

BOOKS, ETC., RECEIVED.—Continued.

The American Journal of Mathematics. Edited by F. MORLEY. Vol. xxvii. No. 2. April, 1905. (Kegan Paul.) 1\$.50.

On a Class of Differential Equations. A. Chessin. *Surfaces with the same Spherical Representation of their Lines of Curvature as Pseudo-spherical Surfaces.* L. P. Eisenhart. *On the Forms of Sactic Scrolls having no Rectilinear Directrix.* V. Snyder. *Determination of the Ternary Modular Groups.* L. E. Dickson.

Annals of Mathematics. Edited by ORMOND STONE and others. Vol. 6, No. 3. Ap. 1905. 2s. (Longmans.)

Groups of the Fundamental Operations of Arithmetic. G. A. Miller. *Linear Differential Equations with discontinuous Coefficients.* M. Böcher. *Some Physical Solutions of the general Equations of the n th degree.* R. E. Moritz. *The Ballistic Problem.* F. Gilman. *A Theorem concerning Uniform Convergence.* G. D. Birkhoff.

PROCEEDINGS OF THE EDINBURGH MATHEMATICAL SOCIETY.

Vol. XXII.

Williams and Norgate.

7s. 6d.

CONTENTS:—J. W. Butters, *On the use of Symmetry in Geometry*; E. Collignon, *Sur l'intégration de $\alpha^n \cos \alpha da$, $\alpha^n \sin \alpha da$* ; R. F. Davis, *On the quadrilateral circumscribed to two circles*; Prof. Gibson, *Note on M. Collignon's Paper. Note on the Treatment of Tangents in recent Text-books of elementary Geometry*; A. Holm, *Some points in Diophantine Analysis*; F. H. Jackson, *A Basic-sine and cosine. A Theorem of Lommel*; J. H. Maclagan-Wedderburn, *On the Linear Matrix Equation*; R. F. Muirhead, *On "power" in Geometry, and a "doubtful sign." Solution of a Geometrical Problem. Minimum Deviation through a Prism*; D. K. Picken, *On the Fractional Infinite Series for cosec x , etc. On $f(D)\sum_1^n a_r x^r$* ; P. Pinkerton, *The turning values of a cubic function and the roots of a cubic equation. On a Geometrical Problem*; C. Tweedie, *An Inequality Theorem in Geometry. On Newton's Theorem of Symmetric Functions.*

New Book for the Army "Leaving" and "Qualifying" Certificate.

NOW READY. CROWN 8vo, 2s. 6d.

ELEMENTARY PRACTICAL MATHEMATICS

By H. A. STERN, M.A.,

Late Open Mathematical Scholar of Corpus Christi College, Oxford, etc.,
Principal of Cedar Court Army College, Roehampton;

AND

W. H. TOPHAM,

Science Instructor at Cedar Court Army College, and at Harrow School.

CONTENTS:—Introductory Remarks—Contracted Arithmetical Processes—Graphical Methods—Measurement of Length—Measurement of Angles—Measurement of Mass—Measurement of Area—Measurement of Volume—Measurement of Specific Gravity—Calibration of Tubes and Graduated Vessels—Appendix on the Construction of a Common Hydrometer—Index—Answers to Examples.

* * This volume forms the first portion of a treatise on "The Elements of Practical Mathematics and Physical Measurement," by the same authors, now in the Press.

"This useful little text-book on the new subject for Army Candidates has been issued as a preliminary to a more comprehensive and advanced work on practical mathematics by the same authors, to be published at an early date. The present book deals only with the more elementary portions of the subject, but covers all that part of the course that is required by the Army Council for the 'Leaving Certificate' and 'Qualifying' examinations. It is intended to supplement the ordinary theoretical work of the student and not to replace it. Many of the examples given in the chapter on graphical methods have been taken from recent army examination papers. The work is capably illustrated, the graphs being particularly well drawn, and there is a very useful and time-saving cross index."—*The Broad Arrow.*

London: George Bell & Sons, Portugal St., Lincoln's Inn, W.C.

THE MATHEMATICAL ASSOCIATION.

(An Association of Teachers and Students of Elementary Mathematics.)

"I hold every man a debtor to his profession, from the which as men of course do seek to receive countenance and profit, so ought they of duty to endeavour themselves by way of amends to be a help and an ornament therunto."—BACON.

President :

G. B. MATHEWS, M.A., F.R.S.

Vice-Presidents :

SIR ROBERT S. BALL, LL.D., F.R.S.
Prof. A. R. FORSYTH, Sc.D., LL.D.,
F.R.S.
G. HEPPLE, M.A.

Prof. W. H. H. HUDSON, M.A.
R. LEVETT, M.A.
A. LODGE, M.A.
Professor G. M. MINCHIN, F.R.S.

Treasurer :

F. W. HILL, M.A., City of London School, London, E.C.

Editor of the *Mathematical Gazette* :

W. J. GREENSTREET, M.A., Marling Endowed School, Stroud.

Secretaries :

C. PENDLEBURY, M.A., St. Paul's School, London, W.
H. D. ELLIS, M.A., 12 Gloucester Terrace, Hyde Park, London, W.

Other Members of the Council :

S. BARNARD, M.A.
R. F. DAVIS, M.A.
F. W. DOBBS, M.A.
C. GODFREY, M.A.
CECIL HAWKINS, M.A.

C. S. JACKSON, M.A.
F. S. MACAULAY, M.A., D.Sc.
A. W. SIDMONS, M.A.
C. O. TUCKEY, M.A.
W. H. WAGSTAFF, M.A.

C. E. WILLIAMS, M.A.

THE MATHEMATICAL ASSOCIATION, formerly known as the *Association for the Improvement of Geometrical Teaching*, is intended not only to promote the special object for which it was originally founded, but to bring within its purview all branches of elementary mathematics.

Its fundamental aim as now constituted is to make itself a strong combination of all masters and mistresses, who are interested in promoting good methods of mathematical teaching. Such an Association should become a recognized authority in its own department, and should exert an important influence on methods of examination.

General Meetings of the Association are held in London once a term, and in other places if desired. At these Meetings papers on elementary mathematics are read, and any member is at liberty to propose any motion, or introduce any topic of discussion, subject to the approval of the Council.

"The *Mathematical Gazette*" is the organ of the Association. It contains—

- (1) ARTICLES, on subjects within the scope of elementary mathematics.
- (2) NOTES, generally with reference to shorter and more elegant methods than those in current text-books.
- (3) REVIEWS, at present the most striking feature of the *Gazette*, and written by men of eminence in the subject of which they treat. They deal with the more important English and Foreign publications, and their aim, where possible, is to dwell rather on the general development of the subject, than upon the part played therein by the book under notice.
- (4) PROBLEMS AND SOLUTIONS, generally selected to show the trend of investigation at the universities, so far as is shown in the most recent scholarship papers. Questions of special interest or novelty also find a place in this section.
- (5) SHORT NOTICES, of books not specially dealt with in the REVIEWS.

Intending members are requested to communicate with one of the Secretaries. The subscription to the Association is 10s. per annum, and is due on Jan. 1st. It includes the subscription to "The *Mathematical Gazette*."
