

# FLUID DYNAMICS

## PARTS A and B

EDITED BY RAYMOND J. EMRICH

### VOLUME 18: METHODS OF EXPERIMENTAL PHYSICS

Describes principles and techniques of measurement of velocity, pressure, temperature, density, heat transfer, and composition of rapidly moving gases and liquids. Treats laser-doppler, hot-wire, and hot-film anemometry, interferometry, and fast response pressure gages. Also covers wind tunnels, shock tubes, and rotating systems in which basic fluid dynamics experiments are performed, as well as light sources and recording methods used in optical diagnosis. Of special interest to workers and students in all disciplines of fluid study. Readers will learn the fundamental physical principles on which measurements are based, and thus will be able to evaluate the reliabilities of measurement systems.

# *Ergodic theory and dynamical systems*

**Edited by Michael Herman, Anatole Katok,  
Klaus Schmidt and Peter Walters**

This new journal provides a focus for a rapidly developing area of mathematics. The ideas of dynamics have proved of great importance not only in specific areas of mathematics, but also in physics and other allied subjects.

Critical survey and conference proceedings are included from time to time, as well as reviews of relevant books.

*Continued from back cover*

Feedback stabilization of tokamaks against slow axisymmetric MHD instabilities T. H. JENSEN	351
Production of plasma vortices by lower-hybrid waves M. Y. YU, P. K. SHUKLA AND H. U. RAHMAN	359
Stability of parallel flow of a multi-component cylindrical plasma to electrostatic perturbations R. J. LUCAS	369

# JOURNAL OF PLASMA PHYSICS

Volume 26 Part 2 October 1981

## CONTENTS

- Electrostatic instabilities and anomalous transport excited by an energetic ion beam  
E. H. DA JORNADA, J. D. GAFFEY AND M. Z. CAPONI *page 193*
- Nonlinear interaction of electrostatic surface waves in a semi-infinite plasma. Part 1. Derivation of the coupled mode equations  
V. ATANASSOV, E. MATEEV AND I. ZHELYAZKOV 217
- Nonlinear interaction of electrostatic surface waves in a semi-infinite plasma. Part 2. Time-dependent solutions to the coupled mode equations  
V. ATANASSOV, E. MATEEV AND I. ZHELYAZKOV 231
- The parametric excitation of kinetic Alfvén waves by a magnetic pump  
N. F. CRAMER AND I. J. DONNELLY 253
- A generalized treatment of the electrostatic instability of rippled non-neutral magnetically focused electron beams  
S. CUPERMAN AND F. PETRAN 267
- Effects of toroidal field ripple on suprathreshold ions in tokamak plasmas  
R. J. GOLDSTON AND H. H. TOWNER 283
- Langmuir solitons in a two-temperature plasma  
B. BUTI AND M. Y. YU 309
- Marginal stability and critical thickness of strong double layers  
C. WAHLBERG 317
- Reciprocity relations between currents and fields in plane-stratified magnetoplasmas  
A. SCHATZBERG AND C. ALTMAN 333
- Resistive instability of interchange modes due to anomalous diffusion  
V. P. PAVLENKO AND J. WEILAND 345
