JOURNAL OF PLASMA PHYSICS

https://doi.org/10.1017/S0022377800003391 Published online by Cambridge University Press

The JOURNAL OF PLASMA PHYSICS exists for the publication of experimental and theoretical research papers on plasma physics and its applications. The JOURNAL is issued in quarterly parts forming one volume.

EDITOR

DR J. P. DOUGHERTY

Department of Applied Mathematics and Theoretical Physics, University of Cambridge, Silver Street, Cambridge, England

ASSOCIATE EDITORS

PROF. D. BERSHADER

Department of Aeronautics and Astronautics, Stanford University, Stanford, California 94305, U.S.A.

PROF. F. D. KAHN

Department of Astronomy University of Manchester, Manchester 13, *England*

PROF. W. B. THOMPSON

Department of Physics, University of California, La Jolla, California 92038, *U.S.A.*

Authors wishing to have papers published in the JOURNAL should communicate them to any one of the persons named above, choosing one in their own country where possible.

Authors are urged to ensure that their papers are written clearly and attractively, in order that their work will be readily accessible to readers.

Manuscripts should be typed in double spacing on one side of the paper only, with references listed at the end in alphabetical order of authors. Drawings should be done in Indian ink on plain white or transparent paper, and should not be larger than 15 in. by 24 in. Lettering should be shown clearly in pencil for reproduction by the printer, and as far as possible information relating to a figure should be placed in the caption rather than on the figure. A typed list of captions should be provided at the end of the manuscript. Proofs of papers from overseas will usually be despatched to authors by airmail. There is no charge for publication. Authors are entitled to receive 50 offprints of a paper in the JOURNAL free of charge, and additional offprints can be purchased if ordered in advance.

SUBSCRIPTIONS

The subscription price for a volume of four parts is £7 net, post free, payable in advance; separate parts £2.10*s*. net, plus postage. Subscriptions may be sent to any bookseller, or to the Cambridge University Press, Bentley House, 200 Euston Road, London, N.W.1.

Subscribers in the United States and Canada should send their orders to the Cambridge University Press, American Branch, 32 East 57th Street, New York, N.Y.10022. The subscription price per volume is $24.50, post free, payable in advance; separate parts $8.50, plus postage (U.S. dollars).

CONTENTS TO VOLUME 1

PART 1 FEBRUARY 1967

Cerenkov and cyclotron instabilities in a plasma stream. C. F. KNOX *page* 1

Dispersion of the whistler mode for a velocity distribution with a loss cone. A. C. DAS 29

Gas-ionizing shocks in a magnetic field. M. D. COWLEY 37

Non-linear constant-profile plane waves in a cold plasma under an applied magnetic field. YVES J. ALLOUCHERIE 55

Resonant particle instabilities in a uniform magnetic field. C. F. KENNEL and H. V. WONG 75

Resonantly unstable off-angle hydromagnetic waves. C. F. KENNEL and H. V. WONG 81

Quasi-linear theory of the loss-cone instability. A. A. GALEEV 105

Ambipolar diffusion and drift of added carriers in a semi-conductor in the presence of a magnetic field. C. D. MALDONADO 113

The structure of quasi-shocks in a collision-free plasma in a magnetic field. J. G. CORDEY and P. G. SAFFMAN 129

Combined Taylor and Helmholtz instability in hydromagnetics including Hall effect. S. P. TALWAR and G. L. KALRA 145

REVIEW

Plasma Diagnostic Techniques, edited by R. H. HUDDLESTONE and S. L. LEONARD 156

PART 2 MAY 1967

Radiative behaviour of a shock-heated argon plasma flow. K. P. HORN, H. WONG and D. BERSHADER 157

The response of a spherical plasma probe to alternating potentials. Results of computations and use for plasma diagnostics. R. BUCKLEY 171

A single-fluid model for shock formation in MHD shock tubes. ALAN L. HOFFMAN 193

Thermal conductances in a collisionless gas between coaxial cylinders and concentric spheres. YAU WU 209

Ionizing detonation waves in transverse electromagnetic fields. A. R. GORDON and J. B. HELLIWELL 219

Stationary waves at a plasma-magnetic field interface. M. D. SAVAGE 229

Production of superthermal electrons by electrostatic plasma oscillations. R. W. FREDRICKS 241

On the steady Krook kinetic equation: Part 2. DONALD G. M. ANDERSON 255

https://doi.org/10.1017/S0022377800003391 Published online by Cambridge University Press

PART 3 AUGUST 1967

On ion–electron beams emitted by a plane. Y. Y. WINOGRAD *page* 267

Wave propagation in non-uniform plasmas near the second electron cyclotron harmonic. D. E. BALDWIN 289

The guiding centre approximation in lowest order. A. BAÑOS, Jr. 305

Model Fokker–Planck Equations. 2. The equation for a multi-component plasma. J. P. DOUGHERTY and S. R. WATSON 317

Model Fokker–Planck Equations. 3. Application to transport phenomena. J. P. DOUGHERTY, S. R. WATSON and M. A. HELLBERG 327

The evolution of wave correlations in uniformly turbulent, weakly non-linear systems. R. C. DAVIDSON 341

Propagation of hydromagnetic waves through an anisotropic plasma. B. ABRAHAM-SHRAUNER 361

Shock jump conditions for an anisotropic plasma. B. ABRAHAM-SHRAUNER 379

REVIEW

Space Physics with Artificial Satellites, by YA. L. AL'PERT, A. V. GUREVICH and L. P. PITAEVSKII 382

PART 4 NOVEMBER 1967

Guided propagation of Alfvén waves in the magnetosphere. J. A. FEJER and KAI FONG LEE 387

A continuum theory of electrostatic probes in a slightly ionized gas. K. TOBA and S. SAYANO 407

Asymptotic state of the two-stream instability. THOMAS ARMSTRONG and DAVID MONTGOMERY 425

Propagation along the magnetic field of a pulse current originated disturbance in a cold two-fluid plasma. G. J. LEWAK 435

An experimental investigation into the behaviour of a spherical plasma resonance probe in a magnetic field. P. G. DAVIES 451

Stability of magnetohydrodynamic shock waves. MARTIN LESSEN and NARAYAN V. DESHPANDE 463

Interaction of electromagnetic fields with warm, slightly ionized magneto-plasmas. O. DE BARBIERI and C. MAROLI 473

Higher order approximations in the theory of longitudinal plasma oscillations. F. EINAUDI and W. I. AXFORD 483

REVIEWS

Electrodynamics of Plasmas, by R. JANCEL and TH. KAHAN 498

An Introduction to Magneto-Fluid Mechanics, by V. C. A. FERRARO and C. PLUMPTON 499

INDEX TO VOLUME 1 502

https://doi.org/10.1017/S0022377800003391 Published online by Cambridge University Press
