TAMMEMAGI, H. Y.
Radioelement concentrations in British Tertiary Granites, **3**, 271
- THAKUR, V. C. & TANDON, S. K.
Significance of pebble and mineral lineation in the Chamba syncline of Punjab Himalaya, Himachal Pradesh, India, **2**, 141
- TUCKER, M. E.
Quartz replaced anhydrite nodules ('British Diamonds') from the Triassic of the Bristol District (Plates 1–2), **6**, 569
- TURNER, P., TARLING, D. H., ARCHER, R. & DONOVAN, R. N.
A palaeomagnetic argument concerning post-Devonian displacement along the Great Glen Fault, **4**, 365

WATERHOUSE, J. B. & BONHAM-CARTER, G.

Range, proportionate representation, and demise of brachiopod families through Permian Period, **5**, 401

WEAVER, J. D.

Seismically-induced load structures in the basal Coal Measures, South Wales, **6**, 535

WILLIAMS, D. M.

Clastic dykes from the Precambrian Porsangerfjord Group, North Norway (Plates 1-2), **2**, 169

WILLIAMS, H. R.

An erosional structure in a layered dolerite dyke, West Greenland (Plates 1-2), **1**, 77

CORRESPONDENCE

BATE, R. H. New name for *Rhadinocythere* Bate, 1975, **5**, 489

NOTES FOR CONTRIBUTORS

Contributions for publication should be addressed to The Editors, Geological Magazine, Sedgwick Museum, Downing Street, Cambridge, CB2 3EQ, England.

All contributions, whether articles, correspondence or reviews, must be typed in duplicate on one side of the paper, double spaced throughout, with a wide margin on the left of each page and a narrower margin on the right. Any minor corrections should be made neatly in the typescript, leaving the margins clear.

The total length of a paper should not in general exceed 20 pages of the Geological Magazine; preference and priority are given to short papers. Longer papers (between 20 and 40 pages of Geological Magazine) will from time to time be considered, but authors wishing to submit such manuscripts should first request further details.

The accuracy of references is the responsibility of authors. References must be double spaced and abbreviated in the form of the *World List of Scientific Periodicals* 4th Edition as far as possible, e.g. Lapworth, C. 1878. The Moffat Series. *Q. Jl geol. Soc., Lond.* **34**, 240–343. Books should be cited briefly as: Burns, R. G. 1970. *Mineralogical applications of crystal field theory*. 224 p., C.U.P., London. Unpublished work, e.g. from theses, should normally be referred to in the text in parentheses and not included in the reference list unless in the press.

Articles must be accompanied by a brief summary. Contributions should follow the general style of papers in recent issues of the Magazine and the principles laid down in *Notes to Authors* (*Proc. Geol. Soc. Lond.*, No. 1627. Oct. 1965). Headings should be set out clearly, but not underlined. Primary headings should be in lower case, at margin, with arabic numeral; sub-headings should be numbered 2.a, 2.b, etc., and tertiary headings 2.a.1., 2.a.2. No cross references should be given by page number, but 'above' and 'below' should be used with the section specified, e.g. Section 2.a.1.

Illustrations must be drawn to allow reduction to maximum size of 165 mm × 110 mm; originals must not exceed 495 mm × 330 mm and must be sent in a flat package. Lettering must allow for legibility after reduction (i.e. equivalent to 1 mm as a minimum on reduction). Duplicates of illustrations may be prints or, preferably, reductions. Metric units of the SI system are preferred. Illustrations in the text will be referred to as figures (Fig. 2, 2a, etc.), and halftone plates will be referred to (also in arabic) as Plates 2, 2a, etc. Folding plates will not be accepted. Captions for figures and plates must be typed on separate sheets.

Twenty-five offprints of each paper will be provided free of charge. Additional offprints may be purchased according to a set scale of charges.
