

BOOKS RECEIVED

Unicité et convexité dans les problèmes différentiels, by S. Agmon. Les Presses de l'Université de Montréal, 1966. 154 pages.

Functional analysis, by G. Bachman and L. Narici. Academic Press, 1966. xiv + 530 pages.

Problèmes aux limites non homogènes, by J. Barros-Netto. Les Presses de l'Université de Montréal, 1965. 87 pages.

Elements of probability theory, by J. Bass. Academic Press, New York, 1966. xiv + 249 pages.

La programmation dynamique et ses applications, by R. E. Bellman et S. E. Dreyfus. Dunod, Paris, 1965. xii + 385 pages.

Distributions and the boundary values of analytic functions, by E. J. Beltrami and M. R. Wohlers. Academic Press, New York, 1966. xiv + 116 pages.

Mathematical theory of connecting networks and telephone traffic, by V. E. Beneš. Academic Press, New York, 1965. xiv + 319 pages.

Equations aux dérivées partielles, by R. Carroll, G. Duff, J. Friberg, J. Gobert, P. Grisvard, J. Nécas, and R. Seeley. Les Presses de l'Université de Montréal, 1965. 144 pages.

Numerical solution of initial value problems, by F. Ceschino and J. Kuntzmann. Prentice-Hall, Inc., Englewood Cliffs, N. J., 1966. xvi + 318 pages.

A model of simple competition, by J. E. Cohen. Harvard University Press, Cambridge, 1966. x + 138 pages.

Optimierungsaufgaben, by L. Collatz and W. Wetterling. Springer Verlag, Berlin, Heidelberg, New York, 1966.

Solutions élémentaires des dalembertiens généralisés, by E. Combet. Gauthier-Villars, Paris, 1965. 96 pages.

The doctrine of chances, or a method of calculating the probabilities of events in play, by A. de Moivre. Reprint of the 3rd London Edition of 1756, containing a bibliographic article by H. M. Walker (reprinted from Scripta Math. 2). Chelsea Publishing Company, New York, 1967. 368 pages.

Fourier series, Volume I, by R. E. Edwards. Holt Rinehart and Winston, 1967. x + 208 pages.

Introduction to the theory of differential equations with deviating arguments, by L. E. El'sgol'ts. Holden-Day Inc., San Francisco, 1966. vii + 109 pages.

Mathematische Olympiadeaufgaben aus der USSR, by A. Engel (editor). Ernst Klett Verlag, Stuttgart, 1965. 155 pages.

Analytic functions, by M.A. Evgarov. W.B. Saunders Co., Philadelphia, 1966; McInsh Ltd., Toronto. x + 336 pages.

Intégration dans les groupes topologiques, by G. Fox. Les Presses de l'Université de Montréal, 1964. 357 pages.

Complex variable proofs of Tauberian theorems, by D. Gaier. Institute of Mathematical Sciences, Madras, undated. 78 pages.

Théorie des matrices, by F.R. Gantmacher. Tome I - Théorie générale. xiii + 370 pages. Tome II - Questions spéciales et applications. xii + 268 pages. Dunod, Paris, 1966.

Analyse numérique linéaire, by N. Gastinel. Hermann, Paris, 1966. xii + 364 pages.

Inequalities on distribution functions, by H.J. Godwin. No. 16 of Griffin's Statistical Monographs. Griffin and Co. Ltd., London, 1964. 96 pages.

Precalculus mathematics, by J.F. Golightly. W.B. Saunders Co. of Canada Limited, Toronto, 1968. xi + 456 pages.

Numerical solutions of non-linear differential equations, by D. Greenspan. Proc. Symp. Math. Res. Center Wisconsin, 1966. Wiley, New York, 1966. x + 347 pages.

Brief numerical methods, by W.E. Grove. Prentice-Hall Inc. Englewood Cliffs, N.J., 1966. ix + 117 pages.

Integral, measure and derivative: a unified approach, by S. Gurevich and G.E. Shilov. Prentice-Hall Inc. Englewood Cliffs, N.J., 1966. xiv + 233 pages.

Methods of numerical approximation, by D.C. Handscomb. Pergamon Press, Oxford and London, 1966. ix + 218 pages.

Le calcul symbolique et ses applications à la physique mathématique, by P. Humbert et S. Colombo. Deuxième édition, revue et augmentée. Gauthier-Villars, Paris, 1965. 74 pages.

Séries de Fourier aléatoires, by J.P. Kahane. Les Press de l'Université de Montréal, 1966. 188 pages.

La programmation dynamique, by A. Kaufmann et R. Cruon. Dunod, Paris, 1965. xvi + 273 pages.

