# World Politics

Published for the  
Princeton Institute for International and Regional Affairs

## Chair of the Editorial Board

Atul Kohli, *Princeton University, USA*

*World Politics*, founded in 1948, is an internationally renowned quarterly journal of political science produced under the editorial sponsorship of the Princeton Institute for International and Regional Studies at Princeton University. The journal is published in both print and online versions. Open to contributions by all scholars, *World Politics* invites submission of research articles that make theoretical and empirical contributions to the literature, review articles, and research notes bearing on problems in international relations and comparative politics. The journal does not publish articles on current affairs, policy pieces, or narratives of a journalistic nature. Articles submitted for consideration are unsolicited, except for review articles, which are usually commissioned.

## New in 2014

### Journal of Experimental Political Science

Published for the Experimental Research Section of the American Political Science Association

#### Editors

Rebecca B. Morton, *New York University, USA*

Joshua A. Tucker, *New York University, USA*

The *Journal of Experimental Political Science (JEPS)* features research - be it theoretical, empirical, methodological, or some combination thereof - that utilizes experimental methods or experimental reasoning based on naturally occurring data. We define experimental methods broadly: research featuring random (or quasi-random) assignment of subjects to different treatments in an effort to isolate causal relationships between variables of interest. *JEPS* embraces all of the different types of experiments carried out as part of political science research, including survey experiments, laboratory experiments, field experiments, lab experiments in the field, natural and neurological experiments.

## Notes for Contributors

All manuscripts should be submitted via our on-line system, ScholarOne Manuscripts at: <http://mc.manuscriptcentral.com/psrm>

Other forms of submission will not be accepted by the editors.

The journal publishes two types of articles:

- a) full length manuscripts that present original, well researched, and fully developed empirical or theoretical work
- b) research notes

Normal length articles that should not exceed 9,000 words in length, including tables, figures, footnotes, references and printed appendices, but excluding any supporting material that can be relegated to an online appendix.

Research notes that should not exceed 4,000 words in length, including tables, figures, footnotes, references and printed appendices, but excluding any supporting material that can be relegated to an online appendix.

Research notes should contain original work and present a new method or methodology (particularly useful if related software components are included) to solve an important problem in applied data analysis, present a new theoretical idea or argument, or comment on other articles published in the journal. *PSRM* welcomes comments to as well as replications of published articles. These will undergo the usual peer review process and if accepted will be published in the research notes section of the journal.

*PSRM* uses a single-blind peer review process, thus anonymizing your manuscript is not necessary. If you feel strongly about a fully anonymous review process, you may opt out and your manuscript will undergo a double blind review process.

Replication Policy: *PSRM* has a strict replication policy and authors are required to make replication material publicly available prior to publication of the article. The replication materials must be sufficient to replicate results in all tables and figures printed in the article, including simulation material for both theoretical (e.g. agent based models) and empirical (e.g. Monte Carlo experiments) work. Data and replication code for your article must be uploaded to the *PSRM* Dataverse. This is a necessary condition for publication of the manuscript. All manuscripts are accepted contingent on their replicability, which will initially be assessed by *PSRM* staff. Manuscripts that are not replicable will be rejected for publication.

Authors are responsible for obtaining permission to reproduce any material they do not own the copyright for and for ensuring appropriate acknowledgment of such material.

All manuscripts should follow the manuscript preparation guidelines available online in the full instructions for contributors.

Full Instructions for Contributors can be found online at <http://www.journals.cambridge.org/psrm/ifc>
