

Review Papers for the Journal of Applied Probability

The Editorial Board would like to encourage the submission to the *Journal of Review Papers* summarising and coordinating recent results in any of the fields of Applied Probability. The papers should be approximately 40–50 printed pages in length.

On acceptance of a Review Paper for publication in the *Journal*, the author will receive £stg 100 (\$280). The paper will then be distributed as a book in paperback form in the following series.

Methuen's Supplementary Review Series in Applied Probability

General Editor: M. S. BARLETT, M.A., D.SC., F.R.S.

Editor: J. GANI, D.I.C., PH.D.

This supplementary series will consist of the Review Papers from the *Journal of Applied Probability* in book form. There is always a lag between the publication of research papers in a field, and the advent of a book coordinating their results: it is this gap with the Review Series is designed to bridge. Consecutive volumes written in a simple expository style, will provide research workers and students of Applied Probability with up-to-date accounts of work done in their fields.

The series will deal with the applications of Probability Theory to the biological, physical, social and technological sciences. Volume 1 is concerned with storage theory, Volume 2 treats diffusion models in population genetics, and Volume 3 deals with group representations and applied probability.

Already Published

Volume 1. TIME-DEPENDENT RESULTS IN STORAGE THEORY
by N. U. Prabhu

Volume 2. DIFFUSION MODELS IN POPULATION GENETICS
by M. Kimura

Volume 3. GROUP REPRESENTATIONS AND APPLIED PROBABILITY
by E. J. Hannan

In Press

Volume 4. STOCHASTIC MODELS FOR BACTERIOPHAGE
by J. Gani

Orders for these should be made through your bookseller or direct from:

Methuen & Co. Ltd.

11 NEW FETTER LANE LONDON EC4

Journal of Applied Probability

This is an international journal published by the Applied Probability Trust in association with the London Mathematical Society; it will contain research and review papers on applications of Probability Theory to the biological, physical, social and technological sciences. A volume of approximately 500 pages will be published annually in two half-yearly numbers appearing in June and December.

Submission of papers

Submissions to the *Journal* may be of three kinds:

(1) *review papers* of about 40–50 printed pages in length, surveying a field of Applied Probability; these will be paid for on acceptance at the rate of Estg.100 (\$280) and may possibly be published later in paperback form;

(2) *research papers*;

(3) *short communications* of 2–3 printed pages in the nature of notes or brief accounts of work in progress.

These should be sent to any one of

Editor-in-chief:

J. GANI *Department of Probability and Statistics, The, University, Sheffield 10, England.*

Editors:

- M. S. BARTLETT *Department of Statistics, University College, Gower St., London, W.C. 1, England.*
- R. BELLMAN *Department of Electrical Engineering, University of Southern California, Los Angeles, California 90007, U.S.A.*
- D. R. COX *Department of Statistics, Birkbeck College, Malet St., London W.C.1, England.*
- A. DVORETZKY *Department of Mathematics, Hebrew University, Jerusalem, Israel.*
- P. D. FINCH *Department of Mathematics, Monash University, P.O. Box 92, Clayton, Victoria, Australia.*
- J. HAJNAL *Department of Statistics, London School of Economics, Houghton St., London W.C.2, England.*
- J. M. HAMMERSLEY *Institute of Statistics, Oxford University, Oxford, England.*
- E. J. HANNAN *Department of Statistics, Australian National University, P.O. Box 4, Canberra City, Australia.*
- S. KARLIN *Department of Mathematics, Stanford University, Stanford, Calif., U.S.A.*
- D. G. KENDALL *Statistical Laboratory, Cambridge University, Cambridge, England.*
- M. KIMURA *National Institute of Genetics, Yata I, III, Mishima-shi, Shizuoka-ken, Japan.*
- D. V. LINDLEY *Department of Statistics, University College of Wales, Aberystwyth, Cardiganshire, Wales.*
- YU. V. LINNIK *Matematicheski Institut, Nab. Fontanki 25, Leningrad D-11, U.S.S.R.*
- P. A. P. MORAN *Department of Statistics, Australian National University, P.O. Box 4, Canberra, Australia.*
- J. E. MOYAL *Argonne National Laboratory, 9700 South Cass Avenue, Argonne, Illinois, 60440, U. S. A.*
- YU. V. PROKHOROV *Mathematical Institute of the Academy of Sciences of the U.S.S.R., 1-st Akademicheskoy Proezd 28, Moscow, B-333, U.S.S.R.*
- A. RÉNYI *Mathematical Institute of the Hungarian Academy of Sciences, Reáltanoda U. 13-15, Budapest V, Hungary.*
- G. E. H. REUTER *Department of Mathematics, Imperial College of Science and Technology, London S.W.7, England.*
- L. SCHMETTERER *Mathematical Institute of the University of Vienna, Strudlhofgasse 4, Vienna IX, Austria.*
- J. LAURIE SNELL *Department of Mathematics and Astronomy, Dartmouth College, Hanover, N.H., U.S.A.*
- L. TAKÁCS *Department of Mathematical Statistics, Columbia University, New York 27, N.Y., U.S.A.*
- G. S. WATSON *Department of Statistics, Johns Hopkins University, Baltimore 18, Md., U.S.A.*
- P. WHITTLE *Statistical Laboratory, The University of Manchester, Manchester 13, England.*

Journal of Applied Probability

Volume 2

Number 2

December 1965

Review Paper

- J. GANI 225 Stochastic models for bacteriophage

Research Papers

- G. H. WEISS AND M. ZELEN 269 A semi-Markov model for clinical trials
- TEN HOOPEN AND H. A. REUVER 286 Selective interaction of two recurrent processes
- A. W. DAVIS 293 On the theory of birth, death and diffusion processes
- T. E. HARRIS 323 Diffusion with "collisions" between particles
- A. M. RUSSEL AND NORA S. JOSEPHSON 339 Measurement of area by counting
- S. KARLIN AND JAMES MCGREGOR 352 Ehrenfest urn models
- J. CHOVER AND G. YEO 377 Solutions of some two sided boundary problems for sums of variables with alternating distributions
- ORA ENGELBERG 396 On some problems concerning a restricted random walk
- J. KEILSON 405 A review of transient behavior in regular diffusion and birth-death processes. Part II
- D. L. IGLEHART 429 Limiting diffusion approximations for the many server queue and the repairman problem
- C. PEARCE 442 A queueing system with non-recurrent input and batch servicing

Short Communications

- R. V. AMBARTZUMIAN 449 Two inverse problems concerning the superposition of recurrent point processes
- D. MEJZLER 455 On a characteristic property of stationary streams without aftereffect
- A. M. HASOFER 462 Some perturbation results for the single server queue with Poisson input
- U. N. BHAT 467 On a stochastic process occurring in queueing systems
- EVE BOFINGER 470 Sufficiency for multinomial and transition probabilities
