

## SUBSCRIPTION RATES

Subscription rates (post free) for volume 37 (2000) of the *Journal of Applied Probability* are as follows:

US\$238.50; \$A376.35; £145.50 for libraries and institutions;

US\$79.50; \$A125.45; £48.50 for individuals belonging to a recognised scientific society.

Members of the London Mathematical Society should apply direct to the Secretary of the Society for copies of the *Journal*.

Please send all enquiries to: Applied Probability, School of Mathematics and Statistics, The University, Sheffield S3 7RH, UK.

We can provide back issue prices on application. Cheques, money orders, etc. should be made out to APPLIED PROBABILITY. Payment is accepted in US, UK or Australian currency or by VISA or Mastercard (phone: +44 114 222 3922; fax: +44 114 272 9782).

## NOTES FOR CONTRIBUTORS

Papers published in the *Journal* are of two kinds:

(1) *research papers* not exceeding 20 printed pages;

(2) *short communications* of a few printed pages in the nature of notes or brief accounts of work in progress.

*Review papers, longer research papers and letters to the editor* are published in *Advances in Applied Probability*, a companion journal. (Note: Letters relating specifically to papers which have appeared in the *Journal of Applied Probability* will continue to appear in the *Journal*.)

The editors may publish accepted papers in either journal, according to the space available, in order to meet the 15-month deadline in publication referred to below.

## Submission of papers

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Papers will not be reprinted without the written permission of the Trust. It is the policy not to accept for publication papers which cannot appear in print within 15 months of the date of receipt of the final version. Fifty reprints of each paper will be provided free; additional reprints are available at cost.

Papers should be written in English or French; papers in other languages may be accepted by the editors, but will appear (subject to the author's agreement) in English or French translation. Please supply *three* double-spaced hard copies, at least one of which should be printed on one side of the paper only. The paper should include: (1) a short abstract of approximately 4–10 lines giving a non-mathematical description of the subject matter and results; (2) list of keywords detailing the contents for the purpose of computerised information retrieval; (3) primary and secondary classifications according to the 1991 Mathematics Subject Classification, to be found in the 1990 Annual Index of *Mathematical Reviews*.

Authors are advised to consult *The Author's Guide to the Applied Probability Journals* when preparing papers for submission. A copy of this guide may be obtained free of charge from the Applied Probability Office. An updated version of the guide, with LATEX style files, can be obtained in electronic form on <http://www.shef.ac.uk/~apt> or on PC-compatible disk from the Applied Probability Office.

For efficiency in processing, authors are requested to send all submissions to the Applied Probability Office in Sheffield, rather than to individual editors. The address for all submissions is:

**Executive Editor, Applied Probability, School of Mathematics and Statistics,  
The University, Sheffield S3 7RH, UK.**

## COPYRIGHT

The copyright of all published papers shall be vested in the Trust. When a paper is accepted for publication, the Trust requests the author(s) to sign a form assigning copyright to the Trust. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the base fee of \$00.70 per copy, plus .20 per page is paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0021-9002/00 \$00.70 + .20.

*Research Papers*

- 315 K. BOROVKOV AND D. VERE-JONES. Explicit formulae for stationary distributions of stress release processes
- 322 JAMES D. LYNCH. The Galton–Watson process revisited: some martingale relationships and applications
- 329 NICO M. VAN DIJK AND KAREL SLADKÝ. A note on uniformization for dynamic non-negative systems
- 342 KEITH BAGGERLY, DENNIS COX AND RICK PICARD. Exponential convergence of adaptive importance sampling for Markov chains
- 359 G. O. ROBERTS AND R. L. TWEEDIE. Rates of convergence of stochastically monotone and continuous time Markov models
- 374 GLENN HOFMANN AND H. N. NAGARAJA. Random and Poisson paced record models in the  $F^\alpha$  setup
- 389 F. THOMAS BRUSS AND DAVY PAINDAVEINE. Selecting a sequence of last successes in independent trials
- 400 ROSARIO DELGADO AND MARIA JOLIS. Weak approximation for a class of Gaussian processes
- 408 MOHAMED ABDEL-HAMEED. Optimal control of a dam using  $P_\lambda^M$  policies and penalty cost when the input process is a compound Poisson process with positive drift
- 417 JOHN E. GLYNN AND PETER W. GLYNN. On the behaviour of a long cascade of linear reservoirs
- 429 CARL J. NUZMAN AND H. VINCENT POOR. Linear estimation of self-similar processes via Lamperti’s transformation
- 453 HAIJUN LI. Stochastic models for dependent life lengths induced by common pure jump shock environments
- 470 W. BÖHM. The correlated random walk with boundaries: A combinatorial solution
- 480 ENDRE CSÁKI, MIKLÓS CSÖRGŐ, ANTÓNIA FÖLDES AND PÁL RÉVÉSZ. Asymptotic properties of integral functionals of geometric stochastic processes
- 494 LUDGER RÜSCHENDORF AND GERNOT SACHS. Stochastic analysis of partitioning algorithms for matching problems
- 504 MARZIA MARCHESELLI. A generalized delta method with applications to intrinsic diversity profiles
- 511 MANUEL LLADSER AND JAIME SAN MARTÍN. Domain of attraction of the quasi-stationary distributions for the Ornstein–Uhlenbeck process
- 521 JUANJUAN FAN, S. G. GHURYE AND RICHARD A. LEVINE. Multicomponent lifetime distributions in the presence of ageing
- 534 YOSHIAKI ITOH, HIROSHI MAEHARA AND NORIHIDE TOKUSHIGE. Oriented graphs generated by random points on a circle
- 540 J. H. CROSBIE AND K. D. GLAZEBROOK. Evaluating policies for generalised bandits via a notion of duality
- 547 J. KATE DUCKWORTH AND MIHAIL ZERVOS. An investment model with entry and exit decisions
- 560 NICOLAS PRIVAULT. Hypothesis testing and Skorokhod stochastic integration
- 575 SIDNEY RESNICK AND ERIC VAN DEN BERG. Weak convergence of high-speed network traffic models

*Short Communications*

- 598 S. J. DARLINGTON AND P. K. POLLETT. Quasistationarity in continuous-time Markov chains where absorption is not certain
- 601 HIROSHI MAEHARA AND SUMIE UEDA. On the waiting time in a janken game
- 606 Obituary: SIDNEY JESSE YAKOWITZ
