APPLIED PROBABILITY TRUST PRIZES 2013

The Trustees of the Applied Probability Trust (APT) have much pleasure in announcing the names of the APT Prize winners for 2013. We offer them our warmest congratulations, and look forward to their pursuing further studies and eventually careers in probability, statistics and their applications.

Australian National University, Canberra
June 2014

JOE GANI
for the APT Trustees

The following prize awards for undergraduate and postgraduate achievement in 2013 were funded by the Applied Probability Trust.

University of Adelaide (Applied Probability Trust Prize) ..... Mingmei Teo
Australian National University (Applied Probability Trust Prize) ..... Thomas Beers
University of California, Santa Barbara (Abraham Wald Prize) ..... Not yet announced
University of Cambridge (Bartlett Prize) ..... P. Parmar
CWI, Amsterdam (Applied Probability Trust Prize) ..... Not awarded in 2013
Imperial College, London (Hyman Levy Prize)
(2012) ..... Michele Thuy Nguyen
(2013) ..... Not yet announced
University of Kentucky (R. L. Anderson Prize) ..... Gabby Ness and Xiang Zhang
University of Manchester (M. S. Bartlett Prize) ..... Katy Newman
University of Melbourne (Norma McArthur Prize) ..... Tomos Lelong
University of Newcastle, New South Wales (Applied Probability Trust
Statistics Prize) ..... Melissa Marks
The Open University (George Barnard Prize) ..... Simon Shannon
University of Sheffield (Sir Edward Collingwood Prize) ..... Simon Witts and Jiefeng Tan
University of Sydney (Applied Probability Trust Prize) ..... Sampson Wong
University of Waterloo (George Barnard Prize) ..... Larissa Hoi-Yee Wong
University of Western Australia
Richard Tweedie Memorial Applied Probability Trust Prize .... Timothy Campbell Pope
Abraham Wald Prize ..... Kyle Scott Rosa
University of Wollongong
(William Sealy Gosset Prize) ..... Thomas Mason
(Applied Probability Trust Prize) ..... Michael Agnew

ROLLO DAVIDSON TRUST

The Trustees of the Rollo Davidson Trust give notice that they have awarded the Rollo Davidson Prize for 2014 jointly to

Paul Bourgade (Institute for Advanced Study, Princeton and University of Cambridge) for remarkable new results in random matrix theory and related topics, and **Ivan Corwin** (Columbia University and MIT) for outstanding achievements in the area of stochastic growth processes and their relation to integrable systems.

Further details of the Rollo Davidson Trust may be found at http://www.statslab.cam.ac.uk/Rollo/

Subscription rates

Subscription rates for volume **51** (2014) of *Journal of Applied Probability* (*JAP*) are as follows (post free and including online access at http://projecteuclid.org/jap/): US$340.00; A$345.00; £210.00 for libraries and institutions; or US$114.00; A$115.00; £70.00 for individuals belonging to a recognised scientific society. The subscription rates for volume **46** (2014) of *Advances in Applied Probability*, the companion publication, are the same; if both journals are ordered directly from the Applied Probability office at the same time, the combined price is discounted by 10%. Please send all enquiries to: Applied Probability Subscriptions, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK (telephone +44 114 222 3922; fax +44 114 222 3926; email s.c.boyles@sheffield.ac.uk). Cheques, money orders, etc. should be made payable to 'Applied Probability'. Payment is acceptable in US, Australian or UK currency, or by Visa or Mastercard. We can provide back issue prices on application.

Notes for contributors

Research papers are published in both *Journal of Applied Probability* (*JAP*) and *Advances in Applied Probability* (*AAP*), with longer papers typically appearing in *AAP*. However, assignation of papers between the two journals is made by the Editor on an issue-by-issue basis. A submission to Applied Probability is considered as a submission to either journal. In addition, *AAP* publishes letters specifically related to papers that have appeared in *AAP* and *JAP* publishes short communications of a few printed pages in the nature of notes and letters specifically related to papers that have appeared in *JAP*. Review papers and papers in *stochastic geometry and statistical applications* are published in *AAP*.

Fifty offprints of each paper will be provided free, with additional offprints available at cost.

Papers submitted to the Applied Probability journals are considered on the understanding that they have not been published previously and are not under consideration by another publication. Accepted papers will not be published elsewhere without the written permission of the Trust. Submitted papers should be in English. It is the author's responsibility to ensure an acceptable standard of language, and a paper failing to meet this requirement may go back to the author for rewriting before being sent out for review.