Foundations of potential theory, by O.D. Kellogg. Springer-Verlag, Berlin, Heidelberg, New York, 1967. x + 384 pages.

Continued fractions, by A. Ya. Khintchine. P. Noordhoff, Groningen, 1963. 101 pages.

Formes integro-différentielles non-coercives, by J.J. Kohn. Les Presses de l' Université de Montréal, 1966. v + 68 pages.

Représentabilité et définissabilité dans les algèbres transformationnelles et dans les algèbres polyadiques, by L. Leblanc. Les Presses de l'Université de Montréal, 1966. 126 pages.

Logische Probleme im Mathematikunterricht, III, by E. Löffler (editor). Der Mathematikunterricht 13, Heft 5. Ernst Klett Verlag, Stuttgart. 90 pages.

Theory of functions of a complex variable, by A.I. Markushevich. Volume III. Prentice-Hall Inc., Englewood Cliffs, N.J., 1967. xi + 360 pages.

Les variables régionalisées et leur estimation, by G. Mathéron. Masson et Cie, Paris, 1965. 305 pages.

The place of the circle in elementary geometry, by W.G. McNemeny. Philosophical Library, New York, 1967. xi + 73 pages.

Evolution of mathematical thought, by H. Meschkowski. Translated by J.H. Gayl. Holden Day Inc., San Francisco, 1965. x + 157 pages.

Selected topics in weak interaction, by Ph. Meyer. Institute of Mathematical Sciences, Madras, undated. 81 pages.

Theorie des oscillations, by N. Minorsky. Gauthier-Villars, Paris, 1967. 114 pages.

Geometric transformations, by P.S. Modenov and A.S. Parkhomenko. Academic Press, New York, 1967. Volume 1, x + 160 pages. Volume 2, xi + 136 pages.

Monge-Ampere equations of elliptic type, by A.V. Pogorelov. P. Noordhoff Limited, Groningen, 1964. vii + 116 pages.

Lectures on nuclear models and nuclear matter, by K.S. Rao and R. Sridhar. Institute of Mathematical Sciences, Madras, undated. 202 pages.

Problèmes de mathématiques, by D.D. de Rauly. Gauthier-Villars, Paris, 1963. 221 pages.

Vorlesungen über Grundlagen der Geometrie, by K. Reidemeister. Berichtiger Nachdruck. Springer-Verlag, Berlin, Heidelberg, New York, 1968. x + 147 pages.

The MAA Problem Book - II, by C.J. Salkind. Random House, New York, 1966. vi + 112 pages.

Smoothing and approximation of functions, by H.S. Shapiro. Institute of Mathematical Sciences, Madras, undated. 109 pages.

Geometry and analysis of projective spaces, by C.E. Springer. W.H. Freeman and Co., San Francisco, 1964. xi + 299 pages.

Spektraldarstellung linearer transformationen des Hilbertschen Raumes, by Sz-Nagy. Berichtiger Nachdruck. Springer Verlag, Berlin, Heidelberg, New York, 1967. vi + 81 pages.

- Calculus with analytic geometry and linear algebra, by L. V. Toralballa. Academic Press, 1966. xv + 920 pages.
- Fonctions abéliennes et fonctions theta de deux variables, by C. E. Traynard. Gauthier-Villars, Paris, 1963. 54 pages.
- Totalisations dans les espaces abstraits, by W. J. Trjitzinsky. Gauthier-Villars, Paris, 1963. 131 pages.
- La régularité moyenne dans la théorie métrique, by W. J. Trjitzinsky. Gauthier-Villars, Paris, 1965. 88 pages.
- Totalisation des séries dans les espaces abstraits, by W. J. Trjitzinsky. Gauthier-Villars, Paris, 1965. 69 pages.
- Selected topics on gravitation, by P. C. Vaidya. Institute of Mathematical Sciences, Madras, undated. 76 pages.
- The Morse theory and its application to solid state physics, by J. F. Veverka. Queens Papers in Pure and Applied Mathematics, Kingston, 1966. 103 pages.
- Mathematische Grundlagen der Quantenmechanik, by J. von Neumann. Unveränderter Nachdruck. Springer-Verlag, Berlin, Heidelberg, New York, 1968. 266 pages.
- Algebraic curves, by R. J. Walker. Reprint of 1949 edition. Dover Publishing Company, New York, 1962. x + 201 pages.
- Numerical analysis: an introduction, by J. Walsh. Academic Press, Inc. (London) Limited. xiv + 212 pages.
- Introduction to numerical analysis, by G. P. Weeg and G. B. Reed. Blaisdell, Waltham, 1966. vii + 184 pages.
- Equations différentielles abstraites, by S. Zaidman. Les Presses de l'Université de Montréal, 1965. 81 pages.
