

INSTRUCTIONS FOR CONTRIBUTORS

SUBMISSION OF MANUSCRIPTS

Manuscripts should be submitted online via our manuscript submission and tracking site, <http://www.editorialmanager.com/psm/>. Full instructions for electronic submission are available directly from this site. To facilitate rapid reviewing, communications for peer review will be electronic and authors will need to supply a current e-mail address when registering to use the system.

Papers for publication from Europe (except those on genetic topics, irrespective of country), and all papers on imaging topics, should be submitted to the UK Office.

Papers from the Americas, Asia, Africa, Australasia and the Middle East (except those dealing with imaging topics), and all papers dealing with genetic topics, irrespective of country, should be sent to US Office.

Generally papers should not have text more than 4500 words in length (excluding these sections) and should not have more than a combined total of 5 tables and/or figures. Papers shorter than these limits are encouraged. For papers of unusual importance the editors may waive these requirements. A structured abstract of no more than 250 words should be given at the beginning of the article using the headings: Background; Methods; Results; Conclusions. The name of an author to whom correspondence should be sent must be indicated and a full postal address given in the footnote. Any acknowledgements should be placed at the end of the text (before the References section).

Declaration of Interest: A statement must be provided in the acknowledgements listing all financial support received for the work and, for all authors, any financial involvement (including employment, fees, share ownership) or affiliation with any organization whose financial interests may be affected by material in the manuscript, or which might potentially bias it. This applies to all papers including editorials and letters to the editor.

Contributors should also note the following:

1. S.I. units should be used throughout in text, figures and tables.
2. Authors should spell out in full any abbreviations used in their manuscripts.
3. Foreign quotations and phrases should be followed by a translation.
4. If necessary, guidelines for statistical presentation may be found in: **Altman DG, Gore SM, Gardner MJ & Pocock SJ** (1983). Statistical guidelines for contributors to medical journals. *British Medical Journal* **286**, 1489–1493.

REFERENCES (1) The Harvard (author-date) system should be used in the text and a complete list of References cited given at the end of the article. In a text citation of a work by more than two authors cite the first author's name followed by et al. (but the names of all of the authors should be given in the References section). Where several references are cited together they should be listed in rising date order. (2) The References section should be supplied in alphabetical order (authors' names in **bold**, journal titles in full), following the text. Some examples follow:

Miller PM, Byrne M, Hodges A, Lawrie SM, Johnstone EC (2002). Childhood behaviour, psychotic symptoms and psychosis onset in young people at high risk of schizophrenia: early findings from the Edinburgh high risk study. *Psychological Medicine* **32**, 173–179.

Cleckley HJ (1941). *The Mask of Sanity*, 2nd edn. Mosby: St. Louis, MO.

Brewer WJ, Wood SJ, DeLuca C, Pantelis C (2006). Models of olfaction for exploring neurodevelopment. In *Olfaction and the Brain* (ed. W. J. Brewer, D. Castle and C. Pantelis), pp. 97–121. Cambridge University Press: Cambridge.

(3) Online citations

doi (when published online prior to printed issue)

Lauritsen MB, Pedersen CB, Mortensen CB (2004). The incidence and prevalence of pervasive developmental disorders: a Danish population-based study. *Psychological Medicine*. Published online: 21 October 2004. doi:10.1017/S0033291704002387.

[Authors are requested to print-out and keep a copy of any online-only material, in case the URL changes or is no longer maintained.]

FIGURES AND TABLES Only essential figures and tables should be included. Further tables, figures, photographs and appendices, may be included with the online version on the journal website. To ensure that your figures are reproduced to the highest possible standards, Cambridge Journals recommends the following formats and resolutions for supplying electronic figures. Please ensure that your figures are saved at final publication size and are in our recommended file formats. Following these guidelines will result in high quality images being reproduced in both the print and the online versions of the journal. **Line artwork:** Format: tif or eps, Colour mode: black and white (also known as 1-bit), Resolution: 1200 dpi; **Combination artwork (line/tone):** Format: tif or eps, Colour mode: grayscale (also known as 8-bit), Resolution: 800 dpi; **Black and white halftone artwork:** Format: tif, Colour mode: grayscale (also known as 8-bit), Resolution: 300 dpi; **Colour halftone artwork:** Format: tif, Colour mode: CMYK colour, Resolution: 300 dpi. All photographs, graphs, and diagrams should be referred to as figures and should be numbered consecutively in Arabic numerals. Captions for figures should be typed double-spaced on separate sheets. *Tables* Tables should be numbered consecutively in the text in Arabic numerals and each typed on a separate sheet after the References section. Titles should be typed above the table.

PROOFS AND OFFPRINTS Page proofs will be sent to the author designated to receive correspondence. corrections other than to printer's errors may be charged to the author. The corresponding author of each paper will receive a PDF file of their article and hard copy offprints may be purchased if they are ordered on the form supplied when the proof is returned.

