

International Journal of Epidemiology

Editor: P.O.D. Pharoah
University of Liverpool, UK

The **International Journal of Epidemiology** encourages communication amongst those engaged in the research, teaching and application of epidemiology throughout the world. It is concerned with the epidemiology of both infectious and non-infectious diseases, with research into health services and medical care, and with new methods, statistical or otherwise, for the analysis of data used by those who practise social and preventive medicine.

The **International Journal of Epidemiology** is now published in six issues every year by Oxford University Press and is the official journal of the *International Epidemiological Association*.

Immunology and Infectious Diseases

EDITOR-IN-CHIEF: R K Chandra, *Janeway Child Health Centre, Newfoundland, Canada*

Assisted by a distinguished International Editorial Board

New experimental techniques in the related fields of immunity and infection have created a sudden vast increase in knowledge of the immune system and infectious agents and their interconnection. This in turn has led to the need for a reliable outlet in order that others profit from this information. *Immunology and Infectious Diseases* provides the answer, covering such topics as:

- Immunoregulation
- Immunosurveillance
- Ecology and epidemiology of infections
- Microbial virulence factors
- Functions of immunocompetent cells
- Cytokines and other mediators of immune responses

The Editors invite submission of research papers. Sample copies, which include Instructions for Authors, are available on request.

RECENT PAPERS INCLUDE:

REVIEW PAPER

Prospects for a respiratory syncytial virus vaccine *D Isaacs*

WHAT CAN YOU GET FOR £1 A WEEK?

- * A current monthly contents service
- * Over 1,000 titles retrieved per month
 - * 950 journals sourced
- * Efficiently organised by subject area
 - * Extensively cross-referenced
 - * Author's address with paper
 - * Full author index in each issue

For only £1 a week you can subscribe to
**CURRENT ADVANCES IN APPLIED
MICROBIOLOGY & BIOTECHNOLOGY**

No other contents service matches this!

In the last twelve months this service retrieved over 12,000 titles from 950 journals! Were you aware of this much information being published in your area? How many of these titles did you see?

Titles are subject categorized by our specialist editors and cross referenced in great detail. You can go straight to your area of interest without ploughing through pages of irrelevant data and confident that you haven't missed something vital.

The author's address is given with each paper, so with this service you don't have to search endlessly through the index when you want to write for a reprint.

If you want to see what your colleagues are publishing, you can look at the full author index given with each issue, which will give you the reference numbers of all their papers.

Is £1 a week too much to pay to keep abreast of current literature published in your area?

Subscribe now to **CURRENT ADVANCES IN APPLIED MICROBIOLOGY & BIOTECHNOLOGY**, a publication from the Current Awareness in Biological Sciences (CABS) Database.