Papers should include: (i) a **short abstract** of 4–10 lines giving a non-mathematical description of the subject matter and results; (ii) a list of **keywords** detailing the contents; and (iii) a list of **classifications**, using the 2010 Mathematics Subject Classification scheme (http://www.ams.org/msc/). Letters to the Editor need not include these. To assist authors in writing papers in the Applied Probability style, they may use the LaTeX class file aptpub.cls, available from http://www.appliedprobability.org/. Use of this class file is not a condition of submission, but will considerably increase the speed at which papers are processed.

Papers should be submitted as hard copy or as electronic files. All submissions will be acknowledged on receipt and **must be accompanied by a covering letter stating the author's postal address and affiliation**. Hard copy: Send **all** submissions to the Applied Probability office in Sheffield, and not to individual editors. Two copies of the paper, at least one of which should be double spaced, should be sent to: **Executive Editor, Applied Probability, School of Mathematics and Statistics, University of Sheffield, Sheffield S3 7RH, UK**. Electronic submission: Please email a **double-spaced** PostScript™ (.ps) or portable document format (.pdf) file, not exceeding 1 Mb. **The files must be clearly identified by name in a separate covering message**. The address for email submissions is **submissions_japaap@sheffield.ac.uk**.

Copyright

The copyright of all published papers is vested in the Applied Probability Trust. When a paper is accepted for publication, the Trust asks the authors to assign copyright by signing a form in which the terms of copyright are listed. Failure to do this promptly may delay or prevent publication.

Authorisation to photocopy items for internal or personal use, or the internal or personal use of specific clients, is granted by the Applied Probability Trust for libraries and other users registered with the Copyright Clearance Center (CCC) Transactional Reporting Service, provided that the corresponding processing and royalty fees (see http://www.copyright.com) are paid directly to CCC, 222 Rosewood Drive, Danvers, MA 01923, USA. 0021–9002/14

Research Papers

297 R. MCVINISH AND P. K. POLLETT. The limiting behaviour of Hanski's incidence function metapopulation model

317 HUI HE AND RUGANG MA. Limit theorems for continuous-time branching flows

333 PHILIP A. ERNST, DEAN P. FOSTER AND LARRY A. SHEPP. On optimal retirement

346 HONGSHENG DAI. Exact simulation for diffusion bridges: an adaptive approach

359 THORBJÖRN GUDMUNDSSON AND HENRIK HULT. Markov chain Monte Carlo for computing rare-event probabilities for a heavy-tailed random walk

377 SHELDON M. ROSS. Simulation analysis of system life when component lives are determined by a marked point process

387 JI HWAN CHA AND MAXIM FINKELSTEIN. Stochastic modeling for environmental stress screening

400 PAWEŁ HITCZENKO AND GÉRARD LETAC. Dirichlet and quasi-Bernoulli laws for perpetuities

417 MING ZHOU AND JUN CAI. Optimal dynamic risk control for insurers with state-dependent income

436 SHANGZHEN LUO. Stochastic Brownian game of absolute dominance

453 PETER OLOFSSON AND SUZANNE S. SINDI. A Crump–Mode–Jagers branching process model of prion loss in yeast

466 MARCUS C. CHRISTIANSEN AND NICOLA LOPERFIDO. Improved approximation of the sum of random vectors by the skew normal distribution

483 M. V. BOUTSIKAS, D. L. ANTZOULAKOS AND A. C. RAKITZIS. On the joint distribution of stopping times and stopped sums in multistate exchangeable trials

492 MARTIN KLIMMEK. Parameter dependent optimal thresholds, indifference levels and inverse optimal stopping problems

512 RICHARD C. BRADLEY. On a 'replicating character string' model

528 R. VASUDEVA, J. VASANTHA KUMARI AND S. RAVI. On the asymptotic behaviour of extremes and near maxima of random observations from the general error distributions

542 S. MCKINLAY. A characterisation of transient random walks on stochastic matrices with Dirichlet distributed limits

556 PAOLO DAI PRA, PIERRE-YVES LOUIS AND IDA G. MINELLI. Synchronization via interacting reinforcement

569 OSCAR LÓPEZ AND NIKITA RATANOV. On the asymmetric telegraph processes

Short Communications

590 MAY-RU CHEN, SHOOU-REN HSIAU AND TING-HSIN YANG. A new two-urn model
