<i>List of Figures</i>	page vii
<i>List of Tables</i>	xi
<i>Preface</i>	xiii
1 Introduction	1
1.1 The Need for Low-Carbon System Transitions and a Reconfigurational Approach	1
1.2 The Multi-Level Perspective on Socio-Technical System Transitions	8
1.3 Aims and Contributions of the Book	12
1.4 Structure of the Book	19
2 Conceptualising Socio-Technical System Reconfiguration	22
2.1 The Emergence and Diffusion of Radical Innovation in Socio-Technical Transitions	23
2.2 Reconfiguration of <i>Existing</i> Socio-Technical Systems	31
3 Methodology	42
3.1 Broader Methodological Issues	42
3.2 Analysing Longitudinal Socio-Technical Developments	48
3.3 Evaluating Reconfigurations in the Making	55
4 Electricity System	57
4.1 Introduction	57
4.2 Electricity Generation Sub-system	59
4.3 Electricity Grid Sub-system	72
4.4 Electricity Consumption Sub-system	79

4.5	Niche-Innovations	90
4.6	Low-Carbon Transition through Whole System Reconfiguration	119
5	Passenger Mobility Systems	133
5.1	Introduction	133
5.2	The Auto-Mobility System	139
5.3	The Railway System	157
5.4	The Bus System	164
5.5	The Cycling System	170
5.6	Niche-Innovations	176
5.7	Low-Carbon Transition through Whole System Reconfiguration	202
6	Heat System	220
6.1	Introduction	220
6.2	Heating System	222
6.3	Buildings System	235
6.4	Niche-Innovations	249
6.5	Low-Carbon Transition through Whole System Reconfiguration	279
7	Conclusions	293
7.1	Comparing Low-Carbon Transitions in Electricity, Heat, and Mobility Systems	293
7.2	Cross-Cutting Themes	323
7.3	Future Low-Carbon Transitions and Policy Recommendations	333
7.4	Future Research	335
	<i>References</i>	339
