The Return of Cultural Treasures

Jeanette Greenfield

The return to their homelands of cultural treasures such as the Elgin Marbles has become in recent years a potent political issue. Jeanette Greenfield's extensively researched book offers the first measured assessment of a complex problem. Ranging over 60 countries and examining the activities of more than 100 institutions and collectors, she reviews the historical, legal and political issues involved and details many remarkable case histories and legal arguments. For reference purposes, a set of 18 key international documents is provided on microfiche.

Now in paperback...

The Social Logic of Space

Bill Hillier and Juliette Hanson

"... a big step in attempts to develop a truly theoretical discourse on built form and... a substantial groundwork towards an intelligent understanding of the social nature of building and urban spaces."

—*Design Research*

Based on a new way of describing and analyzing the kinds of spatial patterns produced by buildings and towns, this study presents a new theory of space: how and why it is a vital component of how societies work.

Three New Volumes in the Cambridge Manuals in Archaeology Series

Archaeological Illustration

Lesley Adkins and Roy Adkins

This is the first practical guide to all aspects of archaeological illustration, from drawing finds in the field to technical studio drawing for publication. The book's ten chapters start from first principles and guide the illustrator through the historical development of archaeological illustration and basic skills. Each chapter then deals with a different illustrative technique. This invaluable reference tool provides information about appropriate equipment and a guide to manufacturers, too.

Hardcover \$49.50

Fishes

Alwyne Wheeler and Andrew K.G. Jones

In this manual, the authors discuss the importance of fishes in past economies and in contemporary archaeological research. They describe methods of extraction, fish anatomy, and classification, with the aid of numerous line drawings. The book also includes a survey of fishes most likely to be represented in archaeological sites and describes the biology of fishes in order to help archaeozoologists make informed judgments about methods of exploitation, size of fish caught, and meat yield.

Hardcover \$59.50

Soils and Micromorphology in Archaeology

Marie-Agnes Courty, Paul Goldberg, and Richard Macphail

Although soil science has been recognized as a crucial aspect of environmental archaeology since the 1950s, only with the development of micromorphology has its full potential been realized. After a historical introduction and sections on basic field description, sampling and macroscopic analysis, the authors concentrate accordingly on microscopic studies and the preparation, analysis, and interpretation of thin sections. Sedimentation and natural pedological processes are discussed and characterized, but the focus throughout remains squarely on the information micromorphology can provide about early human behavior.

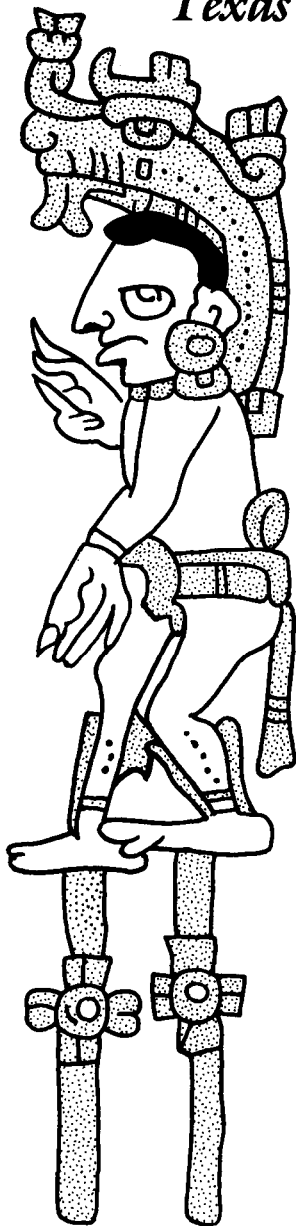

Hardcover about \$70.00

MAN ON EARTH

By JOHN READER

Book-of-the-Month Club main selection

History Book Club main selection

*The Geographic Society of Chicago
publication award, 1988*

"John Reader has put together a book you want to quote to just about anyone you can buttonhole."

—David Willis McCullough,

Book-of-the-Month Club Editorial Board

An exploration into the impressive record of human adaptability to the changing environment and affirmation of the value of diversity in an age of increasing conformity.

