CONTENTS

NO.		PAGE
XIV.	On Substitutional Equations. By D. E. RUTHERFORD, M.A., B.Sc., D.Math., United College, University of St Andrews	117
	<i>(Issued separately December 14, 1944.)</i>	
XV.	Quantum Mechanics of Fields. III. Electromagnetic Field and Electron Field in Interaction. By Professor MAX BORN, F.R.S., and H. W. PENG, Ph.D., Carnegie Research Fellow, University of Edinburgh	127
	<i>(Issued separately December 14, 1944.)</i>	
XVI.	Studies in Practical Mathematics. IV. On Linear Approximation by Least Squares. By A. C. AITKEN, D.Sc., F.R.S., Mathematical Institute, University of Edinburgh	138
	<i>(Issued separately October 24, 1945.)</i>	
XVII.	The Regraduation of Clocks in Spherically Symmetric Space-times of General Relativity. By G. C. MCVITTIE, Ph.D:	147
	<i>(Issued separately November 5, 1945.)</i>	
XVIII.	The Riemann Tensor in a Completely Harmonic V_4 . By H. S. RUSE, University College, Southampton	156
	<i>(Issued separately November 5, 1945.)</i>	
XIX.	A Theory of Regraduation in General Relativity. By A. G. WALKER, D.Sc., Department of Pure Mathematics, University of Liverpool. <i>Communicated by Sir EDMUND WHITTAKER, F.R.S.</i>	164
	<i>(Issued separately March 21, 1946.)</i>

ROYAL SOCIETY OF EDINBURGH

22, 24 GEORGE STREET, EDINBURGH, 2

THE PREPARATION FOR PUBLICATION OF PAPERS IN THE TRANSACTIONS AND IN THE PROCEEDINGS (SECTIONS "A" AND "B") OF THE SOCIETY

IN view of the national necessity for exercising the strictest economy in paper and the high cost of publication, authors of papers are requested to write their communications in as concise a form as possible and to avoid excess of tables and illustrations.

An author is advised to retain a copy of his paper, as the Society cannot undertake any responsibility in relation to the custody of papers entrusted to it. The MS. must be easily legible, preferably typewritten on one side of quarto or foolscap paper and with pages numbered. *It must be absolutely in its final form for printing.* A short summary of the important points in the paper should be given. A table of contents (for a long paper), references to plates, etc., must be in their proper places, and positions indicated for the insertion of illustrations that are to appear in the text. Names of genera and species should be in italics. Footnotes should be avoided.

Additions to a paper after it has been finally handed in for publication will, if accepted by the Council, be treated and dated as separate communications, and may, or may not, be printed immediately after the original paper.

References to literature should be placed at the end of the paper, alphabetically arranged, under authors' names, with abridged titles of journals, thus:—

SANDEMAN, I., 1929. "The Fulcher Bands of Hydrogen," *Proc. Roy. Soc. Edin.*, XLIX, 48-64.

WHITTAKER, E. T., and ROBINSON, G., 1923. *A Short Course in Interpolation*, London.

Titles of papers should be quoted exactly, and all references to literature should be carefully checked by the authors before submitting the paper. References to literature in the text should be made by quoting the author's name and the year of publication thus (Sandeman, 1929) or (Whittaker and Robinson, 1923), and adding the page when necessary.

All illustrations must be in a form immediately suitable for reproduction, preferably of a size to permit reduction to about two-thirds the linear dimensions of the original, and should be capable of reproduction by photographic processes. Drawings and diagrams to be reproduced as line blocks should be made with fixed Indian ink, preferably on fine white bristol board, free from folds or creases; smooth clean lines or sharp dots, but no washes or colours, should be used. Graphs should be on a squared paper ruled in *faint blue* lines, unless the lines are to be brought out. If the illustrations are on a large scale to be afterwards reduced by photography, any lettering must be on a corresponding scale.
