Negation is at the core of human language; without negation there can be no denial, contradiction, irony, or lies. This book examines the form and function of negative sentences in a variety of languages and offers state-of-the-art surveys of the acquisition of negation by children, its processing by adults, its historical development, and its interaction with other operators and predicates within natural language sentences. Topics covered include the nature of negative polarity, the phenomenon of pleonastic or illogical negation, and the role of morphological, syntactic, semantic, pragmatic, and typological factors in negative expression.

**5-year Impact Factor: 2.560**

Four issues per volume (approx. 800 pages, Online version includes *Cognitive Linguistics Bibliography*)  
ISSN 0936-5907  
e-ISSN 1613-3641

*Cognitive Linguistics* presents a forum for linguistic research of all kinds on the interaction between language and cognition. Cognitive linguistics focuses on language as an instrument for organizing, processing and conveying information, and the journal is devoted to high-quality research on topics such as:

- the structural characteristics of natural language categorization (such as prototypicality, cognitive models, metaphor, and imagery)
- the functional principles of linguistic organization (such as iconicity)
- the conceptual interface between syntax and semantics
- the relationship between language and thought, including matters of universality and language specificity
- the experiential background of language-in-use, including the cultural background, the discourse context, and the psychological environment of linguistic performance.
