

New from Cambridge

The Limits of Concept in Natural Science

A Logical Introduction to the Historical Sciences

Abridged Edition

Heinrich Rickert

Editor and Translator: Guy Oakes

Translated into English for the first time, this book presents Rickert's systematic theory of knowledge and philosophy of science, and deals with the problem of historical knowledge. Texts in German Philosophy. Cloth about \$44.50 Paper about \$14.95

Now in paperback . . .

Scientific Realism and the Plasticity of Mind

Paul M. Churchland

" . . . the conclusions drawn are important, vivid, and much better calculated to give life to the philosophical issues than aridly abstract discussion . . ." — *The Canadian Journal of Philosophy*

Cambridge Studies in Philosophy

\$11.95

Now in paperback . . .

Mind, Machines and Evolution

Philosophical Studies

Christopher Hookway

This volume of original essays written by philosophers and scientists deals with philosophical questions that arise from work in evolutionary biology and artificial intelligence.

\$11.95

The Construction of Reality

Michael A. Arbib

Mary B. Hesse

The authors present a systematic and coherent approach to the human knowledge of reality, drawing on their different, but broad and complementary, expertise. They propose that much of "the construction of reality" is guided by convention, and the need for order results from the social process that forms unifying schemas.

About \$32.50

Now in paperback . . .

Mind and Meaning

Brian Loar

"Every philosopher of mind in the mainstream British and American tradition should read this book." — *Philosophy of Science*

\$12.95

Available at bookstores or call Customer Service at 1-800-431-1580.

In NY and Canada 914-235-0300. MasterCard and Visa accepted.

Ethical Idealism

An Inquiry into the Nature and
Function of Ideals

NICHOLAS RESCHER

In this short and provocative study, Rescher vigorously defends both the rationality and practicality of seriously pursuing impossible dreams. \$30.00

Aristotle's Classification of Animals

Biology and the Conceptual Unity of the
Aristotelian Corpus

PIERRE PELLEGRIN

Translated by Anthony Preus

In his biological writings Aristotle should not be thought of as a precursor of the natural sciences of modern times. That is what this book sets out to show in relation to one especially important example: the classification of animals. \$35.00

Mental Illness and Psychology

MICHEL FOUCAULT

Introduction by Hubert Dreyfus

New in paper--This seminal, early work of Foucault is indispensable to understanding his development as a thinker. Part I reflects his early interest in Freud and the psychoanalytic tradition. Part II examines the history of madness as a social and cultural construct moving outside the psychoanalytic tradition into the radical critique of Freud that was to dominate his later work. \$5.95 paper

The Dilemmas of an Upright Man

Max Planck as Spokesman for German Science

J. L. HEILBRON

"Heilbron directly addresses the dilemmas that confronted a conservative, unpolitical scientist whose integrity forced him to cope with the revolutionary implications of his own work and to accept far-reaching political responsibilities in turbulent times. It is the most thorough and balanced exploration to date of the sometimes adept, sometimes unsatisfactory resolution of those dilemmas."

— Alan D. Beyerchen, author of *Scientists under Hitler*

\$17.95

Essays on Descartes' Meditations

Edited by **AMÉLIE OKSENBURG RORTY**

The essays in this volume form a structured commentary on Descartes' *Meditations*. Following the sequence of the meditative stages, the authors analyze the function of each in transforming the reader, to realize his essential nature as a rational inquirer, capable of scientific, demonstrable knowledge of the world. \$48.50 cloth, \$16.95 paper

Science and Values

The Aims of Science and Their Role in Scientific Debate

LARRY LAUDAN

New in paper—In this work, Laudan argues that a fresh approach to scientific rationality—one which stresses the centrality of values and the interdependence of values, methods and facts—is required before the two puzzles of consensus and dissensus can be solved within a consistent framework. \$8.95 paper.

**"AN INTELLECTUAL SMORGASBORD" *
OF GREAT SCIENCE WRITING**

The Sacred Beetle and Other Great Essays in Science

Edited by **MARTIN GARDNER**

Noted science writer Martin Gardner has put together this collection of classic writings by Charles Darwin, Carl Sagan, Aldous Huxley, Bertrand Russell, Stephen Jay Gould, Albert Einstein, Lewis Thomas, Sigmund Freud, Isaac Asimov, Rachel Carson, and many other eminent scientists, authors, and philosophers. * "The table of contents reads like the menu of an intellectual smorgasbord" — *Science Activities*. "There are ... many intellectual surprises in this highly individual selection." — *Nature*

