Fig. 3

During publication errors were inadvertently introduced into Fig. 3 of the paper. The correct version is given below.

**Fig. 3.** Risk (multivariate hazard ratio) for colo-rectal cancer with intake of red and processed meat and fibre for the European Prospective Investigation of Cancer cohort ( $n$  1329). Cut-off points for fibre (g/d): low < 17; medium 17–28; high > 26. Cut-off points for red and processed meat (g/d): low: men < 30; women 13; medium: men 30–129; women 13–85, high: men > 129, women 85. \* $P$  < 0.05.