PSYCHOLOGICAL MEDICINE

CONTENTS

REVIEW ARTICLE

- Economic downturns and population mental health: research findings, gaps, challenges and priorities**
Zivin K, Paczkowski M & Galea S 1343

COMMENTARY

- No medication without representation? Generalizing from antidepressant clinical efficacy trials to clinical practice**
Anderson IM 1349

ORIGINAL ARTICLES

- The generalizability of antidepressant efficacy trials to routine psychiatric out-patient practice**
van der Lem R, van der Wee NJA, van Veen T & Zitman FG 1353

- Income and the midlife peak in common mental disorder prevalence**
Lang IA, Llewellyn DJ, Hubbard RE, Langa KM & Melzer D 1365

- A computer-assisted depression intervention in primary care**
Levin W, Campbell DR, McGovern KB, Gau JM, Kosty DB, Seeley JR & Lewinsohn PM 1373

- Parental depression and offspring psychopathology: a Children of Twins study**
Singh AL, D'Onofrio BM, Slutske WS, Turkheimer E, Emery RE, Harden KP, Heath AC, Madden PAF, Statham DJ & Martin NG 1385

- Neural basis of emotion recognition deficits in first-episode major depression**
van Wingen GA, van Eijndhoven P, Tendolkar I, Buitelaar J, Verkes RJ & Fernández G 1397

- Pre-adult versus adult onset major depressive disorder in a naturalistic patient sample: the Leiden Routine Outcome Monitoring Study**
van Noorden MS, Minkenberg SE, Giltay EJ, den Hollander-Gijsman ME, van Rood YR, van der Wee NJ & Zitman FG 1407

- Depressive symptom clusters are differentially associated with atherosclerotic disease**
Bus BAA, Marijnissen RM, Holewijn S, Franke B, Purandare N, de Graaf J, den Heijer M, Buitelaar JK & Oude Voshaar RC 1419

- Predictors of onset of depression and anxiety in the year after diagnosis of breast cancer**
Hill J, Holcombe C, Clark L, Boothby MRK, Hincks A, Fisher J, Tufail S & Salmon P 1429

- The anxiety disorders and suicidal ideation: accounting for co-morbidity via underlying personality traits**
Naragon-Gainey K & Watson D 1437

- Global and regional cortical thinning in first-episode psychosis patients: relationships with clinical and cognitive features**
Crespo-Facorro B, Roiz-Santíañez R, Pérez-Inglesias R, Rodríguez-Sánchez JM, Mata I, Tordesillas-Gutiérrez D, Sánchez E, Tabarés-Seisdedos R, Andreasen N, Magnotta V & Vázquez-Barquero JL 1449

- Early detection of psychosis: positive effects on 5-year outcome**
Larsen TK, Melle I, Auestad B, Haahr U, Joa I, Johannessen JO, Opjordsmoen S, Rund BR, Rossberg JI, Simonsen E, Vaglum P, Friis S & McGlashan T 1461

- Patients with schizophrenia show increased aversion to angry faces in an associative learning task**
Evans S, Shergill SS, Chouhan V, Bristow E, Collier T & Averbeck BB 1471

- The different trajectories of antipsychotic response: antipsychotics versus placebo**
Marques TR, Arenovich T, Agid O, Sajeev G, Muthén B, Chen L, Kinon BJ & Kapur S 1481

- Visual masking by object substitution in schizophrenia**
Green MF, Wynn JK, Breitmeyer B, Mathis KI & Nuechterlein KH 1489

- Common genetic and environmental contributions to post-traumatic stress disorder and alcohol dependence in young women**
Sartor CE, McCutcheon VV, Pommer NE, Nelson EC, Grant JD, Duncan AE, Waldron M, Bucholz KK, Madden PAF & Heath AC 1497

- Predicting alcohol consumption in adolescence from alcohol-specific and general externalizing genetic risk factors, key environmental exposures and their interaction**
Kendler KS, Gardner C & Dick DM 1507

- Relationship between adiposity, emotional status and eating behaviour in obese women: role of inflammation**
Capuron L, Poitou C, Machaux-Tholliez D, Frochot V, Bouillot J-L, Basdevant A, Layé S & Clément K 1517

- P300 deficits in adults with attention deficit hyperactivity disorder: a meta-analysis**
Szuromi B, Czobor P, Komlósi S & Bitter I 1529

- Voxel-based meta-analysis of regional white-matter volume differences in autism spectrum disorder versus healthy controls**
Radua J, Via E, Catani M & Mataix-Cols D 1539

- Effects of a CACNA1C genotype on attention networks in healthy individuals**
Thimm M, Kircher T, Kellermann T, Markov V, Krach S, Jansen A, Zerres K, Eggermann T, Stöcker T, Shah NJ, Nöthen MM, Rietschel M, Witt SH, Mathiak K & Krug A 1551