Disease and Civilization

The Cholera in Paris, 1832

François Delaporte

translated by Arthur Goldhammer

foreward by Paul Rabinow

“The meaning of disease and the meaning of civilization in western culture are examined in a fresh light reflected from the Paris of 1832, and contemporary French historicism. Most convincingly, Delaporte shows how in popular fantasy epidemic cholera ‘was conceived as an instrument for settling social scores.’” – Barbara G. Rosencrantz, Harvard University

“Delaporte brings to his study of the 1832 cholera epidemic that combination of rigor and provocative insight which we associate with his mentor, Michel Foucault.” – Matthew Ramsey, Vanderbilt University

\$22.50

Vaulting Ambition

Sociobiology and the Quest for Human Nature

Philip Kitcher

“The best dissection ever published on the logic and illogic (mostly the latter) of sociobiology.” – Stephen Jay Gould

“The most impressive account of sociobiology that has been provided by any critic. No one interested in human sociobiology can afford to ignore his analyses.” – *The New York Times Book Review*

THE WHALE AND THE REACTOR

*A Search for Limits
in an Age of High Technology*

Langdon Winner

Considering a wide range of issues, theories, and social movements, Winner explores the philosophical, political, and social implications of technology. He demonstrates that choices about the kinds of technical systems we build and use are actually *political* decisions, involving profound choices about power, liberty, order, and justice.

Cloth \$17.50 214 pages.

CONSTRUCTING QUARKS

*A Sociological History
of Particle Physics*

Andrew Pickering

"Constructing Quarks chronicles what many have begun to regard as a major revolution in 20th-century science—the discovery of quarks and gauge field theories of strong, electromagnetic and weak interactions. . . . A prodigious piece of scholarship that I can heartily recommend to physicists, philosophers, and historians of science."—Michael Riordan, *New Scientist*

PHILOSOPHY OF SCIENCE

Typescript. Typescript, double-spaced, should be submitted (in triplicate) to Professor Robert E. Butts, Department of Philosophy, Talbot College, University of Western Ontario, London, Ontario, Canada N6A 3K7. Typescripts will not be returned unless return postage is prepaid by cheque, money order, International Reply Coupons or Canadian stamps. A bibliographical list of cited references beginning with the author's last name, initials, followed by the year of publication in parentheses, should be headed 'References' and placed on a separate sheet in alphabetical order. Simple citations should then be made by employing in the text, rather than by footnote, the reference list by citing author and year of publication, e.g., Jones (1958) or (Smith 1974, p. 46). A detailed guide to the new reference style appears in the March issue of each year. Discursive footnotes should be numbered consecutively throughout the typescript. *Typescript should not exceed thirty-five double-spaced pages. Longer essays will be returned to the author(s) to be cut to the acceptable maximum. A summary abstract of approximately 100 words should accompany each article.* All illustrations must be professionally drawn and lettered. All formulas and equations should be put in such a form as to help minimize the number of printed lines in the journal. In the following examples the form on the right is preferable to that on the left:

$$(1) \quad p = -\frac{dx}{dy} = -\frac{dz}{dt} \qquad p = -dx/dy = -dz/dt$$

$$(2) \quad \frac{1}{x} \prod_{n=1}^{\infty} \frac{\left(1 + \frac{1}{a_n}\right)}{\left(1 - \frac{1}{b_n}\right)} \qquad (1/x) \prod_{n=1}^{\infty} [(1 + 1/a_n)/(1 - 1/b_n)]$$

Page charges. There is a two dollar per page publication charge for individuals who are not members of the Philosophy of Science Association.

Copyright. Manuscripts should be submitted to *Philosophy of Science* with the understanding that upon publication copyright will be transferred to the Philosophy of Science Association.

Reprints. Contributors of articles to this journal will receive, gratis, 25 reprints. Authors desiring additional reprints may order them by sending in, with their corrected galley, the special order forms which they will find enclosed with their galley.

Reviews. Publications intended for review should be sent to Prof. William Demopoulos, at the address given above.

Philosophy of Science is published quarterly; issues are dated *March, June, September* and *December* of each year. Correspondence concerning business matters should be addressed to Peter D. Asquith, Executive Secretary, Department of Philosophy, Michigan State University, East Lansing, Michigan 48824.

Membership and Subscriptions. Membership in the Philosophy of Science Association may be applied for by writing to the Executive Secretary of the Association. Membership dues are \$35.00 a year and include subscription to the journal. Subscription price for non-members is \$45.00 U.S.A. (\$46.00 non-U.S.A.) per volume. New subscriptions and renewals are entered to begin with the first issue of the current volume. Should any issue of the current volume be out of print at the time the subscription order is received, the pro-rata value will be refunded to the subscriber. Duplicate copies may be obtained (if available) from the Executive Secretary at the regular price of single issues (\$12.00). Subscriptions at a reduced rate of \$18.00 a year are available to qualified students; inquire of the Executive Secretary.
