

CAMBRIDGE

JOURNALS

JFM ARCHIVE

Journal of
Fluid Mechanics
Digital Archive
1956–1996

*Vital research from
the definitive source*

The JFM Digital Archive contains every article from the first 40 years of the journal, scanned and digitised to the highest standards.

Please speak to your librarian about gaining access.

CAMBRIDGE
UNIVERSITY PRESS

- S 548 Disruption of SSP/VWI states by a stable stratification
T. S. Eaves & C. P. Caulfield
- 565 Optimal heat transport solutions for Rayleigh–Bénard convection
D. Sondak, L. M. Smith & F. Waleffe
- 596 Stability analysis of boundary layers controlled by miniature vortex generators
L. Siconolfi, S. Camarri & J. H. M. Fransson
- 619 Instability driven by boundary inflow across shear: a way to circumvent Rayleigh’s stability criterion in accretion disks?
R. R. Kerswell
- 664 A plethora of generalised solitary gravity–capillary water waves
D. Clamond, D. Dutykh & A. Durán
- 681 Enhanced secondary motion of the turbulent flow through a porous square duct
A. Samanta, R. Vinuesa, I. Lashgari, P. Schlatter & L. Brandt

JFM Rapids (online only)

- R1 Squirming through shear-thinning fluids
C. Datt, L. Zhu, G. J. Elfring & O. S. Pak
- R2 The asymptotic equivalence of fixed heat flux and fixed temperature thermal boundary conditions for rapidly rotating convection
M. A. Calkins, K. Hale, K. Julien, D. Nieves, D. Driggs & P. Marti
- R3 Effects of polymer additives in the bulk of turbulent thermal convection
Y.-C. Xie, S.-D. Huang, D. Funfschilling, X.-M. Li, R. Ni & K.-Q. Xia
- R4 Undulatory swimming in non-Newtonian fluids
G. Li & A. M. Ardekani
- S R5 Enhanced heat transport in partitioned thermal convection
Y. Bao, J. Chen, B.-F. Liu, Z.-S. She, J. Zhang & Q. Zhou
- R6 Experimental non-Boussinesq fountains
R. Mehaddi, O. Vauquelin & F. Candelier

S indicates supplementary data or movies available online.

- 1 New insights into the fine-scale structure of turbulence
M. Wilczek
- 5 Turbulent thermals with chemical reaction
M. G. Domingos & S. S. S. Cardoso
- 30 Multifractal characteristics of combustor dynamics close to lean blowout
V. R. Unni & R. I. Sujith
- 51 Third-order resonant wave interactions under the influence of background current fields
T. Waseda, T. Kinoshita, L. Cavaleri & A. Toffoli
- 74 Diffusion-flame ignition by shock-wave impingement on a supersonic mixing layer
C. Huete, A. L. Sánchez, F. A. Williams & J. Urzay
- 109 Transport equation for the isotropic turbulent energy dissipation rate in the far-wake of a circular cylinder
S. L. Tang, R. A. Antonia, L. Djenidi & Y. Zhou
- 130 Gravity currents: entrainment, stratification and self-similarity
D. Sher & A. W. Woods
- 163 Theory of weakly nonlinear self-sustained detonations
L. M. Faria, A. R. Kasimov & R. R. Rosales
- 199 Consequences of viscous anisotropy in a deforming, two-phase aggregate. Why is porosity-band angle lowered by viscous anisotropy?
Y. Takei & R. F. Katz
- 225 Experimental investigation of cylindrical converging shock waves interacting with a polygonal heavy gas cylinder
T. Si, T. Long, Z. Zhai & X. Luo
- 252 Effects of three-dimensionality on instability and turbulence in a frontal zone
E. Arobone & S. Sarkar
- 274 Passive scalar decay laws in isotropic turbulence: Prandtl number effects
A. Briard, T. Gomez, P. Sagaut & S. Memari
- 304 Lift and drag in two-dimensional steady viscous and compressible flow
L. Q. Liu, J. Y. Zhu & J. Z. Wu
- 342 Dynamics of the interface between miscible liquids subjected to horizontal vibration
Y. A. Gaponenko, M. Torregrosa, V. Yasnou, A. Mialdun & V. Shevtsova
- 373 Radiation of waves by a cylinder submerged in water with ice floe or polynya
I. V. Sturova
- 396 Direct numerical simulation of turbulent channel flow over porous walls
M. E. Rosti, L. Cortelezzi & M. Quadrio
- 443 Propagation of a viscous thin film over an elastic membrane
Z. Zheng, I. M. Griffiths & H. A. Stone
- 465 Droplet spreading and absorption on rough, permeable substrates
L. Espín & S. Kumar
- S 487 Displacement flows under elastic membranes. Part 1. Experiments and direct numerical simulations
D. Pihler-Puzović, A. Juel, G. G. Peng, J. R. Lister & M. Heil
- 512 Displacement flows under elastic membranes. Part 2. Analysis of interfacial effects
G. G. Peng, D. Pihler-Puzović, A. Juel, M. Heil & J. R. Lister
