

Notes for Contributors

All manuscripts should be submitted via our on-line system, ScholarOne Manuscripts at: <http://mc.manuscriptcentral.com/psrm>

Other forms of submission will not be accepted by the editors.

The journal publishes two types of articles:

- a) full length manuscripts that present original, well researched, and fully developed empirical or theoretical work
- b) research notes

Normal length articles that should not exceed 9,000 words in length, including tables, figures, footnotes, references and printed appendices, but excluding any supporting material that can be relegated to an online appendix.

Research notes that should not exceed 4,000 words in length, including tables, figures, footnotes, references and printed appendices, but excluding any supporting material that can be relegated to an online appendix.

Research notes should contain original work and present a new method or methodology (particularly useful if related software components are included) to solve an important problem in applied data analysis, present a new theoretical idea or argument, or comment on other articles published in the journal. *PSRM* welcomes comments to as well as replications of published articles. These will undergo the usual peer review process and if accepted will be published in the research notes section of the journal.

PSRM uses a single-blind peer review process, thus anonymizing your manuscript is not necessary.

Replication Policy: *PSRM* has a strict replication policy which adheres to the Data Access and Research transparency (DA-RT) statement subscribed to by many Political Science Journal Editors in 2015. Authors are required to make replication material publicly available at time of publication of the article. The replication materials must be sufficient to replicate results in all tables and figures printed in the article, including simulation material for both theoretical (e.g. agent based models) and empirical (e.g. Monte Carlo experiments) work. Data and replication code for your article, as well as a log demonstrating smooth running of all the replication files, must be uploaded in a single .zip file to the *PSRM* Dataverse at <https://dataverse.harvard.edu/dataverse/PSRM>. (See the *PSRM* Dataverse Guide for a step-by-step walkthrough for uploading your material, which is also linked to on the *PSRM* Dataverse homepage). This is a necessary condition for publication of the manuscript. All manuscripts are accepted contingent on their replicability, which will initially be assessed by *PSRM* staff. Manuscripts that are not replicable will be rejected for publication. If your analysis relies on simulation techniques (MCMC, MC experiments) we require authors to set and communicate a seed, so that exact results can be replicated. If this is impossible due to the design of the analysis, replication results need not deviate by more than 5 per cent from published results in the manuscript.

Authors are responsible for obtaining permission to reproduce any material they do not own the copyright for and for ensuring appropriate acknowledgment of such material.

All manuscripts should follow the manuscript preparation guidelines available online in the full instructions for contributors.

Full Instructions for Contributors can be found online at <http://www.journals.cambridge.org/psrm/ifc>

Rights and Permissions info

All rights reserved. No part of this publication may be reproduced, stored or transmitted in any form or by any means without the prior permission in writing from the copyright holder. This journal is registered with the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923, USA. Organizations in the USA who are also registered with the C.C.C. may, therefore copy material (beyond the limits permitted by, sections 107 and 108 of U.S. Copyright law) subject to payment to the C.C.C. of the appropriate fee per copy. This consent does not extend to multiple copying for promotional or commercial purposes.

For all other use, permission should be sought from Cambridge or the American Branch of Cambridge University Press.

Subscriptions

Political Science Research and Methods is published four times a year in January, April, July, and October. The 2022 subscription price (excluding VAT) of a volume, which includes print and electronic access, is £528.00 (US \$752.00 in USA, Canada and Mexico); £46.00 (US \$69.00) for individuals, which includes print and electronic access, ordering direct from the publishers and certifying that the journal is for their personal use. The electronic-only price available to institutional subscribers is £440.00 (US \$703.00 in USA, Canada and Mexico). EU subscribers (outside the UK) who are not registered for VAT should add VAT at their country's rate. VAT registered subscribers should provide their VAT registration number. Prices include delivery by air when appropriate. Japanese prices for institutions are available from Kinokuniya Company Ltd, P.O. Box 55, Chitose, Tokyo 156, Japan. Orders, which must be accompanied by payment, may be sent to a bookseller, subscription agent or direct to the publisher: Cambridge University Press, Journals Fulfillment Department, UPH, Shaftesbury Road, Cambridge CB2 8BS, UK; or in the USA, Canada and Mexico: Cambridge University Press, 1 Liberty Plaza, Floor 20, New York, NY 10006, USA. Periodicals postage paid at New York, NY and additional mailing offices.

Political Science Research and Methods

Contents

ORIGINAL ARTICLES

- 227 Bargaining outcomes and success in EU economic governance reforms
Fabio Franchino and Camilla Mariotto
- 243 Complex dependence in foreign direct investment: network theory and empirical analysis
John Schoeneman, Boliang Zhu and Bruce A. Desmarais
- 260 Retrospection, fairness, and economic shocks: how do voters judge policy responses to natural disasters?
Michael M. Bechtel and Massimo Mannino
- 279 Backlash to policy decisions: how citizens react to immigrants' rights to demonstrate
Richard Traunmüller and Marc Helbling
- 298 When growth is not enough: inequality, economic gains, and executive approval
Ryan E. Carlin, Timothy Hellwig, Gregory J. Love, Cecilia Martinez-Gallardo and Matthew M. Singer
- 317 How government-controlled media shifts policy attitudes through framing
Jennifer Pan, Zijie Shao and Yiqing Xu
- 333 Transformed-likelihood estimators for dynamic panel models with a very small T
Mark Pickup and Vincent Hopkins
- 353 The grapevine effect in sensitive data collection: examining response patterns in support for violent extremism
John McCauley, Steven Finkel, Michael Neureiter and Christopher Belasco
- 372 Point break: using machine learning to uncover a critical mass in women's representation
Kendall D. Funk, Hannah L. Paul and Andrew Q. Phillips
- 391 Sidestepping primary reform: political action in response to institutional change
Seth J. Hill

RESEARCH NOTES

- 408 Analyzing the cross-national comparability of party positions on the socio-cultural and EU dimensions in Europe
Ryan Bakker, Seth Jolly and Jonathan Polk
- 419 The effect of drone strikes on civilian communication: evidence from Yemen
Fotini Christia, Spyros I. Zoumpoulis, Michael Freedman, Leon Yao and Ali Jadbabaie
- 428 Separation and Rare Events
Liam F. Beiser-McGrath
- 438 How many major US laws delegate to federal agencies? (almost) all of them
Pamela J. Clouser McCann and Charles R. Shipan
- 445 Are voters' views about proportional outcomes shaped by partisan preferences?
A survey experiment in the context of a real election
André Blais, Semra Sevi and Carolina Plescia