320 pp., 125 color illustrations, \$29.95

ANCIENT CHALCATZINGO

Edited by DAVID C. GROVE

"Grove is to be commended for a highly creditable job of handling the difficult task of publishing the data from a major archaeological project in a useably thorough yet usefully accessible form. . . . an admirable end-product in a quite handsome package." —*American Antiquity*

581 pp., over 500 illustrations, \$75.00

IN THE LAND OF THE OLMEC

**Volume 1. The Archaeology
of San Lorenzo Tenochtitlán**

Volume 2. The People of the River

By MICHAEL D. COE

and RICHARD A. DIEHL

" . . . a stunning example of what an archaeological report can be . . . This work is loaded with information, is extremely readable, evokes vividly the experience of the project, and suggests the life of the past. It is a fine example of good scholarship and good writing."

—*Américas*

Two volumes, boxed; over 1,900 illustrations, \$100.00

DWELLINGS

The House across the World

By PAUL OLIVER

There is an essential relationship between people and their buildings which has its most intimate expression in the house, or dwelling. Drawing on his twenty-five years of fieldwork on five continents, Paul Oliver looks at the varied forms that dwellings take in different societies and examines the cultural, economic, social, and psychological reasons for that variety.

OUTSTANDING TEXTBOOKS

Quantifying Archaeology

Stephen Shennan
University of Southampton, England

"An important addition to the handful available which explain mathematical and computer techniques for archaeologists. It provides a firm grounding in statistics."

—JAMES DORAN, UNIVERSITY OF ESSEX
JOURNAL OF ARCHAEOLOGICAL SCIENCE

This book introduces the most important quantitative methods, from the initial description of archaeological data to techniques of multivariate analysis.

(Note: A co-publication with Edinburgh University Press, 22 George Square, Edinburgh, EH89LF, Scotland. For U.S., Canada, and the Philippines, this book is available only from the U.S. office of Academic Press. For all other territories, contact Edinburgh University Press.)

Principles of Archaeological Stratigraphy

Second Edition

Edward Harris
Bermuda Maritime Museum, Mangrove Bay
with a Foreword by
Michael Schiffer

This book is the only text devoted entirely to archaeological stratigraphy. The first edition appeared in 1979 as a result of the invention, by the author, of the Harris Matrix—a method for analyzing and presenting the stratigraphic sequences of archaeological sites.

Key Features:

- Written in a simple style suitable for students
- Covers a basic principle of all archaeological excavations
- Provides a data description and analysis tool for all such digs, which is now widely accepted and used

CONTENTS: The Concept of Stratigraphy in Geology. The Concept of Stratigraphy in Archaeology. Techniques of Archaeological Excavation. Early Recording Method on Excavations. The Laws of Archaeological Stratigraphy. Deposits as Units of Stratification. Interfaces as Units of Stratification. Archaeological Sections. Archaeological Plans. Correlation, Phasing and Stratigraphic Sequences. Stratigraphic Sequences and Post-Excavation Analyses. An Outline for Stratigraphic Recording on Excavations. Glossary of Terms in Archaeological Stratigraphy. Bibliography. Index.

November 1989, 184 pages, \$39.00
ISBN: 0-12-326651-3

Paleoethnobotany

A Handbook of Procedures

Deborah M. Pearsall
University of Missouri, Columbia

"An indispensable book. The recovery, identification, and analysis of plant macroremains, pollen, and phytoliths are detailed authoritatively. Its encyclopedic coverage provides an unprecedented basis for understanding human and plant interactions in the archaeological record."

—RICHARD I. FORD
UNIVERSITY OF MICHIGAN

CONTENTS: The Paleoethnobotanical Approach. Techniques for Recovering Macroremains. Identification and Interpretation of Macroremains. Archaeological Palynology. Phytolith Analysis. Integrating Paleoethnobotanical Data. Each chapter includes references. Index.

1989, 470 pages, \$59.95

Prehistory of the Sacramento River Canyon, Shasta County, California

By Mark E. Basgall and William R. Hildebrandt

C.A.R.D. Publication number 9, Fall 1989

This monograph presents the findings of data recovery excavations conducted at four prehistoric archaeological sites in the Sacramento River Canyon, Shasta County, California. This work resulted in the recovery of more than 20,000 tools, 226,000 pieces of debitage, and a wide variety of faunal and floral remains. Three major periods of human occupation were documented within the canyon. Notwithstanding the fact that three discrete cultural phases were identified, lifeways in the canyon also display a marked degree of homogeneity. From the vantage of available archaeological data, anadromous fish and acorns were probably used throughout the sequence and subsistence-settlement specialization vis-a-vis these resources never achieved the level found in areas to the south.
