

# FROM THE SIMPLE TO THE COMPLEX

*New 2nd Edition!*

## MEDICAL PARASITOLOGY

Concise yet complete, this unique book presents medical parasitology with an emphasis on the identification, diagnosis, and treatment of parasites common to man. Three sections cover medical protozoology, helminthology and arthropodology. As groups of organisms are systematically discussed from the simple to the complex, the authors stress life cycle and structure, clinical symptoms and pathology of the organism, specific methods of diagnosis and treatment and laboratory diagnosis. Thoroughly revised and expanded, the book describes (step-by-step) pertinent laboratory skills and techniques. Superb artwork and new, actual photographs of organisms are included.

By J. Walter Beck, B.S., M.S., Ph.D., M.P.H. and John E. Davies, M.B.B.S., L.R.C.P. (London), M.D., M.P.H. June, 1976. Approx. 275 pages, 7" x 10", 302 illustrations. About \$14.95.

*INSTRUCTORS NOTE: To receive a complimentary copy to evaluate firsthand for possible class adoption, simply write to the Textbook Department. Please be specific as to your course and the applicability of the requested text therein. (Offer good only in U.S. and Canada.)*
