

Phenomenology and Naturalism

What is the relationship between phenomenology and naturalism? Are they mutually exclusive or is a rapprochement possible between their approaches to consciousness and the natural world? Can phenomenology be naturalised and ought it to be? Or is naturalism fundamentally unable to accommodate phenomenological insights? How can phenomenological method be used within a naturalistic research program? This cutting-edge collection of original essays contains brilliant contributions from leading phenomenologists across the world. The collection presents a wide range of fascinating and carefully argued answers to these questions.
